\$3bn

Annual multinational premium

50+

Distinct insurers

180+

Classes of Business

Simplified programme structures

Today Lloyd's licences offer a unique advantage; for 80 territories globally Lloyd's can write insurance business cross border from London on a single policy, reducing the need for local policies (exceptions apply for Europe and China)

Dedicated Lloyd's team & Global Network

Our team are on hand to provide expert knowledge on placement of global programmes at Lloyd's.

In addition, Lloyd's global network covers 100+ territories with in-country specialist knowledge, providing tax, regulatory and compliance guidance for all market participants.

Local summary of cover

Our unique licencing platform reduces the need for local policies in **80** territories where we have a direct licence. We are developing a service to provide local summary of cover for these territories.

This is not required for regulatory purposes but may be desirable for commercial reasons.

One stop shop for regulatory tools

Risk Locator Tool, Crystal and Stamp Decision Tool functionality will be consolidated into one application, providing a more seamless user experience.

Crystal+ will include additional features such as enhanced pre-quote tax services and API capabilities.

Local partner network

We'll leverage our reinsurance capabilities and partner with local insurers in key markets to support direct policy placements.

This initiative will be piloted in the UAE before being rolled out to additional markets.

Unrivalled claims capability & market shared services

Our network of Lloyd's third-party administrators provide claims services in-country, with flexible claims solutions that can be made in local currency.

Velonetic services facilitate payment of premium and claims while Lloyd's simplifies subscription business by filing tax returns and making payments to local authorities on behalf of the market

Simple. Compliant. Global.
