Access instructions

Accessing Lloyd's SecureShare

SecureShare is Lloyd's secure platform for sharing files with Market Organisations.

This system is designed to be used with the latest versions of Microsoft Edge or Google Chrome only from desktops or laptops. Access from alternative browsers or devices is not supported.

SecureShare can be accessed at the following URLs:

SecureShare Hub site: <u>https://lloydsoflondon.sharepoint.com/sites/securesharehub</u>

My Access portal: <u>https://myaccess.microsoft.com/@lloydsoflondon.onmicrosoft.com</u>

Site roles and responsibilities

The screenshot below indicates the responsibilities of both Site Owners and Devolved Administrators within the SecureShare platform.

Users of SecureShare must note that the platform should not be used as a location to store files permanently but instead as a mechanism to send and receive files.

Responsibilities of Site Owner

- Making sure it is being used as a sharing platform rather than storage
- Files are being moved to a permanent location as required
- Helping your team understand how everything works
- Liaising with Group Technology as the main point of contact
- Informing Group Technology if the site is no longer required

Responsibilities of Devolved Admin

- Accept SecureShare T&Cs on behalf of organisation
- Managing access requests from users in their organisations
- Conducting regular reviews of access groups and removing people who no longer need access

Initial steps

Before you can access the SecureShare Hub, you must request access to at least one site.

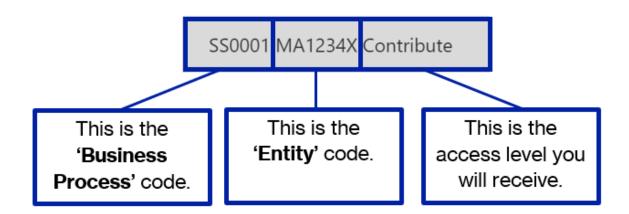

Making an access request

Please note that the following instructions are for Market users only. Lloyd's users should use a SecureShare Access Request Form on MyService to request access.

- Sign in to the My Access portal at <u>https://myaccess.microsoft.com/@lloydsoflondon.onmicrosoft.com</u> – this shows all sites you can request access to.
- 2. Scroll down the list or use the 'search packages' search bar to find a site name. Note: You can search using the business process name or your entity number.

∕ly Access ∨	🗧 Šearch packages	Name ♥ 🔎 👗 ?
C Access packages C Request history R Approvals C Access reviews	Access packages 1328 packages	
	Request access Name 1 Business Intelligence ME2082A Contribute Business Intelligence ME2082A Read Business Intelligence ME2082C Contribute Business Intelligence ME2082C Read Business Intelligence ME2082D Contribute	Description Contribute access on Business Intelligence SecureShare for Manag Read access on Business Intelligence SecureShare for Managing Ar Contribute access on Business Intelligence SecureShare for Manag Read access on Business Intelligence SecureShare for Managing Ar Contribute access on Business Intelligence SecureShare for Managing Ar

The annotation below shows how site naming conventions work within Lloyd's SecureShare.

- 3. Once you have identified the site you require in the **My Access portal**, click onto it.
- 4. You can then click the **Request access** button to open the request menu.

+	Request access			
	Name 🧅		Description	
0	SS0001 MA1235X Contribute		Contribute access on SS0001 SecureShare for Managing Agent 00; $$	
0	S50001 MA1234X Read	+	Read access on SS0001 SecureShare for Managing Agent 001 $$ $$ $$	

5. In the resulting **Request access** menu, insert the business justification and a specific period timeframe if required.

Request access	×	Request access	
SS0001 MA1234X Read Read access on SS0001 SecureShare for Managing Agent 001		SS0001 MA1234X Read Read access on SS0001 SecureShare fo Managing Agent 001 Business justification *	r
Business justification *		Example for User Guide	
Request for specific period?		Request for specific period? Yes Start date	
No	- 11	Jun 10, 2021	
	- 11	End date	
	- 11	Aug 12, 2021	ľ
Submit Cancel		Submit Cancel	

6. You then click **Submit** to complete the approval request.

- 7. The nominated devolved administrators at your organisation will be notified by email of your access request. A devolved administrator must approve your access request before you are allowed to access a SecureShare site.
- 8. Once your request has been approved, you will be notified by email.

Please Note: You can reprocess a request for up to 14 days from the time that the original request is completed. For requests that were completed more than 14 days ago, users will need to cancel and make new requests in MyAccess.

Note that emails will be sent from <u>azure-noreply@microsoft.com</u>. Please check your junk folder if you do not receive an email.

Accessing sites

1. Once access has been granted, sign in to the **SecureShare Hub site** at <u>https://lloydsoflondon.sharepoint.com/sites/securesharehub</u>

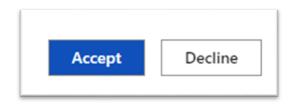

Lloyd's SecureShare	SecureShare Hub Site			
	Welcome to SecureSha SecureShare enables Lloyd's Market Please navigate to the relevant Busin 	users to securely exchange files with	lloyd's Corporation.	
	Business Intelligence	Capital Tests	Complaints Return	Cash Movement Statements
	Home is popular Business Intelligence Manag_g Agent presentation is popular	Home is popular Capital Tests Example PowerPoint is popular	(a) Home Is popular	There's no recent activity on this site.

2. Upon entering the **SecureShare Hub site** for the first time, users will be requested to accept or decline the End User Agreement for the site.

Users must fully review the End User Agreement before moving onto Step 2. *Note: The screenshot below is not indicative of the full End User Agreement.*

End user agreement Updated. Do not attempt to log-on to this system unless you are an authorised user. This is a Lloyd's owned system and all content on this system and its associated sub-systems are the sole 9 s04, identity and access standard v 1.10 Page 9 of 18 Classification: Confidential and exclusive property of Lloyd's. Use of and/or access to this system and/or any information obtained via this system is restricted to authorised users only who may only perform authorised activities and may not exceed the limits of such authorisation. All activities on this
system may be subject to monitoring, recording, logging, inspection and auditing. Disclosure of information found in this system for any unauthorised use is strictly prohibited. Unauthorised or improper use of or access to this system, or any portion of it, either directly or ndirectly, or any attempt to deny service to authorised users or to alter, damage or destroy information, or otherwise to interfere with the system or it's operation, is strictly prohibited and may result in disciplinary action up to and including dismissal without notice and/or legal action. By continuing to use this system you indicate your awareness of and consent to these terms and conditions of use you and those in Lloyd's information security policies. Log-off or disconnect now if you are not authorised or you do not agree to the conditions stated in this warning.

3. Once the full End User Agreement has been reviewed, users choose whether to **Accept** or **Deny** the End User Agreement using the buttons at the bottom of the page.

4. Once accepted, you can begin using SecureShare. Please read the following sections for more information on how to use the various features of SecureShare.

Essential site functionality

Navigating SecureShare

- 1. Sign in to the **SecureShare Hub site** at <u>https://lloydsoflondon.sharepoint.com/sites/securesharehub</u>
- Once you have logged in, the SecureShare Hub site shows all of Your Sites and your Recent documents, as shown below. The sites shown under Your Sites will be those you most frequently visit. To see all the sites you have access to, select See all.

eShare Hub Site			
SecureShare enables Lloyd's Market	users to securely exchange files with L	oyd's Corporation.	
Your Sites	*	*	See al

Using the Recycle Bin

The Recycle bin is a temporary location where files are sent after being deleted.

1. To delete an item, select the document and either press **Delete** on the top toolbar or click on the show actions ellipses to open up the drop down menu and select **Delete**.

Lloyd's SecureShare	Business Intelligence
Home	🗄 Edit in grid view 🧧 Open 🗸 🖻 Share 🐵 Copy link 🞍 Download 📋 Delete 🕫 Rename 🌮 Automate 🗸 🗈 Move to 🗋 Copy to \cdots

Managing Agent 01	Preview Share
Managing Agent 02	Copy link
Managing Agent 03	Manage access
Managing Agent 04	Download
Managing Agent 19	Delete

2. Once the document is deleted, I click **Recycle Bin** on the left-hand menu.

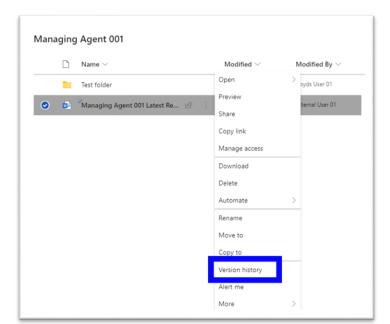

3. Once inside the Recycle Bin, you can see any documents or files that have recently been deleted for the Business Process site you are part of.

If required, you can click **Restore** to restore the document back into the original library, or you can click **Delete** to permanently delete the file. This can be done by selecting the document and selecting the option from the top toolbar or the select actions drop down.

Using version control

1. When using and modifying files, you may occasionally wish to view a file's previous version or revert it to this point.

To do so, right click on a file and then click on Version History.

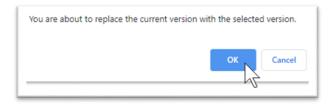

2. You will then see a view of all previous versions. To view a previous version, click onto the document link.

Version history			
Delete All Versions			
No. 4 Modified	Modified By	Size	Comments

1.0 26	View
	Restore
	Delete

4. Click **Ok** to enact the change.

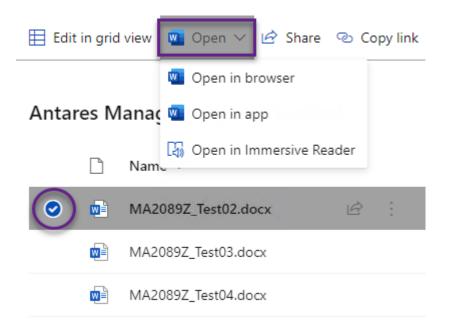

Opening desktop application versions of documents

1. When a document is opened in SecureShare, you will access it within the online version of the application – in the case of the screenshot below, Word Online.

2. If you have the desktop version of Office 365 installed, you can also open directly in the application.

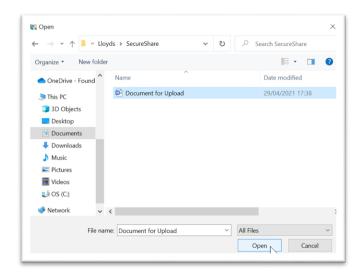

Uploading and downloading documents

Uploading documents

- 1. Navigate into a Site and Library you have access to Note: You must have requested **Contribute** access for this site.
- 2. Click the **Upload** button on the bar at the top of this site and then choose either **Files** or '**Folder**.

Lloyd's SecureShare	Business Intelligence

3. Click **Ok** when prompted.

The Bulk Upload Process

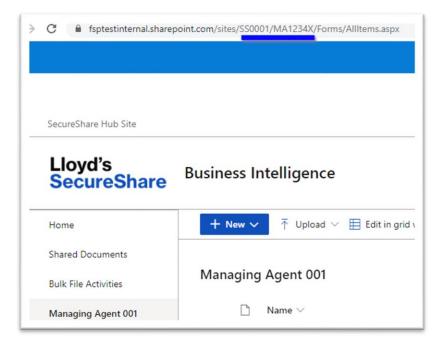

Please note that Bulk Operations processes are restricted to Lloyd's users only.

Uploading files to multiple libraries

1. Navigate into a SecureShare you already have access to.

2. Click on the Bulk File Activities link to launch the Bulk Activities tools

3. Take a note of the Site Code of your site

In this example SS0001 is the site code this site

→ C	point.com/sites/SS0001/MA1234X/Forms/AllItems.aspx
SecureShare Hub Site	
Lloyd's SecureShare	Business Intelligence
Home	+ New V T Upload V 🖽 Edit in grid v
Shared Documents	
Bulk File Activities	Managing Agent 001
Managing Agent 001	🗋 Name 🗠

4. Navigate into the SecureShare staging location link or mapped drive provided by Group Technology.

Within this area you will see a Download and an Upload folder.

Within the Upload folder there will be a folder matching the site code for your site.

This is the folder where you need to place files for uploading.

	> Download > SS0001		
Name	Date modified	Туре	Size
MA1234X Considerations	26/05/2021 10:02	Microsoft Word Document	19 K
MA1234X Report	26/05/2021 10:02	Microsoft Word Document	17 K
MA1234X_Latest Trends	26/05/2021 10:02	Microsoft Word Document	18 K
Logs	26/05/2021 10:02	File folder	

5. Prepare your files so that any Syndicate or Managing Agent specific files have the entity code appended at the start of the filename.

In this example this file will be uploaded to the Managing Agent MA1234X library. The Entity code can be seen in the library URL or from the Market Entity

MA1234X_Latest Trends	20/05/2021 07:53	Microsoft Word Document	13 KB

Database (MED).

6. Once your files are correctly named, return to the Bulk Upload screen. Refresh your browser to ensure your session has not timed out (ctrl + f5)

7. Select the source folder that you will be uploading from. This corresponds to the folder in the staging location you have placed your files into.

Pattern Match	One to Many		
Source Folder:			
	/Upload	'SS0001	

8. Once you have selected a Source Folder, you can apply a filter to select only specific filetypes will be uploaded. The default option is blank which will upload all filetypes

ile Type:	
docx	~
any	
pdf	
docx	dhu
xlsx	
pptx	
zip	
jpg	
gif	
png	
other	

- 9. The following options are also available:
 - **Include subfolders** this will also upload files contained within subfolders within the upload folder
 - Overwrite existing files this will replace existing files
 - Create a summary file file this will create a log file of files uploaded within a folder called logs
 - Email summary on completion this emails a log of files uploaded to you

10. Click the **Test** button to validate your setting. The test shows whether documents are found. If successful, the final **Upload** button appears in blue. Click on this to complete the process.

Please note uploading large volume of files can take a long time, please be patient and wait for the messages on the bulk upload screen to confirm the upload was successful.

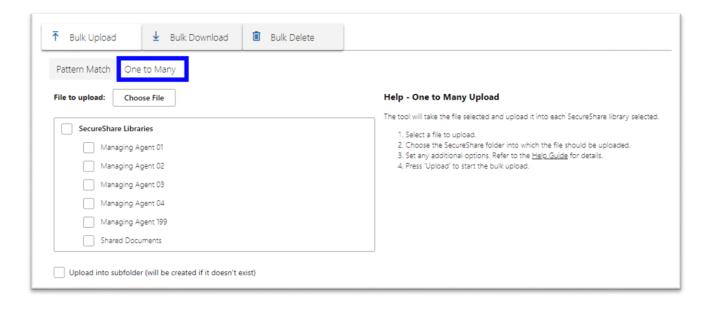

Test	Upload
Notification	s
Following files MA1234X_Lat	s that match the criteria (Test Mode ON) s match the criteria and will be uploaded: est Trends.docx y completed (TEST mode ON)!

Please note that at any time, the **Cancel Process** button on the right-hand side can be used to cancel the process being undertaken.

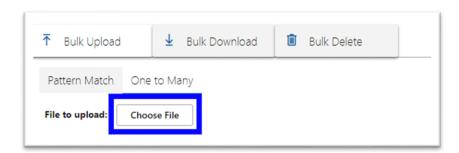

Cancel Process	
<u>Clear All</u>	

Completing 'One to Many' upload

- 1. Start within the Business Process site you wish to complete an upload for.
- 2. Enter Bulk File Activities using the options on the left before clicking **Bulk Upload**.
- 3. Once in the **Bulk Upload** section, click on the **One to Many** option highlighted in the screenshot below.

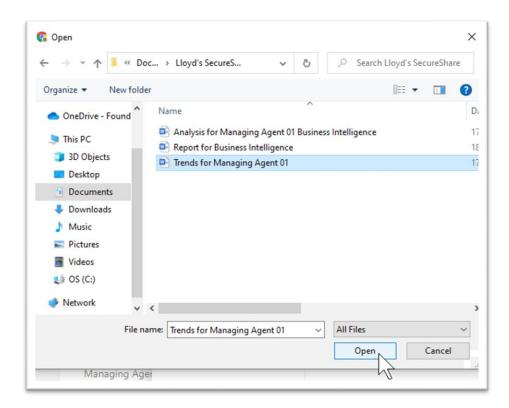

4. In the One to Many section, click on the Choose File button.

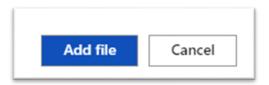

5. In the resulting screen, click **Choose file.**

	Upload file
므 Upload	Choose file

6. Select the appropriate file within File Explorer and click **Open**.

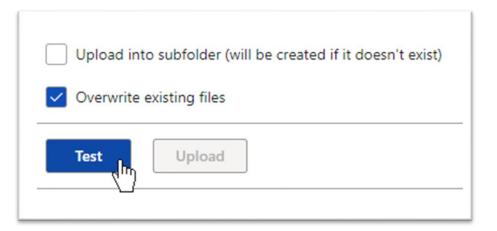

7. Once the file is selected, click **Add file** in the following screen.

8. Next, click on the libraries you wish to upload the one file to. In the case of the below, Managing Agent 01, Managing Agent 02 and Managing Agent 03 are chosen.

Secure	Share Libraries	
\checkmark	Managing Agent 01	
\checkmark	Managing Agent 02	
\checkmark	Managing Agent 03	
	Managing Agent 04	
	Managing Agent 199	
	Shared Documents	

 Once the libraries are selected, toggle the settings you require below – subfolders can be created within the entities, whilst any duplicate files can be overwritten if required (selected in this case). Once settings are confirmed, click **Test**.

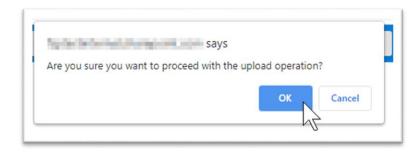

10. If the test process is successful, the **Upload** button appears in blue. Click on this.

Note: the **cancel process** button is available on the right at any time.

Test Upload	Cancel Process
Notifications fou must select a file to upload!	<u>Clear All</u>
Testing bulk upload (one to many) Jpload activity completed (TEST mode ON)!	

11. Click **OK** when prompted.

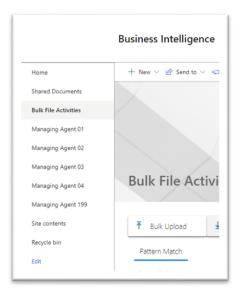

12. The **One to Many** upload process will now have completed, with multiple versions of the same file uploaded to SecureShare libraries.

The Bulk Download Process

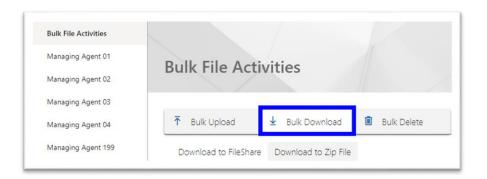

Please note that Bulk Operations processes are restricted to Lloyd's users only.

Downloading from multiple libraries

1. Navigate into a SecureShare site you have already been granted access to.

- 11. Click on Bulk File Activities to launch Bulk Activities tool.
- 12. Click on the **Bulk Download** tab.

13. The next option is to choose the **Source Folders**.

These are the document libraries you will be downloading from. It is recommended to keep the number of libraries you download from to a minimum to prevent overloading the network (as these requests are sent over the internet to an external network).

Downloading from all libraries can take a long time depending on the number of files.

vurce Folders: SecureShare Libraries	~

Managing Agent 03	
Managing Agent 04	
Managing Agent 19	
Shared Documents	-

14. The next section gives you the option to include a **File Pattern**. This allows you to only search for certain documents to be downloaded.

File pattern instructions:

Asterisk (*) acts as a wildcard – if you want to search for files starting with certain text, include this before the asterisk.

Example – *MA1234X** searches for any file names starting with MA1234X.

If you want to search for files ending with certain text, include this after the asterisk.

Example – **MA1234X.docx* searches for any file names ending with MA1234X.docx.

If you want to search for files containing certain text, include this between asterisks.

Example – *MA1234X* searches for any file names containing MA1234X.

- 15. Once **File Pattern** has been entered (if required), a specific **File Type** can then be chosen from the drop-down list. If none is selected it will download all filetypes.
 - *ile Type:

 docx

 any

 pdf

 docx

 xlsx

 pptx

 zip

 jpg

 gif

 png

 other
- 16. You can also include **Start Date** and **End Date**. This filters the download so it will only download files modified within a certain time period.

											111
Ma	iy 20	21			\uparrow	\downarrow	2021			$\land \downarrow$	
М	Т	W	Т	F	S	S	Jan	Feb	Mar	Apr	
26	27	28	29	30	1	2					
3	4	5	б	7	8	9	May	Jun	Jul	Aug	
10	11	12	13	14	15	16					
17	18	19	20	21	22	23	Sep	Oct	Nov	Dec	
24	25	26	27	28	29	30					
31	1	2	3	4	5	б			Go to	today	

17. You will then be given the option to select the **Target Folder**. Click the target folder where files will be downloaded into – in this case, we will choose the folder corresponding to the site code (e.g.: SS0001). You can find the site code for your site by simply looking at the URL:

In this example SS0001 is the site code for the Business Intelligence site

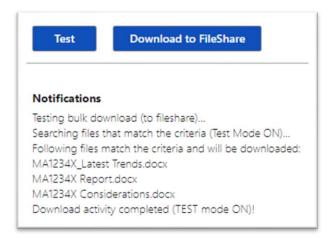

18. You can also select additional settings in this section if required.

Create folder for each Entity Library in target creates a separate folder for each Entity library, whilst **Overwrite files in download folder** will overwrite any files in the download folder that are duplicates.

This is the default setting and it is recommended you leave this on. **Create summary log file in 'logs' folder** creates a summary log within the SS0001 FileShare folder, whilst **Email summary on completion** will send a summary to your email address.

Target Folder:	Create folder for each Entity Library in target
VDownload/SS0001	Use 'Title' instead of 'Entity ID' for folder
	Verwrite files in download folder
Email summary on completion	Create summary log file in 'logs' folder

 Once you are ready, click the blue **Test** button. If the test is successful and files are identified for download, click **Download to FileShare** then **Ok** to complete the process.

- 20. Note that at any time, the **Cancel Process** button on the right-hand side can be used to cancel the current process being undertaken.
- 21. You can get to your downloaded files by navigating to the SecureShare fileshare, link provided by Group Technology.

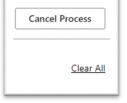

If you do not have access to this fileshare please log a ticket through MyService for access to the SecureShare staging location.

Within this area you will see a Download and an Upload folder.

Within the Download folder there will be a folder matching the site code for your site.

Within the site folder you can find downloaded files.

	> Download > SS0001		
Name	Date modified	Туре	Size
MA1234X Considerations	26/05/2021 10:02	Microsoft Word Document	19 KI
MA1234X Report	26/05/2021 10:02	Microsoft Word Document	17 K
MA1234X_Latest Trends	26/05/2021 10:02	Microsoft Word Document	18 KI
Logs	26/05/2021 10:02	File folder	

Best practice for bulk downloads

Before downloading files ensure the staging location is empty of existing files, you may see issues if you fail to do this.

Advise your contacts at Managing Agents to append MA codes or Syndicate codes in front of the filenames they upload. This ensure the filenames are unique and will not be overwritten.

Downloading large volumes of files can take a very long time and can overload the network. It is better to download smaller numbers of files and then delete files from SecureShare. Alternatively use the filters to only download what you need.

Once the files are downloaded please ensure you copy them into your normal working fileshare or SharePoint team site.

Do not leave files in the staging area, it is your responsibility to copy them into your working fileshare or team site.

Once files are downloaded from SecureShare delete the original files from your site! It is considered a breach of security policy to leave confidential files on external facing sites longer than required.

The Bulk Delete Process

Please note that Bulk Operations processes are restricted to Lloyd's users only.

Deleting files from all libraries

You can use the Bulk Delete process to delete all files easily and conveniently from your SecureShare site once they have been downloaded.

- 1. Navigate into an existing SecureShare site you have access to.
- 2. Click on **Bulk File Activities** from the left hand navigation and click on the **Bulk Delete** button.

Home	+ New 🗸 🖻 Send to 🗸 🖘 Promote 🛞 Page details 🖾 Analytics
Shared Documents	
Bulk File Activities	
Managing Agent 001	
Managing Agent 002	
Managing Agent 01	
Managing Agent 02	Bulk File Activities
Managing Agent 03	
Managing Agent 04	T Bulk Upload

3. Underneath **Source Folders**, select the libraries you wish to delete from. Check the "SecureShare libraries" to select all libraries

Pattern Match	
SecureShare Libraries	A
Managing Agent 001	
Managing Agent 002	
Managing Agent 01	
Managing Agent 02	
Managing Agent 03

Managing Agent 19	
Shared Documents	•

Optionally input a File Pattern to only delete certain files if required.

File pattern instructions:

Asterisk (*) acts as a wildcard – if you want to search for certain text only, include this before the asterisk and the .file type.

Example – *MA1234X*.docx* searches for any file names starting with MA1234X in a .docx format.

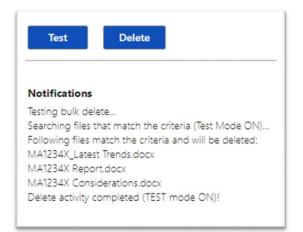

4. In the adjacent **File Type** drop-down menu, you are given the option as to which file types to delete. In this case you will only delete .docx documents, so click onto docx.

File Type:	
docx 🗸	
any	
pdf	L
docx	
×ls×	L
pptx	
zip	L
jpg	L
gif	L
png	
other	

5. Once **File Type** is selected, you can also include **Start Date** and **End Date**. These narrow down the search to files modified within a certain time period.

Ma	ay 20	21			\uparrow	\downarrow	2021			$\uparrow \downarrow$			
М	Т	W	Т	F	S	S	Jan	Feb	Mar	Apr			
26	27	28	29	30	1	2							
3	4	5	б	7	8	9	May	Jun	Jul	Aug			
10	11	12	13	14	15	16							
17	18	19	20	21	22	23	Sep	Oct	Nov	Dec			
24	25	26	27	28	29	30							
31	1	2	3	4	5	6			Go t	o today			

6. Once the settings are confirmed, click the blue **Test** button. If the test is successful, click **Delete** in blue then **Ok** when prompted to carry out the bulk delete operation.

7. Once the **Bulk Delete** operation completes, all the selected files will have been deleted

Retention Policy

Based on Lloyd's data retention policy documents can only be held within SecureShare for 40 days. Documents will be automatically deleted from your SecureShare areas after 40 days from the date the document was uploaded (created). Please ensure any documents you need to retain are downloaded within this timeframe.
