

## Cohort 12 Pitch Day Teams

**AstroTeq.ai**  
Earthquake Forecast System

[Astroteq.ai](#) transforms earthquake predictions and readiness with its AI-driven earthquake forecasting system, designed to provide forecasting horizons of up to 14 days rather than mere seconds.

[Authentic.Art](#) services the art & collectibles market. They address this market by streamlining the collection, processing and exchange of data and insights through its platform iamart, which connects insurers, brokers, appraisers and collectors, enabling the delivery of faster service and better risk underwriting.

**bendi**

[Bendi](#) maps connections in supply chains to reduce the risk of human rights, environmental and governance risks. Through 24/7 supplier risk screening, their software maps millions of data points - from news and legal cases to social media.

 Carbon Glance

[Carbon Glance](#) provides a Carbon Pricing Platform designed to help companies streamline their EU CBAM reporting and quantify the financial risk from carbon border adjustments and other carbon pricing instruments.

**Cat** *x*

[CatX](#) bridges the gap between alternative capital and insurance risk. Their technology helps insurers reduce their cost of capital, brokers improve their client experiences and investors unlock uncorrelated investment opportunities.

 Claims Carbon

[Claims Carbon](#) is decarbonising insurance by enabling carbon conscious underwriting and claims settlement for insurers. With their software, insurance companies can ensure CSRD compliance and embark on the journey toward net-zero insurance products.

 **ControlSight**

ControlSight changes the way cyber insurance products are conceived, sold and underwritten, by enhancing the entire cyber value chain. Their platform provides a novel approach to cyber underwriting: leveraging continuous inside-out cyber risk analysis combined with real-time cybercrime monitoring.

[CoverYourAI](#) helps enterprise teams leverage AI through their dynamically-priced, parametric product protection plan embedded at the checkout. They close the AI adoption gap by making AI risk transferable so that coverholders can achieve more with AI.

**DRAVE**  
UNDERWRITING

[DRAVE](#) offers a new opportunity for drone insurance. Drones are now being used for the transportation of goods and people and DRAVE is working on insuring in this complex space.

 **EcoClaim**<sup>®</sup>  
Training | Software | Exchange

[EcoClaim](#) is an end-to-end solution that insurers use to measure, verify, and reduce operational emissions throughout their supply chain. EcoClaim prioritises reduction of operational emissions including Scope 3 emissions in the downstream supply chain.

  
**GIGAFORCE**

[Gigaforce](#) is dedicated to lowering loss ratios for the Property and Casualty insurance industry. They have reimagined the subrogation and associated business areas landscape with their end-to-end technology, which provides a vision of open, straight-through processing of claims.

[Latú](#)'s goal is to boost resilience in Latin America, helping businesses thrive by addressing the insurance gap through AI-driven underwriting and risk management techniques, proprietary cyber software and modelling, and a full carrier system built on WhatsApp.

[Maximum Information](#) is committed to increasing societal resilience to disasters through evolving risk modelling of natural hazards. Key to their vision is proving the value that catastrophe models have in forming real-world views of risk and empowering end-users to make confident decisions.

Mitiga

[Mitiga](#) is a science-based climate risk intelligence company. They specialise in assisting businesses in analysing, reporting, and taking action on their exposure to climate risk.

[MyCena](#) is a cyber-insurtech solution with a password-less identity-less technology that eliminates 95% of cyber breaches, stops supply-chain attacks, and prevents ransomware. Its patented technology enables companies to generate and distribute encrypted passwords for all systems, helping insurers improve loss ratios and sell more cyber-insurance policies.

[OpenCover](#) protects the growing number of businesses transacting on blockchain networks against technical, economic, and cybersecurity risks. OpenCover's real-time blockchain transaction cover, recreates the safety net businesses rely on when transacting on traditional rails.

[Pascal Metrics](#) is a data analytics company enabling clients across all healthcare sectors to improve patient safety, reduce risk, and maximise business performance. Their Virtual Patient Safety (VPS) solution enables insurers in the medical professional liability (MPL) domain.

[SAMP Risk](#) is helping insurers with power machine breakdown insurance by providing insights that reduce failures in power assets and improve insurer loss ratios. SAMP Risk has commenced its journey to establish a MGA shaped by these insights.

[SHINC](#) leverage parametric insurance and deep domain expertise in the commodity and maritime markets to transform the demurrage claims process and provide risk management tools not available in the market to date.

[Sixfold](#) is an AI solution purpose-built for insurance underwriting. Sixfold reduces manual workload for underwriters which helps make underwriting decisions with improved accuracy, transparency, and capacity.

[Vistre](#) is a software platform for MGA's to manage and distribute their insurance products. Vistre Guided Underwriting uses AI to improve efficiencies within day-to-day MGA risk management activities and to streamline the quote to bind process.

[ZeroEyes](#) is a proactive, AI powered, and human verified visual gun detection platform that provides situational awareness and integrates into existing digital security cameras to stop mass shootings and gun-related violence.
