

# Summary of Coverage

Feedback from the market is that local customers would still like to receive documentation to demonstrate coverage in their local jurisdictions.

To satisfy this requirement, without compromising the flexibility that our license solution provides, Lloyd's are now launching a Local Summary of Coverage service at no additional cost.

A local 'summary of coverage' document, detailing basic policy information specific to that territory, will reassure clients of their coverage and help satisfy their local operating requirements, promoting the adoption of more multinational programmes within the Lloyd's market.

The service is available in all territories where Lloyd's hold a direct licence. For more details, click on the following link: [Our Licences](#)
