Important information about Syndicate Reports and Accounts

Access to this document is restricted to persons who have given the certification set forth below. If this document has been forwarded to you and you have not been asked to give the certification, please be aware that you are only permitted to access it if you are able to give the certification.

The syndicate reports and accounts set forth in this section of the Lloyd's website, which have been filed with Lloyd's in accordance with the Syndicate Accounting Byelaw (No. 8 of 2005), are being provided for informational purposes only. The syndicate reports and accounts have not been prepared by Lloyd's, and Lloyd's has no responsibility for their accuracy or content. Access to the syndicate report and accounts is not being provided for the purposes of soliciting membership in Lloyd's or membership on any syndicate of Lloyd's, and no offer to join Lloyd's or any syndicate is being made hereby. Members of Lloyd's are reminded that past performance of a syndicate in any syndicate year is not predictive of the related syndicate's performance in any subsequent syndicate year.

You acknowledge and agree to the foregoing as a condition of your accessing the syndicate report and accounts. You also agree that you will not provide any person with a copy of any syndicate report and accounts without also providing them with a copy of this acknowledgement, by which they will also be bound.

Ernst & Young LLP

^{*} Non-Executive Director

The Directors of Vibe Syndicate Management Limited (the Managing Agent) present their report for the year ended 31 December 2017.

This annual report is prepared using the annual basis of accounting as required by Statutory Instrument No 1950 of 2008, The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 ("Lloyd's Regulations 2008").

The Managing Agent does not prepare separate underwriting year accounts on the three year accounting basis in accordance with the Lloyd's Syndicate Accounting Byelaw (No. 8 of 2005), as the Syndicate has a single Corporate Member.

Results

The result for calendar year 2017 is a loss of £32.2 million (2016 loss of £11.5 million).

Principal Activity

From 2014 the Syndicate's principal activity has been the transaction of general insurance and reinsurance business as part of the Lloyd's market. Prior to 2014 the Syndicate wrote Lloyd's legacy contracts in the form of Reinsurance to Close ("RITC") for various syndicates' open years.

Syndicate 5678 offers a range of insurance and reinsurance products which is broken down into eight different underwriting teams.

- Accident & Health
- Casualty Treaty
- · Credit, Surety, Political Risk & Terror
- · Financial Institutions
- North American Specialty Programs
- Professional Indemnity
- Property D&F
- · Property Treaty

Whilst new legacy activity has reduced significantly in recent years, the Agency continues to seek opportunities to write further contracts within the Lloyd's market.

Syndicate 5678 trades with the Lloyd's ratings of A+ Standard & Poor's, AA- Fitch and A A.M. Best.

Vibe Syndicate Management Limited is the Managing Agent for Syndicate 5678. The Managing Agent is ultimately owned by Syndicate Holding Corp, a Puerto Rican based company. The Group is owned principally by two investors, who together provide capital for the Syndicate: Quantum Strategic Partners Ltd., a private investment vehicle managed by Soros Fund Management LLC, and Pine Brook Partners.

The live underwriting operation has grown steadily from its initial mid-year start in 2014 of £5m, and in 2017 had gross written premium of £127.3m, with an approved plan of gross written premium for 2018 of £148m.

Business Review

Review of the Business of the Syndicate

The Syndicates results for 2017 have been dominated by the impact of Hurricanes Harvey, Irma and Maria. Whilst the gross impact of these events was £31.5m, the use of reinsurance as a capital preservation tool limited the net impact to £12.2m, well within management's risk appetite.

The live side of the Syndicate continues to grow. As a consequence, the result reflects the reinsurance costs and expenses associated with that growth.

On the investment side, the challenging interest rate environment has resulted in an investment return of 0.64% (2016 1.08%).

The Syndicate's key financial statistics for 2017 were as follows:

	2017 £m	2016 £m	Movement £m
Gross Written Premiums	127.3	53.6	73.7
Net incurred claims – live business	(64.9)	(23.6)	(41.3)
Net incurred claims – legacy business	(0.9)	4.1	(5.0)
Loss for the financial year	(32.2)	(11.5)	(20.7)
Gross loss ratio – live business	101%	84%	17%
Net expense ratio (including commission)	51%	74%	(23%)
Combined ratio	152%	150%	2%

Vibe continues to grow the live business in a controlled and disciplined manner with gross written premiums increasing significantly by 138% during 2017 to £127.3m. The year saw the full year benefit of the four market leading teams that joined in 2016 (Credit, Surety, Political Risk & Terror, North American Casualty, North American Specialty Programs and Property Direct & Facultative).

Retention rates were positive with Vibe retaining 89% and 86% for insurance and reinsurance respectively. Premium rates for the Syndicate reduced by 2.1% during the period, however, this was less than management's expectations.

Remaining disciplined will in the short term have some impact on profitability due to the fixed nature of expenses. However, the Syndicate will not sacrifice profitability for growth and will continue to walk away from business that is seen as unprofitable. The Syndicate will continue to invest in skills and infrastructure so as to succeed in the current business environment.

The Agency has generally seen the RITC contracts written by the Syndicate perform as expected with the exception of some adverse development in relation to the now-settled Nationwide claim (£1m) and Syndicate 1047's Italian professional indemnity business. These movements are believed to be of a one-off nature and are typical of the development of business at this advanced stage of run off.

The long term strategy of the Syndicate is to achieve a balance between long tail and short tail, and insurance and reinsurance. The quality of the underwriters and the strong foundation that has been built give the Agency and capital providers optimism for the future, despite current market conditions.

Outwards reinsurance protection is purchased to protect the Syndicate so that net losses on an event and per risk basis remain within management's risk appetite. This protection is predominantly excess of loss treaty reinsurance and has increased during the year as a result of increased gross premium levels.

The Syndicate has maintained its cautious investment strategy during 2017 with a focus on government and high grade corporate debt with the asset duration running shorter than the liability duration; consequently, an investment return of 0.64% was earned. The Syndicate will continue to maintain this strategy for the foreseeable future.

Review of Financial Position

Financial investments increased from £72.3m to £116.5m mainly from £41.2m capital provided by members as Funds in Syndicate. This was assisted by increased premium flow.

There has been an increase from £23.8m to £42.2m on Reinsurers' share of technical provisions in the year. This increase is driven by the adverse catastrophe experience in the year.

Member's balances have increased overall with the inflow of funds in syndicate (£41.2m) offset by the loss for the period.

Gross technical provisions have increased from £149.5m to £234.0m; this increase is driven by the adverse catastrophe experience and the provision of IBNR on the live business from additional premium. The increase in unearned premiums is due to the increased volumes of live business.

Principal Risks and Uncertainties

The Managing Agent has a Risk Management Function for the Syndicate with clear terms of reference from the Board of Directors, its Committees and the associated Executive Management Committees. The Board approves the risk management policies and meets regularly to approve any commercial, regulatory and organisational requirements of such policies.

The Board sets its risk appetite annually as part of the Syndicate's business planning and capital setting process. The Risk Management Function is also responsible for reviewing the Syndicate's Own Risk and Solvency Assessment ('ORSA'); recommending the assessment to the Board for approval.

The principal risks and uncertainties facing the Syndicate are set out below, including references to the Notes where additional information relating to these risks is provided in the financial statements:

Insurance Risk [Note 21(c)]

The principal risk the Syndicate faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long-term claims. The objective of the Syndicate is to ensure that sufficient reserves are available to cover these liabilities.

The Board manages insurance risk by agreeing its appetite for these risks annually through the business plan, which sets out targets for volumes, pricing, line sizes and retention by class of business. The Syndicate purchases reinsurance as part of its risks mitigation programme and the Agency uses catastrophe modelling software to model maximum probable losses from catastrophe-exposed business.

The Board monitors performance and exposures against the business plan on a quarterly basis. Reserve adequacy is monitored through quarterly review by the Syndicate Actuary and the Actuarial and Reserving Committee.

Credit Risk [Note 21(d)(1)]

Credit risk relates to the risk of default on the settlement of balances receivable by the Syndicate. The Syndicate's reinsurers and intermediates from which gross written premiums are sourced represent the principal sources of this risk. This risk is actively managed by the policies, procedures and controls of the Broker Vetting and Reinsurance Security Working Group.

Liquidity Risk [Note 21(d)(2)]

Liquidity risk is the risk that the Syndicate will encounter difficulty in meeting obligations associated with financial instruments. In respect of catastrophic events there is also a liquidity risk associated with the timing differences between gross cash out-flows and expected reinsurance recoveries.

A number of policies are implemented by the Agency to mitigate against the risk of the Syndicate being unable to settle its obligations as they fall due.

Market Risk [Note 21(d)(3)]

The key aspect of market risk is that the Syndicate incurs losses on foreign exchange movements as a result of mismatches between the currencies in which assets and liabilities are denominated. Currency matching is reviewed by Management quarterly. Where there is a significant mismatch, the Agency seeks to mitigate the risk through buying or selling currency, where this is appropriate.

Interest Rate Risk [Note 21(d)(3)(b)]

Interest rate risk is the risk that the value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The extent of any price fluctuation is driven by the portfolio duration. The investment portfolio duration is managed so to maintain a fairly short average duration period, principally due to current market conditions.

Financial instruments and risk management

Information on the use of financial instruments by the Syndicate and its management of financial risk and in particular its exposure to interest rate risk, currency risk, credit risk and liquidity risk is disclosed in note 21 to the financial statements.

Operational Risk

This is the risk that errors caused by people, processes or systems lead to losses to the Syndicate. The Agency seeks to manage this risk through its governance structure and internal control framework and employs a structured programme of testing systems and controls which is carried out by the Internal Audit Function.

Regulatory Risk [Note 21(b)]

The Agency is required to comply with the requirements of the Prudential Regulatory Authority (PRA) and Financial Conduct Authority (FCA) and Lloyd's. Lloyd's requirements include those imposed on the Lloyd's market by overseas regulators, particularly in respect of US situs business. Regulatory risk is the risk of loss owing to a breach of regulatory requirements or failure to respond to regulatory change. The Agency has a Compliance Officer who monitors regulatory developments and assesses the impact on the Agency's policies. The Compliance Officer is supported by a Compliance Manager who carries out a compliance monitoring programme.

Conduct risk is the risk that the Syndicate fails to pay appropriate regard to the interest of its customers and/or fails to treat them fairly at all times. Conduct risk is managed through the application of strong internal controls, compliance policies and procedures, and through the monitoring of various conduct risk metrics.

Report of the Directors

FOR THE YEAR ENDED 31 DECEMBER 2017

Future Developments & Important Events since the end of the Financial Year

The Syndicate continues to transact in the same classes of general insurance and reinsurance business as in 2017. More modest premium growth is planned in 2018. Indications from January renewals have so far been positive in terms of both rate increases and retention.

The risks to UK economic growth remain significant not least because of the uncertainty created by the UK's decision to leave the European Union (Brexit). It is difficult to anticipate the terms of the UK's exit from the EU. At this stage of the Agency's development and given the territorial exposure of the business written, the direct impact of Brexit on the Agency is judged to be minimal.

The Agency continues with its strategy to write profitable business, and will not grow the top line at the expense of long term profitability. The Agency continues to review the operating model and cost structure to ensure it can control the cost base on the assumption current market conditions persist, but also to ensure it is well positioned for favourable developments in market conditions. The Syndicate's strong capital providers remain committed to the Agency's long-term growth strategy and are in a position to support the Syndicate as and when new opportunities arise.

The Syndicate delivers its annual Syndicate Business Forecast ("SBF") to Lloyd's each year and this forms the basis of the Syndicate's short-term business plans. The Syndicate's 2018 SBF was submitted with planned gross written premium of £148m (2017 - £112m)."

Directors

Details of the Directors of the Managing Agent that served during the year and up to the date of signing of the Syndicate Annual Accounts are provided on page 2 in Directors and Administration section.

Disclosure of Information to the Auditors

The Directors of the Managing Agent at the time the report is approved confirm that:

- So far as each of them are aware, there is no relevant audit information, being information needed by the Syndicate's auditor in connection with the auditor's report, of which the auditor is unaware; and
- Having made enquiries of fellow directors of the Managing Agency and the Syndicate's auditor, each director has taken all the steps that he or she ought to have taken as a director to become aware of any relevant audit information and to establish that the Syndicate's auditor is aware of that information.

Reappointment of Auditors

Ernst & Young LLP have indicated their willingness to continue in office as the Syndicate's auditors.

On behalf of the Board

Dinah Gately

CEO

Statement of Managing Agent's Responsibilities FOR THE YEAR ENDED 31 DECEMBER 2017

The Managing Agent is responsible for preparing the Syndicate annual report and accounts in accordance with applicable laws and regulations.

The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 require the Managing Agent to prepare Syndicate annual report and accounts at 31 December each year in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). The Syndicate annual reports and accounts are required by law to give a true and fair view of the state of affairs of the Syndicate as at that date and of its profit or loss for that year.

In preparing the Syndicate annual report and accounts, the Managing Agent is required to:

- 1 Select suitable accounting policies which are applied consistently;
- 2 Make judgements and estimates that are reasonable and prudent;
- 3 State whether applicable UK accounting standards have been followed, subject to any material departures disclosed and explained in the notes to the Syndicate annual accounts; and
- 4 Prepare the Syndicate annual report and accounts on the basis that the Syndicate will continue to write future business unless it is inappropriate to presume that the syndicate will do so.

The Managing Agent is responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Syndicate and enable it to ensure that the Syndicate annual report and accounts comply with the Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008. It is also responsible for safeguarding the assets of the Syndicate and hence for taking reasonable steps for prevention and detection of fraud and other irregularities.

The Managing Agent is responsible for the maintenance and integrity of the corporate and financial information included on the business' web site. Legislation in the United Kingdom governing the preparation and dissemination of annual accounts may differ from legislation in other jurisdictions.

Independent Auditor's Report to the Member of 5678 FOR THE YEAR ENDED 31 DECEMBER 2017

Opinion

We have audited the syndicate annual accounts of Syndicate 5678 ('the syndicate') for the year ended 31 December 2017 which comprise the Income Statement, the Statement of Members' Balances, the Statement of Financial Position, the Statement of Cash Flows and the related notes 1 to 21, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards including FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' and FRS 103 'Insurance Contracts' (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the syndicate annual accounts:

- give a true and fair view of the syndicate's affairs as at 31 December 2017 and of its loss for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the syndicate annual accounts section of our report below. We are independent of the syndicate in accordance with the ethical requirements that are relevant to our audit of the syndicate annual accounts in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Use of our report

This report is made solely to the syndicate's members, as a body, in accordance with The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008. Our audit work has been undertaken so that we might state to the syndicate's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the syndicate and the syndicate's members as a body, for our audit work, for this report, or for the opinions we have formed.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which the ISAs (UK) require us to report to you where:

- the managing agent's use of the going concern basis of accounting in the preparation of the syndicate annual accounts is not appropriate; or
- the managing agent has not disclosed in the syndicate annual accounts any identified
 material uncertainties that may cast significant doubt about the syndicate's ability to continue
 to adopt the going concern basis of accounting for a period of at least twelve months from the
 date when the syndicate annual accounts are authorised for issue.

Independent Auditor's Report to the Member of 5678

FOR THE YEAR ENDED 31 DECEMBER 2017

Other information

The other information comprises the information included in the annual report, other than the syndicate annual accounts and our auditor's report thereon. The managing agent is responsible for the other information.

Our opinion on the syndicate annual accounts does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the syndicate annual accounts, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the syndicate annual accounts or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the syndicate annual accounts or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Opinion on other matter prescribed by The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008

In our opinion, based on the work undertaken in the course of the audit

- the information given in the managing agent's report for the financial year in which the syndicate annual accounts are prepared is consistent with the syndicate annual accounts; and
- the managing agent's report has been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the syndicate and its environment obtained in the course of the audit, we have not identified material misstatements in the managing agent's report.

We have nothing to report in respect of the following matters where The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 requires us to report to you, if in our opinion:

- the managing agent in respect of the syndicate has not kept adequate accounting records; or
- the syndicate annual accounts are not in agreement with the accounting records; or
- we have not received all the information and explanations we require for our audit; or
- certain disclosures of the managing agents' emoluments specified by law are not made.

Independent Auditor's Report to the Member of 5678

FOR THE YEAR ENDED 31 DECEMBER 2017

Responsibilities of the managing agent

As explained more fully in the Statement of Managing Agent's Responsibilities set out on page 8, the managing agent is responsible for the preparation of the syndicate annual accounts and for being satisfied that they give a true and fair view, and for such internal control as the managing agent determines is necessary to enable the preparation of the syndicate annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the syndicate annual accounts, the managing agent is responsible for assessing the syndicate's ability to continue in operation, disclosing as applicable, matters related to its ability to continue in operation and using the going concern basis of accounting unless the managing agent either intends to cease to operate the syndicate, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the syndicate annual accounts

Our objectives are to obtain reasonable assurance about whether the syndicate annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these syndicate annual accounts.

A further description of our responsibilities for the audit of financial statements is located on the Financial Reporting Council's website at https://www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Ed Jervis (Senior Statutory Auditor)

1. Accounting policies

1.1 Statement of compliance

The financial statements have been prepared in compliance with The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 and FRS 102 and FRS 103, being applicable UK GAAP accounting standards, and in accordance with the provisions of Schedule 3 of the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations relating to insurance companies.

The financial statements are prepared under the historical cost convention except for certain financial instruments which are measured at fair value.

1.2 Basis of preparation

The financial statements for the year ended 31 December 2017 were approved for issue by the Board of Directors on 15 March 2018.

The financial statements are prepared in sterling which is the functional and presentational currency of the Syndicate and rounded to the nearest £'000.

As permitted by FRS 103 the Syndicate continues to apply the existing accounting policies that were applied prior to this standard for its insurance contracts.

Certain other amounts have been amended in order to conform with current year presentation.

1.3 Judgements and key sources of estimation uncertainty

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the amounts reported for assets and liabilities as at the balance sheet date and the amounts reported for revenues and expenses during the year. However, the nature of estimation means that actual outcomes could differ from those estimates. The following are the Syndicate's key sources of estimation uncertainty:

Insurance contract technical provisions

For insurance contracts, estimates have to be made both for the expected ultimate cost of claims reported at the reporting date and for the expected ultimate cost of claims incurred, but not yet reported, at the reporting date (IBNR). It can take a significant period of time before the ultimate claims cost can be established with certainty and for some type of policies, IBNR claims form the majority of the liability in the statement of financial position.

The ultimate cost of outstanding claims is estimated by using a range of standard actuarial claims projection techniques, such as Chain Ladder and Bornheutter-Ferguson methods.

The main assumption underlying these techniques is that past claims development experience can be used to project future claims development and hence ultimate claims costs. The provision for claims outstanding is assessed on an individual case basis and is based on the estimated ultimate cost of all claims notified but not settled by the balance sheet date, together with the provision for related claims handling costs. The provision also includes the estimated cost of claims incurred but not reported (IBNR) at the balance sheet date based on statistical methods.

1. Accounting policies (continued)

Insurance contract technical provisions (continued)

These methods generally involve projecting from past experience of the development of claims over time to form a view of the likely ultimate claims to be experienced for more recent underwriting, having regard to variations in the business accepted and the underlying terms and conditions. For the most recent years, where a high degree of volatility arises from projections, estimates may be based in part on output from rating and other models of the business accepted and assessments of underwriting conditions.

The amount of salvage and subrogation recoveries is separately identified and, where material, reported as an asset. Similar judgements, estimates and assumptions are employed in the assessment of adequacy of provisions for unearned premium. Judgement is also required in determining whether the pattern of insurance service provided by a contract requires amortisation of unearned premium on a basis other than time apportionment.

Further details are given in Note 21.

Estimates of future premiums

For certain insurance contracts, premium is initially recognised based on estimates of ultimate premiums. These estimates are judgemental and could result in misstatements of revenue recorded in the financial statements.

The main assumption underlying these estimates is that past premium development can be used to project future premium development.

1.4 Significant accounting policies

Financial investments

As permitted by FRS 102, the Syndicate has elected to apply the recognition and measurement provisions of IAS 39 – Financial Instruments (as adopted for use in the EU) to account for all of its financial instruments.

The Syndicate classifies its financial investments as either financial assets at fair value through profit or loss, loans and receivables or available for sale. The Syndicate determines the classification of its financial assets at initial recognition. Financial assets are initially recognised at fair value plus, in the case of instruments not at fair value through profit or loss, directly attributable transaction costs.

The classification depends on the purpose for which the investments were acquired or originated. In general, financial assets are classified as fair value through profit or loss as the Syndicate's documented investment strategy is to manage financial investments acquired on a fair value basis. The available for sale category is used only in cases when the investments are passively managed and the Syndicate held none of these at year end or the previous year.

All regular way purchases and sales of financial assets are recognised on the trade date, i.e., the date the Syndicate commits to purchase or sell the asset. Regular way purchases or sales of financial assets require delivery of assets within the time frame generally established by regulation or convention in the market place.

1. Accounting policies (continued)

Financial investments (continued)

Financial assets at fair value through profit or loss has two sub categories namely financial assets held for trading and those designated at fair value through profit or loss at inception. All of the Syndicates assets are held for trading. These investments are initially recorded at fair value. Subsequent to initial recognition, these investments are re-measured at fair value at each reporting date. Fair value adjustments and realised gains and losses are recognised in the income statement.

Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at banks and in hand and short term deposits with an original maturity date of three months or less. For the purpose of the cash flow statement, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

Fair value of financial assets

The Syndicate uses the following hierarchy for determining the fair value of financial instruments by valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.
- Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.
- Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

See Note 11 for details of financial instruments classified by fair value hierarchy.

Derecognition of financial assets

A financial asset is derecognised when the Syndicate has transferred all the risks and rewards of the asset.

Financial liabilities

The Syndicate's financial liabilities include trade and other payables, borrowings and insurance payables. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings, net of directly attributable transaction costs.

Trade and other payables and loans and borrowings are subsequently measured at amortised cost using the effective interest method. Gains and losses are recognised in the income statement when the liabilities are derecognised as well as through the effective interest rate method (EIR) amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR. The EIR amortisation is included in investment return in the profit or loss.

Derivative financial liabilities are subsequently measured at fair value through profit or loss.

A financial liability is derecognised when the obligation under the liability is discharged or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of the existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective amounts is recognised in profit or loss.

1. Accounting policies (continued)

Investment return

Unrealised and realised gains and losses on financial investments are recognised based on the appropriate classification of financial investments and are covered in detail under the accounting policy for financial investments.

An allocation of actual investment return on investments supporting the general insurance technical provisions and associated member's balance is made from the non-technical account to the technical account. Investment return related to non-insurance business and member's balance is attributed to the non-technical account. Investment return has been wholly allocated to the technical account as all investments relate to the technical account.

Insurance contracts - Product classification

Insurance contracts are those contracts when the Syndicate (the insurer/reinsurer) has accepted significant insurance risk from another party (the policyholder/reinsured) by agreeing to compensate the policyholder if a specified uncertain future event (the re/insured event) adversely affects the policyholders. As a general guideline, the Syndicate determines whether it has significant insurance risk, by comparing benefits paid with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expire.

Any separable embedded derivatives within an insurance contract are separated and accounted for in accordance with IAS 39 unless the embedded derivative is itself an insurance contract (i.e., the derivative is not separated if the policyholder benefits from the derivative only when the insured event occurs).

Gross written premiums

Gross written premiums comprise the total premiums receivable for the whole period of cover provided by the contracts entered into during the reporting period, regardless of whether these are wholly due for payment in the reporting period, together with any adjustments arising in the reporting period to such premiums receivable in respect of business written in prior reporting periods. They are recognised on the date on which the policy commences. Additional or return premiums are treated as a re-measurement of the initial premium. Gross written premiums are stated gross of brokerage payable and exclude taxes and duties levied on them.

Under some policies, written premiums are adjusted retrospectively in the light of claims experience or where the risk covered cannot be assessed accurately at the commencement of cover. Where written premiums are subject to an increase retrospectively, recognition of any potential increase is deferred until the additional amount can be ascertained with reasonable certainty. Where written premiums are subject to a reduction, a re-measurement taking account of such a reduction is made as soon as there is an obligation to the coverholder.

1. Accounting policies (continued)

Outward reinsurance premiums

Outward reinsurance written premiums comprise the total premiums payable for the whole cover provided by contracts entered into the period, including portfolio premiums payable, and are recognised on the date on which the policy incepts. Premiums include any adjustments arising in the accounting period in respect of reinsurance contracts incepting in prior accounting periods.

Under some policies, outward reinsurance premiums payable are adjusted retrospectively in the light of claims experience or where the risk covered cannot be assessed accurately at the commencement of cover. Where written premiums are subject to an increase retrospectively, recognition of any potential increase is recognised as soon as there is an obligation to the policyholder. Outwards reinsurance premiums are accounted for and earned in the same accounting period as the premiums for the related direct or inwards business being reinsured.

Claims

Claims include all claims occurring during the year, whether reported or not, related internal and external claims handling costs that are directly related to the processing and settlement of claims, a reduction for the value of salvage and other recoveries, and any adjustments to claims outstanding from previous years.

Reinsurance recoveries are recognised when the related gross insurance claim is recognised according to the terms of the relevant contract.

Technical provisions

Technical provisions comprise claims outstanding and provisions for unearned premiums.

Claims outstanding

The outstanding claims provision is based on the estimated ultimate cost of all claims incurred but not settled at the reporting date, whether reported or not, together with related claims handling costs and reduction for the expected value of salvage and other recoveries. Delays can be experienced in the notification and settlement of certain types of claims, therefore, the ultimate cost of these cannot be known with certainty at the reporting date. The liability is calculated at the reporting date using a range of standard actuarial claim projection techniques, based on empirical data and current assumptions that may include a margin for adverse deviation. The liability is not discounted for the time value of money.

Provisions for unearned premiums

Unearned premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date. In respect of general insurance business, written premiums are recognised as earned over the period of the policy on a time apportionment basis having regard where appropriate, to the incidence of risk. The proportion attributable to subsequent periods is deferred as a provision for unearned premiums.

Unearned reinsurance premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date. Unearned reinsurance premiums are deferred over the term of the underlying direct insurance policies for risks-attaching contracts and over the term of the reinsurance contract for losses-occurring contracts.

1. Accounting policies (continued)

Unexpired risks

A liability adequacy provision (the unexpired risks provision) is made where the cost of claims and expenses arising after the end of the financial year from contracts concluded before that date, is expected to exceed the provision for unearned premiums, net of deferred acquisition costs.

The assessment of whether a provision is necessary is made by considering separately each category of business on the basis of information available at the reporting date, after offsetting surpluses and deficits arising on products which are managed together. Investment income is taken into account in calculating the provision.

At 31 December 2017 and 31 December 2016 the Syndicate did not have an unexpired risks provision.

Deferred acquisition costs

Acquisition costs comprise costs arising from the conclusion of insurance contracts. They include both direct costs, such as intermediary commissions or the cost of drawing up the insurance document or including the insurance contract in the portfolio, and indirect costs, such as the advertising costs or the administrative expenses connected with the processing of proposals and the issuing of policies.

Deferred acquisition costs are costs arising from conclusion of insurance contracts that are incurred during the reporting period but which relate to a subsequent reporting period and which are carried forward to subsequent reporting periods.

Deferred acquisition costs are amortised over the period in which the related premiums are earned.

Reinsurance assets

The Syndicate cedes insurance risk in the normal course of business for all of its businesses. Reinsurance assets represent balances due from reinsurance companies. Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision or settled claims associated with the reinsurer's policies and are in accordance with the related reinsurance contract.

Reinsurance assets are reviewed for impairment at each reporting date, or more frequently, when an indication of impairment arises during the reporting year. Impairment occurs when there is objective evidence as a result of an event that occurred after initial recognition of the reinsurance asset that the Syndicate may not receive all outstanding amounts due under the terms of the contract and the event has a reliably measurable impact on the amounts that the Syndicate will receive from the reinsurer. The impairment loss is recorded in the income statement.

Gains or losses on buying reinsurance are recognised in the income statement immediately at the date of purchase and are not amortised. There were no such gains recognised in 2017 or 2016.

Ceded reinsurance arrangements do not relieve the Syndicate from its obligations to policyholders.

Insurance receivables

Insurance receivables are recognised when due and measured on initial recognition at the fair value of the consideration received or receivable. Subsequent to initial recognition, insurance receivables are measured at amortised cost, using the effective interest rate method. The carrying value of insurance receivables is reviewed for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable, with the impairment loss recorded in the income statement.

Insurance receivables are derecognised when the derecognition criteria for financial assets have been met.

1. Accounting policies (continued)

Insurance payables

Insurance payables are recognised when due and measured on initial recognition at the fair value of the consideration received less directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost using the effective interest rate method. Insurance payables are derecognised when the obligation under the liability is settled, cancelled or expired.

Foreign currencies

The Syndicate's functional currency and presentational currency is Sterling.

Transactions denominated in currencies other than the functional currency are initially recorded in the functional currency at the exchange rate ruling at the date of the transactions. Monetary assets and liabilities (which include all assets and liabilities arising from insurance contracts including unearned premiums and deferred acquisition costs) denominated in foreign currencies are retranslated into the functional currency at the exchange rate ruling on the reporting date.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction and are not subsequently restated. Non-monetary items denominated in a foreign currency, measured at fair value are translated into the functional currency using the exchange rate ruling at the date when the fair value was determined.

Exchange differences are recorded in the non-technical account.

Taxation

Under schedule 19 of the Finance Act 1993 managing agents are not required to deduct basic-rate income tax from trading income. In addition, all UK basic-rate income tax deducted from Syndicate investment income is recoverable by managing agents and consequently the distribution made to the member or their member's agents is gross of tax. Capital appreciation falls within trading income and is also distributed gross of tax.

No provision has been made for any United States Federal Income Tax payable on underwriting results or investment earnings. Any payments on account made by the Syndicate are included in the statement of financial position under the heading 'Member's Balances'.

No provision has been made for any overseas tax payable by members on underwriting results.

Pension costs

The Managing Agency outsources its operations to a Service Company which operates a defined contribution scheme. Pension contributions relating to Syndicate staff are charged to the Syndicate and included within net operating expenses.

2. Segmental Analysis

An analysis of the underwriting result before investment return and other income is set out below:

2017	Gross written premiums	Gross premium earned	Gross claims incurred	Gross operating expenses	Reinsurance balance	Total

	20,756	10,503
Administrative expenses	12,732	8,659
	33,488	19,162

Member's standard personal expenses of £1,462k (2016: £696k) are included within administrative expenses. Member's standard personal expenses include Lloyd's subscriptions, central fund contributions and managing agents fees.

7. Auditors' Remuneration

	2017	2016
	£000	£000
Audit of syndicate annual accounts	182	147
Audit related assurance services	44	43
Actuarial services	37	30
	263	220

Auditor' remuneration is included as part of the administrative expenses in note 6 to the financial statements.

8. Staff Costs

There were no staff employed by the syndicate or managing agency.

Recharges from Vibe Services Management Ltd, a wholly-owned subsidiary of Syndicate Holding Corp and recharged to the Syndicate in respect of staff costs were as follows:

	2017	2016
	£000	£000
Wages & salaries	7,105	6,656
Social security and pension costs	1,989	1,430

The average number of employees employed by Vibe Services Management Ltd but working for the syndicate during the year was as follows:

	2017	2016
	No.	No.
Claims	11	7
Administration, finance & management	28	12
Underwriting	33	21
Reinsurance	2	4
IT	9	7
Operations	9	11
Risk Management	5	5
	97	67

9. Emoluments of the Directors of Vibe Syndicate Management Limited

The directors of Vibe Syndicate Management Limited (Vibe SML) are paid by Vibe Services Management Ltd and a proportion of their remuneration is charged to the syndicate and included within net operating expenses:

	2017	2016
	0003	£000
Aggregate remuneration of Executive Directors	1,504	1,333
Aggregate remuneration of Non-Executive Directors	127	123

The active underwriter received the following remuneration charged as a Syndicate expense:

	2017	2016
	£000	£000
Emoluments	433	402

No advances or credits granted by the managing agent to any of its directors subsisted during the year.

10. Investment Return

	2017	2016

11. Financial Investments (continued)

The following table shows financial investments recorded at fair value analysed between the three levels in the fair value hierarchy:

	Level 1 £000	Level 2 £000	Level 3 £000	Total £000
31 December 2017 Shares and other variable yield securities and units in unit trusts Debt securities and other fixed income	6,252			6,252
securities	107,553			107,553
	113,805		<u> </u>	113,805
31 December 2016 Shares and other variable yield securities				
and units in unit trusts Debt securities and other fixed income	2,562	-	-	2,562
securities	64,361	-		64,361
	66,923	-	<u> </u>	66,923

Included in the level 1 category are financial assets that are measured by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry Syndicate, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Level 2 category are financial assets measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions. The Syndicate did not hold any of these at year end 2017 or 2016.

Level 3 category are financial assets measured using a valuation technique (model) based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. The Syndicate did not hold any of these at year end 2017 or 2016.

18. Related Parties

Vibe Syndicate Management Limited (Vibe SML) is a wholly-owned subsidiary of Syndicate Re A.I., a reinsurance company incorporated in Puerto Rico.

Managing agency fees of £0.8m (2016: £0.4m) were paid by the Syndicate to Vibe SML. In addition to this, expenses of £18.8m (2016: £13.4m), of which £5.1m (2016: £5.0m) relates to acquisition costs, were recharged to the syndicate from Vibe Services Management Limited.

Vibe Services Management Limited is a wholly-owned subsidiary of Syndicate Re A.I. It provides management services to Vibe SML and Syndicate 5678.

Syndicate Re, A.I.is the immediate parent company of Vibe SML and is 100% owned by Syndicate Holding Corp. (the ultimate controlling party), a company registered in Puerto Rico.

19. Funds at Lloyd's and Funds in Syndicate

(a) Funds at Lloyd's

Every member is required to hold capital at Lloyd's which is held in trust and known as Funds at Lloyd's (FAL). These funds are intended primarily to cover circumstances where syndicate assets prove insufficient to meet participating member's underwriting liabilities.

The level of FAL that Lloyd's requires a member to maintain is determined by Lloyd's based on Prudential Regulatory Authority requirements and resource criteria. FAL has regard to a number of factors including the nature and amount of risk to be underwritten by the member and the assessment of the reserving risk in respect of business that has been underwritten. Since FAL is not under the management of the Managing Agent, no amount has been shown in these financial statements by way of such capital resources. However, the managing agent is able to make a call on the member's FAL to meet liquidity requirements or to settle losses.

(b) Funds in Syndicate

During the year, the corporate member (Vibe Corporate Member Limited), with Lloyds approval, transferred total of £41.2m to the Syndicate, to be held as Funds in Syndicate (FIS), and these now fall under the management of the managing agent. These accounts, therefore, incorporate assets held and the investment return achieved on the FIS.

20. Off-balance sheet items

The Syndicate has not been party to any arrangement, which is not reflected in its balance sheet, where material risks and benefits arise for the Syndicate.

21. Risk Management

(a) Governance framework

The primary objective of the Syndicate's risk management framework is to protect the Syndicate's member from events that hinder the sustainable achievement of objectives, including failing to exploit opportunities. Management recognises the critical importance of having efficient and effective risk management systems in place.

The Managing Agent has established a risk management function and governance arrangements for the Syndicate with clear terms of reference from the board of directors to its committees. This is supplemented with a clear organisational structure with documented delegated authorities and responsibilities from the board of directors to committees and senior managers.

21. Risk Management (continued)

Governance framework (continued)

Lastly, a Syndicate risk appetite framework and associated policies which set out the risk profiles for the Syndicate, risk management, control and business conduct standards for the Syndicate's operations has been put in place. Each policy has a member of senior management charged with overseeing compliance with the policy throughout the Syndicate.

The board of directors approves the risk management policies and meets regularly to approve any commercial, regulatory and organisational requirements of such policies and associated strategy and business plans to ensure that they remain aligned. The Syndicate regularly undertakes an Own Risk and Solvency Assessment (ORSA) which is reviewed and approved by the board.

(b) Capital management objectives, policies and approach

Capital framework at Lloyd's

The Society of Lloyd's (Lloyd's) is a regulated undertaking and subject to the supervision of the Prudential Regulatory Authority (PRA) under the Financial Services and Markets Act 2000.

Within the supervisory framework, Lloyd's applies capital requirements at member level and centrally to ensure that Lloyd's complies with Solvency II capital requirements, and beyond that to meet its own financial strength, license and ratings objectives.

Although Lloyd's capital setting processes use a capital requirement set at Syndicate level as a starting point, the requirement to meet Solvency II and Lloyd's capital requirements apply at overall and member level only respectively, not at Syndicate level. Accordingly the capital requirement in respect of Vibe Syndicate 5678 is not disclosed in these financial statements.

Lloyd's capital setting process

In order to meet Lloyd's requirements, each Syndicate is required to calculate its Solvency Capital Requirement (SCR) for the prospective underwriting year. This amount must be sufficient to cover a 1 in 200 year loss, reflecting uncertainty in the ultimate run-off of underwriting liabilities (SCR 'to ultimate'). The Syndicate must also calculate its SCR at the same confidence level but reflecting uncertainty over a one year time horizon (one year SCR) for Lloyd's to use in meeting Solvency II requirements. The SCRs of each Syndicate are subject to review by Lloyd's and approval by the Lloyd's Capital and Planning Group.

A Syndicate may be comprised of one or more underwriting members of Lloyd's. Syndicate 5678 only has one underwriting member whose SCR is determined by the sum of the member's share of the Syndicate SCR 'to ultimate'. The SCR reflects the capital requirement to cover a 1 in 200 year loss 'to ultimate' for that member. Over and above this, Lloyd's applies a capital uplift to the member's capital requirement, known as the Economic Capital Assessment (ECA). The purpose of this uplift, which is a Lloyd's not a Solvency II requirement, is to meet Lloyd's financial strength, licence and ratings objectives. The capital uplift applied for 2017 was 35% of the member's SCR 'to ultimate'.

Provision of capital by members

Each member may provide capital to meet its ECA either by assets held in trust by Lloyd's specifically for that member (funds at Lloyd's), held within and managed within a Syndicate (Funds in Syndicate) or as the member's share of the member's balances on each Syndicate on which it participates.

Accordingly all of the assets less liabilities of the Syndicate, as represented in the member's balances reported on the statement of financial position on page 15, represent resources available to meet the member's and Lloyd's capital requirements.

21. Risk Management (continued)

(c) Insurance risk

The principal risk the Syndicate faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long—term claims. Therefore, the objective of the Syndicate is to ensure that sufficient reserves are available to cover these liabilities.

The Syndicate did not purchase reinsurance to cover the legacy business but inherited a mix of proportional and non-proportional reinsurance contracts. The Syndicate purchases reinsurance as part of its risks mitigation programme in respect of the live business. Reinsurance ceded is currently placed on a non–proportional basis and is primarily excess of loss reinsurance designed to mitigate the Syndicate's net exposure to catastrophe losses. Retention limits for the excess of loss reinsurance vary by product line and territory.

Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Although the Syndicate has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance agreements. The Syndicate's placement of reinsurance is diversified such that it is neither dependent on a single reinsurer nor are the operations substantially dependent upon any single reinsurance contract.

The Syndicate principally issues the following types of general insurance and reinsurance contracts: accident and health, casualty treaty, credit, surety, political risk & terror, financial institutions, North American specialty programs, property D&F and property treaty. Risks usually cover twelve months duration.

The most significant risks arise from climate changes, natural disasters and terrorist activities. For longer tail claims that take some years to settle, there is also inflation risk.

The above risk exposure is mitigated by diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is improved by careful selection and implementation of underwriting strategies, which are designed to ensure that risks are diversified in terms of type of risk and level of insured benefits. This is largely achieved through diversification across industry sectors and geography. Furthermore, strict claim review policies to assess all new and ongoing claims, regular detailed review of claims handling procedures and frequent investigation of possible fraudulent claims are all policies and procedures put in place to reduce the risk exposure of the Syndicate. The Syndicate further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the business. Inflation risk is mitigated by taking expected inflation into account when estimating insurance contract liabilities.

The Syndicate has also limited its exposure by imposing maximum claim amounts on certain contracts as well as the use of reinsurance arrangements in order to limit exposure to catastrophic events (e.g., hurricanes, earthquakes and flood damage).

The purpose of these underwriting and reinsurance strategies is to limit exposure to catastrophes based on the Syndicate's risk appetite as decided by the Board. The overall aim when calculating risk capital is currently to restrict the net impact of a 1 in 200 year aggregate loss on a region / peril basis to 10% of capital and any planned profit.

21. Risk Management (continued)

Insurance Risk (continued)

The Board may decide to increase or decrease the maximum tolerances based on market conditions and other factors.

The Syndicate uses both its own and commercially available proprietary risk management software to assess catastrophe exposure. However, there is always a risk that the assumptions and techniques used in these models are unreliable or that claims arising from an unmodelled event are greater than those arising from a modelled event.

As a further guide to the level of catastrophe exposure written by the Syndicate, the following table shows hypothetical claims arising for various realistic disaster scenarios based on the Syndicate's average risk exposures during 2017.

Average Risk Exposures during 2017

Scenario £m	Average Gross RDS	Average Net RDS
European Windstorm	15.0	3.5
Japanese Earthquake	15.8	4.0
Japanese Typhoon	6.9	2.3
Gulf Mexico Wind (Onshore)	61.4	17.8
North East Hurricane	30.3	6.7

Transport	375	40	335
Reinsurance Acceptance	44,439	9,017	35,422
Total	160,397	39,690	120,707

The table below sets out the concentration of outstanding claim liabilities by type of contract for 2016:

£000	Gross Liabilities	Reinsurance of Liabilities	Net liabilities
Accident & Health	20,034	4,409	15,625
Aviation	118	7	111
Energy – non marine	161	23	138
Fire and other property damage	1,027	150	877
Marine	532	33	499
Motor (other classes)	336	34	302
Motor (third party liability)	255	-1	256
Pecuniary loss	1,240	19	1,221
Third Party liability	54,898	12,620	42,278
Transport	302	15	287
Reinsurance Acceptance	32,968	5,632	27,336
Total	111,871	22,941	88,930

All of the business is written in the UK.

21. Risk Management (continued)

Key assumptions

The principal assumption underlying the liability estimates is that the future claims development will follow a similar pattern to past claims development experience. This includes assumptions in respect of average claim costs, claim handling costs, claim inflation factors and claim numbers for each underwriting year. Additional qualitative judgements are used to assess the extent to which past trends may not apply in the future, for example once—off occurrence, changes in market factors such as public attitude to claiming, economic conditions as well as internal factors such as portfolio mix, policy conditions and claims handling procedures. Judgement is further used to assess the extent to which external factors such as judicial decisions and government legislation affect the estimates.

Other key circumstances affecting the reliability of assumptions include variation in interest rates, delays in settlement and changes in foreign currency rates.

The claim liabilities are sensitive to the key assumptions that follow. It has not been possible to quantify the sensitivity of certain assumptions such as legislative changes or uncertainty in the estimation process.

The following analysis is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities, profit and member's balances. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis. It should be noted that movements in these assumptions are non-linear.

31 December 2017	Change in assumptions	Impact on gross liabilities	Impact on net liabilities	Impact on profit	Impact on member's balance
		£000's	£000's	£000's	£000's
Average claim cost	+ 10% severity	16,040	12,071	(12,071)	(12,071)
Average number of claims	+ 10% frequency	16,040	12,071	(12,071)	(12,071)
Average claim settlement period	6 month reduction in settlement period	(20,542)	(14,459)	45	45
31 December 2016	Change in assumptions	Impact on gross liabilities	Impact on net liabilities	Impact on profit	Impact on member's balance
		gross	net		member's
2016 Average claim cost		gross liabilities	net liabilities	profit	member's balance
2016 Average claim	assumptions	gross liabilities £000's	net liabilities £000's	profit £000's	member's balance £000's

The method used for deriving sensitivity information and significant assumptions did not change from the previous period.

21. Risk Management (continued)

Claims development table

The following tables show the estimates of cumulative incurred claims, including both claims notified and IBNR for each successive underwriting year at each reporting date, together with cumulative payments to date. The cumulative claims estimates and cumulative payments are translated to sterling at the rate of exchange that applied at the end of the underwriting year. The impact of exchange differences is shown at the bottom of the table.

The Syndicate has taken advantage of the transitional rules of FRS 103 that permit only five years of information to be disclosed upon adoption. The claims development information disclosed is being increased from five years to ten years over the period 2016–2020.

In setting claims provisions the Syndicate gives consideration to the probability and magnitude of future experience being more adverse than assumed and exercises a degree of caution in setting reserves where there is considerable uncertainty. In general, the uncertainty associated with the ultimate claims experience in an underwriting year is greatest when the underwriting year is at an early stage of development and the margin necessary to provide the necessary confidence in the provisions adequacy is relatively at its highest. As claims develop, and the ultimate cost of claims becomes more certain, the relative level of margin maintained should decrease. However, due to the uncertainty inherent in the estimation process, the actual overall claim provision may not always be in surplus.

Claims incurred during the year, net of reinsurance, include adverse prior year development of £8.7m (2016: £0.7m favourable development).

Gross insurance contract outstanding claims provision as at 31 December 2017

2017 Gross £000	2012	2013	2014	2015	2016	2017	Total

21. Risk Management (continued)

(d) Financial risk

(1) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss to the other party by failing to discharge an obligation.

The following policies and procedures are in place to mitigate the exposure to credit risk:

- A credit risk policy setting out the assessment and determination of what constitutes credit risk for the Syndicate. Compliance with the policy is monitored and exposures and breaches are reported to the Syndicate Audit and Risk Committee. The policy is regularly reviewed for pertinence and for changes in the risk environment.
- Net exposure limits are set for each counterparty or Syndicate of counterparties, geographical and industry segment (i.e., limits are set for investments and cash deposits, exposures from open positions in derivatives and minimum credit ratings for investments that may be held).
- Reinsurance is placed with counterparties that have a good credit rating and concentration of
 risk is avoided by following policy guidelines in respect of counterparties' limits and are subject to
 regular reviews. At each reporting date, management performs an assessment of
 creditworthiness of reinsurers and ascertaining suitable allowance for impairment.

The tables below show the maximum exposure to credit risk (including an analysis of financial assets exposed to credit risk) for the components of the Statement of Financial Position. The maximum exposure is shown gross, before the effect of mitigation through collateral agreements and the use of credit derivatives.

31 December 2017	Neither past due nor impaired	Past Due	Impaired	Total
	£'000	£'000	£'000	£'000

Total credit risk	137,345	4,719		142,064

Assets which are past due but not impaired have been in arrears for less than 3 months from the reporting date.

The table below provides information regarding the credit risk exposure of the Syndicate at 31 December 2017 by classifying assets according to Standard & Poor's credit ratings of the counterparties. AAA is the highest possible rating. Assets that fall outside the range of AAA to BBB are classified as speculative grade and have not been rated. Debtors, other than amounts due from reinsurers, have been excluded from the table as these are not rated.

31 December 2017	AAA	AA	Α	BBB	<bbb< th=""><th>Not rated</th><th>Total</th></bbb<>	Not rated	Total

Maximum credit exposure

It is the Syndicate's policy to maintain accurate and consistent risk ratings across its credit portfolio. This enables management to focus on the applicable risks and the comparison of credit exposures across all lines of business, geographic regions and products. The rating system is supported by a variety of financial analytics combined with processed market information to provide the main inputs for the measurement of counterparty risk. All internal risk ratings are tailored to the various categories and are derived in accordance with the Syndicate's rating policy. The attributable risk ratings are assessed and updated regularly.

During the year, no credit exposure limits were exceeded. The Syndicate actively manages its product mix to ensure that there is no significant concentration of credit risk.

(2) Liquidity risk

Liquidity risk is the risk that the Syndicate will encounter difficulty in meeting obligations associated with financial instruments. In respect of catastrophic events there is also a liquidity risk associated with the timing differences between gross cash out-flows and expected reinsurance recoveries.

The following policies and procedures are in place to mitigate the Syndicate's exposure to liquidity risk:

- A liquidity risk policy exists that sets out the assessment and determination of what constitutes liquidity risk. Compliance with the policy is monitored and exposures and breaches are reported to the Audit and Risk Committee. The policy is regularly reviewed for pertinence and for changes in the risk environment.
- Guidelines on asset allocation, portfolio limit structures and maturity profiles of assets are set, in order to ensure that sufficient funding is available to meet insurance and investment contracts obligations.
- Contingency funding plans are set to meet emergency funding in the event of a large demand on cash.

(3) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk:

- Currency risk;
- · Interest rate risk; and
- Equity price risk (there are no equity instruments in the portfolio).

The following policies and procedures are in place to mitigate the exposure to market risk:

- An investment policy exists that sets out the assessment and determination of what constitutes
 market risk for the Syndicate. Compliance with the policy is monitored and exposures and
 breaches are reported to the Audit and Risk Committee. The policy is reviewed regularly for
 pertinence and for changes in the risk environment.
- Strict control over derivative instruments (there are no derivative contracts).

21. Risk Management (continued)

(a) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Syndicate's functional currency is Sterling and its exposure to foreign exchange risk arises primarily with respect to transactions in Euro, US and Canadian dollars. The Syndicate seeks to mitigate the risk by matching the estimated foreign currency denominated liabilities with assets denominated in the same currency.

The table below summarises the exposure of the financial assets and liabilities to foreign currency exchange risk at the reporting date, as follows:

31 December 2017	GBP	USD	EUR	CAD	AUD	JPY	Total
Converted £'000 Total assets	23,386	179,778	9,083	15,763	6,119	2,570	236,699
Total liabilities	(45,888)	(172,687)	(12,516)	(9,901)	(5,910)	(1,071)	(247,973)
Net Assets	(22,502)	7,091	(3,433)	5,862	209	1,499	(11,274)
31 December 2016	GBP	USD	EUR	CAD	AUD	JPY	Total
Converted £'000							
Total assets	6,886	103,964	16,108	7,420	5,707	1,979	142,064
Total liabilities	(36,194)	(95,816)	(12,146)	(6,192)	(5,203)	(845)	(156,396)
Net Assets	(29,308)	8,148	3,962	1,228	504	1,134	(14,332)

The non-Sterling denominated net assets of the Syndicate may lead to a reported loss (depending on the mix relative to the liabilities), should Sterling strengthen against these currencies. Conversely, reported gains may arise should Sterling weaken.

The Syndicate matches its currency position so holds net assets across a number of currencies. The Syndicate takes into consideration the underlying currency of the Syndicate's required capital and invests its assets proportionately across these currencies so as to protect the solvency of the Syndicate, against variation in foreign exchange rates. As a result, the Syndicate holds a significant proportion of its assets in foreign currency investments.

Sensitivity to changes in foreign exchange rates

The table below gives an indication of the impact on profit of a percentage change in the relative strength of Sterling against the value of the US dollar, Canadian dollar and Euro simultaneously. The analysis is based on the information as at 31st December 2017.

Impact on profit and member's balances

	2017	2016
Sterling weakens	£'000	£'000
10% against other currencies	1,248	1,665
20% against other currencies	2,807	3,745
Sterling strengthens		
10% against other currencies	(1,021)	(1,362)
20% against other currencies	(1,871)	(2,497)

21. Risk Management (continued)

(b) Interest rate risk

Interest rate risk is the risk that the value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The analysis below is performed for reasonably possible movements in interest rates with all other variables held constant, showing the impact on profit and member's balances of the effects of changes in interest rates on fixed rate financial assets and liabilities.

Impact on profit and member's balances

	2017	2016
Changes in variables	£'000	£'000
+ 50 basis points on result	(568)	(256)
- 50 basis points on result	568	256

The method used for deriving sensitivity information and significant variables did not change from the previous period.
