It is currently mandatory in DCOM to populate 3.1, 3.2, 3.3 & 3.4. Provided the MAs on the contract are comfortable with this, individuals can be named at managerial level ie. not *all* individuals must be listed. We have received a number of points of feedback on the notifications received by coverholders as a result of being named here. There is a data privacy need to notify anyone whose data we store in DCOM, but we have addressed concerns this by including the following in Release 1.3:

1. Updating the logic, so that a Privacy Notice is only sent *once* to an email address
2. Improved the wording of the notification, making it easier to understand for someone not familiar with DCOM

In addition, as part of Release 1.4 scope, we are making 3.2, 3.3 & 3.4 non-mandatory in DCOM ie only the individual(s) with overall responsibility for the binding authority (those named in sub-section 3.1) must be named. A list of the persons who would otherwise be named in sections 3.2, 3.3 and 3.4 and any remote workers should be separately maintained on ATLAS. 'Remote worker application forms' do not need to be completed in respect of coverholder staff who are now working from home (unless that location is now a new trading location for the coverholder). For more information, please see the links below.

This is subject to the managing agent being comfortable with this approach.

Regulatory Client Classification \*

|

- Individual/Personal
- Commercial-micro-enterprise
- Commercial-Small
- Commercial-Large risk
- Master Policy/Group Scheme
- Commercial-Other
- Reinsurance

### Definitions for drop down options:

**Individual/Personal:** Natural person acting for purposes outside their trade, business or profession.

**Commercial – Micro-enterprise:** A micro-enterprise which employs fewer than 10 persons and has a turnover or annual balance sheet that does not exceed EUR 2 million (or its equivalent in any other currency).

**Commercial – Small:** A small business which is not a micro-enterprise and has an annual turnover of less than GBP 6.5 million (or its equivalent in any other currency) and either (i) employs fewer than 50 persons; or (ii) has a balance sheet total of less than GBP 5 million (or its equivalent in any other currency).

**Commercial – Large risk:** A contract insuring:

1. Railway rolling stock, aircraft, ships (sea, lake, river and canal vessels), goods in transit, aircraft liability or liability of ships (sea, lake, river and canal vessels).
2. Credit and suretyship, where the policyholder is engaged professionally in an industrial or commercial activity or in one of the liberal professions and the risk relates to such activity.
3. Land vehicles (other than railway rolling stock), fire and natural forces, other than damage to property, motor vehicle liability, general liability and miscellaneous financial loss, insofar as the policyholder exceeds the limits of at least two of the following three criteria:
  1. Balance sheet total: EUR 6.2 million (or its equivalent in any other currency)
  2. Net turnover : EUR 12.8 million (or its equivalent in any other currency)
  3. Average number of employees during the financial year: 250.

*[Note: “Large Risk” is an official term used in EEA insurance regulation. The formal definition of “Large Risks” is found in the EU’s 2nd Non-Life Insurance Directive (88/357). A “Mass risk” is anything that is not a “Large Risk”]*

**Master Policy/Group Scheme:** A policy sold to a master policyholder (consumer, commercial or large risk) for the benefit of others in relation to their common employment, occupation, or activity.

**Commercial – Other:** All commercial business that is not micro-enterprise, small or large risk.

**Reinsurance:** Reinsurance worldwide.

# Risk Location & Insured Domicile

## Territorial Limitations

The screenshot displays the 'Territorial Limitations' section of the Lloyd's Risk Locator Tool. It is divided into three sub-sections, each with a search bar and a table for 'Region/Country/Division'.

- Risk Location:** Search bar with 'Worldwide' and 'excluding' options. The table is currently empty, showing 'No items'.
- Insured Domicile:** Search bar with 'Worldwide' and 'excluding' options. The table is currently empty, showing 'No items'.
- Territorial Limits:** Search bar with 'Worldwide' and 'excluding' options. The table is currently empty, showing 'No items'.

## What is a risk location?

Risk location(s) determine the territory or territories whose laws, regulations and tax rules apply to an insurance contract. The Risk Locator Tool (RLT) was built for Lloyd's market participants and houses thousands of risk location rules and triggers with the aim to assist in determining risk location(s). The general principles set out in the RLT and guidance provided on this page should be used in conjunction with country specific information on Crystal.

<https://www.lloyds.com/news-and-insights/market-communications/regulatory-communications/news-articles/resources-for-determining-risk-location>

<https://www.lloyds.com/conducting-business/risk-locator>

Where Reinsurance is selected in the COB accordion and the Risk Location and/or Insured Domicile fields have 'worldwide' / 'worldwide excluding...' listed as territories:

- Please enter *all* relevant territories to DCOM ie. if Worldwide is required, select all individual countries / regions
- If you encounter a validation error message in DCOM regarding one or more of these territories, but you believe the relevant permissions are in ATLAS & Crystal, a support request to the Market Support Centre Portal should be raised
- This request should either come directly from a contract lead managing agent, or evidence that it has come from a contract lead managing agent, if submitted by the broker
- Example text: “[Name of contract lead managing agent] confirm we have checked ATLAS & Crystal and confirm the relevant permissions to underwrite reinsurance in these territories are in place”
- The Lloyd’s team will then override the validation

# Gross Premium Income Limit

## Gross Premium Income Limit

▼ Gross Premium Income Limit Individual section

**Gross premium income limit\***  e.g. 0.00

Notifiable percentage of the limit not to exceed\*  %

▼ Period Of Insurances Bound Individual section

Period of insurances bound\*  month(s)

Maximum period of insurances bound\*  month(s) including odd time

Maximum advance period for inception dates\*  day(s)

▼ Commissions Individual section

The coverholder commission\*  %

Will there be a profit commission?  Yes  No

Maximum fees that may be charged in addition to premium\*  e.g. 0.00 or  %

Maximum fees that may be deducted from premium in addition to commissions\*  e.g. 0.00 or  %

Description of fees  Max. 2000 characters

Maximum value of any other acquisition costs that may be deducted from premium or charged in addition to premium\*

This field is currently at section level only on DCOM. This is the figure that will be shown under subsection 12.1 on the schedule of the binding authority. If this is only set out at contract level on the binding authority, then you will need to split these evenly between the sections on DCOM.

# Will policies be issued to eligible complainants under this contract?

## Claims and Complaints

Claims and Complaints
Individual section

All Delegated Claims Administrators added on this section will be able to see claims and each other's data for this section in Delegated Data Manager. If you want to avoid this, then please add Delegated Claims Administrators on separate sections.

Participant \*

**Who is responsible for the following roles in relation to Risks Written**

	Party *	Participant *
Submission	<input type="text" value="Coverholder"/>	<input type="text" value="Islands Agronomy Branch 321216QIH"/>
Transformation	<input type="text" value="Underwriters"/>	<input type="text" value=""/>
Assignment	<input type="text" value="Underwriters"/>	<input type="text" value=""/>

These fields should be populated as they appear on your binder slips.

### Pre-release 1.4...

These fields drive the following fields:

- Maximum number of days for reporting/submission of risks written bordereau(x)
- Who is responsible for the following roles in relation to [bdx type] / [party] [participant] (roles questions)

If 'Not Applicable' is selected for the '[bdx type] Reporting Interval' questions, these fields are hidden. If 'Monthly'/'Quarterly' are selected, they must be populated. As planned scope in a future release, we are making it possible to de-couple the *roles questions* further for non DDM users (see next slide)

Approval	Underwriters <span style="float: right;">▼</span>	2332 2332 <span style="float: right;">▼</span>

### Pre Release 1.4

For users not using DDM, there is currently no option to add 'Not processing bordereaux in DDM' here, and the fields are mandatory/conditionally mandatory. We are working on a solution to address this. In the meantime:

- for Contract Administrator, please select the Broker
- for breach management, please select any value
- for roles questions, please select any value

N.B. This data will not be used for any downstream purposes or be checked by DXC, but it is required to pass DCOM data validations at present

### Post Release 1.4

As planned scope, we will add an option to state: 'Not processing bordereaux in DDM'. This will mean the following DDM fields do not need to be populated with 'false' data:

1. Contract Administrator [Party] [Participant]
2. Breach management
3. Roles questions

In addition, we will be removing the *Who is responsible for the following roles in relation to Aggregates [party] [participant]* fields for all users, as these are not required by DDM or DCOM

When should 'Not processing bordereaux in DDM' be selected?

- For this option to be selected, the DCOM contract creator must have confirmed that NONE of the participants (lead and follow) on all sections wish to use DDM for this contract
- This excludes LBS business, where DDM is mandatory

# Signed Line (%)

## Capacity Details

Capacity Details

### Without Disproportionate Signing

"In the event that the written lines hereon exceed 100% of the order, any lines written "to stand" will be allocated in full and all other lines will be signed down in equal proportions so that the aggregate signed lines are equal to 100% of the order without further agreement of any of the (Re)insurers.

However:

- (a) in the event that the placement of the order is not completed by the commencement date of the period of the Binding Authority then all lines written by that date will be signed in full;
- (b) the signed lines resulting from the application of the above provisions can be varied, before or after the commencement date of the period of the Binding Authority, by the documented agreement of the Coverholder and all (Re)insurers whose lines are to be varied. The variation to the Binding Authority will take effect only when all such (Re)insurers have agreed, with the resulting variation in signed lines commencing from the date set out in that agreement."

### With Disproportionate Signing

"In the event that the written lines hereon exceed 100% of the order, any lines written "to stand" will be allocated in full and all other lines will be signed down in equal proportions so that the aggregate signed lines are equal to 100% of the order without further agreement of any of the (Re)insurers.

However:

- (a) in the event that the placement of the order is not completed by the commencement date of the period of the Binding Authority then all lines written by that date will be signed in full;
- (b) the Coverholder may elect for the disproportionate signing of (Re)insurers' lines, without further specific agreement of (Re)insurers, providing that any such variation is made prior to the commencement date of the period of the Binding Authority, and that lines written "to stand" may not be varied without the documented agreement of those (Re)insurers;
- (c) the signed lines resulting from the application of the above provisions can be varied, before or after the commencement date of the period of the Binding Authority, by the documented agreement of the Coverholder and all (Re)insurers whose lines are to be varied. The variation to the Binding Authority will take effect only when all such (Re)insurers have agreed, with the resulting variation in signed lines commencing from the date set out in that agreement."

The 'With Disproportionate Signing' provision is intended for use where all insurers participate. Where insurers may not participate in every declaration, a suitable provision must be included setting out the mechanism by which insurers permit the security to be varied.

Product risk rating \*

Route of business

The product risk rating is something that is produced by the managing agent as part of their own internal product review. This will therefore need to be requested from managing agent(s) to be able to complete this field.

If capacity providers on a section give different PRRs, go with the lead's rating. If there are multiple section leads and they don't give the same PRR, go with the highest rating provided.

**Route of business**

This **non mandatory** question is being removed from the UI as part of R1.4. 'Route to Business' was an old question on BAR which was carried over to DCOM to allow for data migration. It relates to master and sub contracts. If someone answered this question on BAR with 'direct to underwriter' this would mean that there were not other sub-coverholders. However, if they answered 'via coverholder' this would mean that there was a master coverholder in the chain and this was the sub coverholder. Given that we already have questions in DCOM regarding master binders and sub-contracts we no longer require this for new contracts and renewals
