Collection of information relating to relevant Canadian, Australian and South African
business not processed through XIS or Lloyd's Direct Reporting (LDR)**

Returns as at 31 December 2016 - Instructions

General

- 1 Syndicates must report details in respect of relevant Canadian, Australian and South African business **not** processed through XIS or LDR. This is to enable Lloyd's to recalculate the funding requirements for the Lloyd's Australia Trust Fund and the Lloyd's South African Trust Fund as at 31 December 2016.
- 2 **Forms Can16Q4, Aus16Q4 and SA16Q4 are available for download at the link shown in the heading of this bulletin. They must be submitted in spreadsheet format to enable direct upload into the reporting database.** If you have difficulty in downloading these forms, please contact Hayley Youles.
- 3 Details of the information specifically required in respect of Canadian, Australian and South African business are set out below.
- 4 The managing agent's report included with each return must be completed. Whilst the returns are not audited, they are subject to the Overseas Returns Fining Policy.
- 5 The returns should be submitted electronically via e-mail to Lloyds-MR-OverseasReporting@Lloyds.com. Please name the submitted files [SyndXXXX16Q4Cad](#), [SyndXXXX16Q4Aus](#) or [SyndXXXX16Q4SA](#) where "XXXX" is the syndicate number.

Canada

- 1 The funding requirement for the Lloyd's Canadian Trust Fund (LCTF) is due to be recalculated as at the current period end. Managing agents are reminded that it is their responsibility to ensure that the electronic packs they return to International Finance also include transactions which have **not been processed through XIS or LDR**; you must ensure that adjustments are made to add in these items to the electronic pack in addition to providing relevant data as set out below.

- 2 This process of data collection is just a formalisation of the usual data requested in previous quarters for Canadian regulated business that is **not processed through XIS or LDR**. This approach allows data to be collected from managing agents in a consistent format at a consistent point in time.
