Notification of publication

The template and associated guidance for calculation of the standard formula capital requirements as at 2019 year-end have now been published on [Lloyds.com](http://www.lloyds.com).

In order to meet regulatory reporting deadlines the submission of the standard formula calculation is required on a prospective basis. Agents should use inputs and assumptions which are consistent with the LCR return.

The structure and format of the template is broadly the same as previous years, but has been subject to some revisions following updates to the Delegated Regulations. These changes are set out in the Version History of the template and throughout the Guidance.

Deadlines for submission

All syndicates must submit a completed and appropriately signed-off version of the template by 29 November 2019. Submissions should use the naming convention described in the guidance and be made to the “MRC Syndicate Capital Setting” folder of SecureStore.
