Report of the Managing Agent

The Directors of Arch Managing Agency Limited (“AMAL”), “(the Managing Agent)” present their annual report and financial statements of managed Syndicate 2012 (the “Syndicate”) for the year ended 31 December 2021.

The Syndicate is a wholly aligned Syndicate, with underwriting capacity being provided by sole participant Arch Syndicate Investments Ltd.

Principal Activities

Syndicate 2012 currently underwrites Casualty, Directors and Officers Liability, Marine, Onshore and Offshore Energy, Professional Lines, Property, Personal Accident and Private Medical Insurance, Reinsurance, Terrorism, Fire & Other Damage, Third Party Liability, Cyber, Healthcare, Warranty & Special Affinity, and Aviation. The business is classified into underwriting units comprising: Accident and Health, Marine, Fire & Other Damage to Property, Third Party Liability, Energy Non Marine and Aviation.

Ownership

As at 31 December 2021, the Syndicate was managed by AMAL and the ultimate parent company is Arch Capital Group Ltd (“ACGL”), a Bermuda-based company. ACGL operates in Bermuda, the United States of America, Europe, Canada, and Australia. ACGL is listed on the Nasdaq Stock Market and its registered address is Waterloo House, Ground Floor, 100 Pitts Bay Road, Pembroke HM 08, Bermuda.

Directors

The Directors of the Managing Agent who held office during the year were as follows:

S. Bashford	Chief Underwriting Officer	
N. Denniston	Independent Non-Executive Director and Chairman	
K. Felisky	Independent Non-Executive Director	(appointed 09.06.2021)
M. Hammer-Dahinden	Group Non-Executive Director	
J. Kittinger	Chief Financial Officer	
P. Leoni	Chief Underwriting Officer	
J. Mentz	Group Non-Executive Director	
P. Storey	Independent Non-Executive Director	
H. Sturgess	President and Chief Executive Officer	
W. Canagaretna	Director	(resigned 08.01.2021)
P. Martin	Independent Non-Executive	(resigned 12.01.2021)
A. Flanagan	Group Non-Executive Director	(resigned 31.12.2021)

The Directors are covered by third party indemnity insurance policies.

Report of the Managing Agent (*continued*)**Review of the Business**

Our insurance underwriting strategy is to operate in lines of business in which our underwriting expertise can make a meaningful difference to operating results. Our insurance business focuses on talent-intensive rather than labour-intensive business and seeks to operate profitably across all of the product lines. This means that we underwrite predominantly in the London wholesale insurance markets and also in regional markets, both directly and on a selective delegated underwriting authority basis. To achieve our objectives, our insurance operating principles are to:

- Capitalise on profitable underwriting opportunities;
- Centralise responsibility for underwriting;
- Maintain a disciplined underwriting philosophy;
- Focus on providing superior claims management; and
- Utilise a brokerage distribution system.

Our underwriting philosophy is to generate an underwriting profit through prudent risk selection and proper pricing across the underwriting cycle. To achieve this, we encourage adherence to uniform underwriting standards across each product line focusing on: risk selection; desired attachment point; limits and retention management; due diligence, including financial condition, claims history, management and exposure; underwriting authority and approval limits; and collaborative decision-making.

The rating environment continued to have a positive improvement during 2021, with firmer pricing for many lines of business including Directors & Officers, Professional Lines and Casualty. Reflecting the strengthened rating environment, the Syndicate's underwriting strategy for 2021 was therefore more offensive, actively seeking out new business and also maximising the opportunities for growth. Notwithstanding the competitive environment, the Managing Agent has sought to maintain its underwriting discipline and execute its philosophy on superior risk selection.

The focus for 2021 has been the continued growth of Syndicate 2012 through expansion of profitable lines of business. Disciplined growth and development of business will continue to be supported by the Board of the Managing Agency.

Net assets of the Syndicate have decreased by £81.8m in 2021 to £34.7m. Majority of this decrease is attributed to the transfer of Funds in Syndicate ("FIS") to Funds at Lloyd's ("FAL"), during Q2 2021. As a result of this transfer, FIS is no longer held on the Syndicate's balance sheet. Please refer to Statement of Changes in Member's Balance for more detail.

Report of the Managing Agent (continued)**Review of the Business (continued)**

The Syndicate recorded an underwriting profit before investment income of £21.9m (2020: £12.7m), mainly driven by the favourable prior year releases and total comprehensive profit of £23.6m (2020: £13.0m) driven by a non-technical loss of £0.6m (2020: loss £2.8m). The components are described below:

Key Performance Information and Metrics

	2021	2020
	£m	£m
Gross premiums written	317.1	293.9
Net premiums written	238.6	210.9
Earned premiums, net of reinsurance	216.2	182.9
Claims incurred, net of reinsurance	(106.9)	(97.8)
Net operating expense	(87.4)	(72.4)
Allocated investment income	2.3	3.1
Balance on technical account for general business	24.2	15.8
Investment return and foreign exchange	(0.6)	(2.8)
Total profit for the year	23.6	13.0
Claims ratio	49.4%	53.5%
Expense ratio	40.4%	39.6%
Combined ratio	89.8%	93.1%

Premiums written

Gross written premiums of £317.1m are 7.9% higher than 2020. During 2021 the Syndicate continued its strategy of capitalising on profitable underwriting opportunities and benefited from improved rate environment. The Syndicate opened new lines of business in 2021; Cyber, Healthcare and Warranty & Speciality Affinity. The largest growth was observed in the Warranty & Speciality Affinity line of business, with (£11.6m written), General Liability, with (£8.2m growth) and Professional Indemnity, with (£6.0m growth).

The premium growth has been driven by rate change, increased line size, specific new binder or underwriting initiatives. We have seen positive rate changes across all lines of business, the largest are Hull (12.57%), Directors & Officers (12.56%), Satellite (12.53%) and Onshore Energy (10.50%).

Claims incurred

During 2021 development on the loss experience for Covid-19 has continued with the current ultimate view gross £11.5m (2020: £18.6m) and net £6.5m (2020: £10.0m). The most significant exposure is for Business Interruption in Australia and for Political Risk. Management have reviewed the Syndicate's overall provision in light of this developing risk and the reserves remain an accurate reflection of the Syndicate's exposure.

The release of favourable prior year development reduced the overall increase in the losses and loss adjustment expenses to £12.6m, leading to total losses and loss adjustment expenses of £106.9m (2020: £97.8m) with the loss ratio decreasing from 53.5% in 2020 to 49.4% in 2021.

Report of the Managing Agent *(continued)*

Review of the Business *(continued)*

Operating Expenses

Net operating expenses, which include acquisition costs and other operating expenses, increased by £15.0m to £87.4m (2020: £72.4m). Administrative expenses saw an increase of £8.5m in 2021, while the acquisition costs have gone up by £3.7m, leading to an increase in the overall expense ratio of 0.9% to 40.4% (2020: 39.6%).

Non-Technical Profit

Whilst a profit of £24.2m (2020: profit £15.8m) was achieved on the technical account in the financial year, the total profit for the year due to the Syndicate is reduced by a loss of £0.6m (2020: loss £2.8m) on the non-technical account.

Corporate and Social Responsibility

Our success is anchored by our culture of ethics and compliance. The Board recognises the pivotal role it plays in promoting ethical standards and integrity in the conduct of our business and is committed to maintaining a reputation for high standards of business conduct.

As part of Arch Capital Group Ltd (“ACGL”), we maintain a Code of Business Conduct (the “Code”) which sets expectations and provides guidance to our employees in key areas, including honest and fair dealing, anti-bribery and corruption, potential conflicts of interest, gifts, safety, harassment and discrimination prevention, antitrust and competition and document retention. Our Code applies to everyone, including the Board, and is reviewed regularly to remain current with changing laws, regulations and industry best practices.

To reinforce our commitment to these standards, the Syndicate provides training to all employees on the Code and makes other resources available, including a 24-hour ethics hotline.

The Syndicate is committed to providing equal opportunities to potential and actual staff. Our policy states that all of our employment related decisions must be based on an individual’s job qualifications and performance and not based on any characteristic protected by law, such as age, gender assignment, marital status, being pregnant or on maternity leave, disability, race, religions, sex or sexual orientation.

Our success also depends on developing our employees so they can grow with the Syndicate. We provide high calibre learning and engagement programs to foster meaningful career development for all employees and encourage employees to execute a personal development plan with their managers.

Report of the Managing Agent (continued)**Risk management strategy and risk appetite**

The Syndicate has a set of risk appetite statements that are appropriate for its individual business model and strategy. Risk appetite statements setting out clear descriptions detailing appropriate levels of risk are in place for each material area of risk and are regularly reviewed and escalated where appropriate through the governance structure to the Board. Risk appetites are reviewed, at a minimum, annually by the Executive and Board Risk Committees to ensure that the Syndicate retains full coverage over its risks.

The table below sets out our strategic risk objectives and shows, at a high level, examples of corresponding appetite statements:

<i>Strategic risk objective</i>	<i>Risk appetite statement</i>
Maintain capital adequacy	Maintain sufficient capital to a defined target
Deliver stable earnings	Profitability over a defined year
Stable and efficient access to funding and liquidity	Cash outflows met under stress
Maintain stakeholder confidence	No appetite for material reputational, legal or regulatory risks

The aim of the risk framework is to provide a robust, proportionate, proactive and forward-looking process for risk management across the Syndicate. A central component of this framework is the Syndicate's policies, which inform the business as to how it is required to conduct its activities and its risk management processes to remain within risk appetite. The Syndicate employs a number of risk tools to manage and monitor risk. The output of our risk management activities is thoroughly tested and reported upon both internally and externally. The policies cover all key risks to which the Syndicate is exposed.

The Syndicate incorporates the identification, assessment, management, control, reporting and mitigation of risk as part of our daily operations. We believe the strengths of our risk framework are:

- Strong culture and risk leadership underpinned by training of our people;
- Engagement with the business;
- Embedded risk management processes;
- Quantitative approach to risk analysis through use of a robust economic capital model;
- Regular risk assessment and management information; and
- Influencing decision-making and shaping behaviours, via the provision of accurate, timely and relevant risk advice and challenge.

The Syndicate's risk management, internal audit, and compliance processes are coordinated to ensure that their respective activities are effective and complementary.

Covid-19 Pandemic

The global pandemic resulting from the novel coronavirus (including variants of the coronavirus such as Delta and Omicron, "COVID-19") has disrupted the global economy, causing a significant slowdown in economic activity around the world. Businesses around the world, including ours, have been impacted by the restrictions on travel, some business activities and non-essential services and the reverberations of severe curtailment of normal activities. Since the start of the pandemic, we have taken proactive steps to ensure the health and safety of our employees with the majority of our employees working from home to maintain business continuity. Our employees and businesses have adapted to the changing needs of our clients, customers and business partners. We remain committed to continuing to carry on our business activities without interruption during these challenging times.

Report of the Managing Agent (continued)**Principal risks and uncertainties**

The Syndicate writes products that are subject to a number of uncertainties and risks. It is a key role of the risk function to ensure that these risks have been identified, measured and considered throughout the business.

Principal risks	Impact	Strategy, management and mitigation
<i>Strategic risk</i> The economic climate could put at risk our ability to meet our strategic objectives in the areas of distribution, pricing, claims, costs, and international diversification ultimately causing the Syndicate to meet its business plan.	The value of the Syndicate decreases, resulting in a lack of ACGL Group confidence.	Syndicate's strategic ambitions include management of strategic risk in accordance with the ACGL Group premium and profitability plans and targets. We do this through: <ul style="list-style-type: none"> • Constant monitoring and management of agreed strategic targets; • Monitoring of cost savings to ensure they remain on track; and • Monitoring and reporting of capital levels.
<i>Underwriting and pricing risk</i> We are subject to the risk that inappropriate business could be written (or not specifically excluded) and inappropriate prices charged. This includes, but is not limited to, catastrophe risk arising from losses due to unpredictable natural and man-made events affecting multiple covered risks.	Adverse loss experience impacting current year and future year business performance.	Syndicate's insurance risk strategy is to maintain an acceptable level of underwriting exposure within preferred business lines, across a diverse range of distribution channels, products and geographies. We do this through: <ul style="list-style-type: none"> • Underwriting guidelines for all business transacted, restricting the types and classes of business that may be accepted; • Exception reports and underwriting monitoring tools; • Internal quality assurance programmes; • Pricing policies by product line; • Analysis of comprehensive data to refine pricing; • Quarterly line of business reviews to monitor performance and adequacy of pricing; • Monthly monitoring and reporting of natural and man-made catastrophe risk against appetite; • Purchase of reinsurance to limit exposures; and • Analysis of all property portfolios to determine expected maximum losses.
<i>Reserving risk</i> Due to the uncertain nature and timing of the risks to which we are exposed, we cannot precisely determine the amounts that we will ultimately pay to meet the liabilities covered by the insurance policies written leading to a risk that reserves may not be adequate for the risks underwritten.	Adverse development in prior year reserves resulting in significant deviations in earnings.	Syndicate's reserve risk strategy is to book best estimate reserves being adequate compared to the independent actuaries' best estimate. Technical reserves are estimated by: <ul style="list-style-type: none"> • A range of actuarial and statistical techniques, with projections of ultimate claims cost involving assumptions across a range of variables, including estimates of trends in claims frequency and average claim amounts based on facts and circumstances at a given point in time; • Making assumptions on other variable factors including: the legal, social, economic and regulatory environments. Other factors considered include business mix, consumer behaviour, market trends, underwriting assumptions, risk pricing models, inflation in medical care costs, future earnings inflation and other relevant forms of inflation, the performance and operation of reinsurance assets and future investment returns; and • Stress and scenario testing.

Report of the Managing Agent (continued)**Principal risks and uncertainties (continued)**

Principal risks	Impact	Strategy, management and mitigation
<i>Ceded reinsurance risk</i> The risk to the Syndicate arises where reinsurance contracts put in place to reduce gross insurance risk do not perform as anticipated.	Adverse impact on the financial results.	The Syndicate's reinsurance programmes are determined from the underwriting team business plans and seek to protect Syndicate capital from an adverse volume or volatility of claims on both a per risk and per event basis. <ul style="list-style-type: none"> • The Syndicate aims to establish appropriate retention levels, limits of protection with clear policy wordings that are consistent with keeping within the Board's risk tolerance and achieving the target rates of return; • Provide stable, sustainable core capacity for each product line with non-core reinsurance purchased when market conditions allow; • Comply with the guidance from the AGL Security Committee after review by Syndicate management; and • The Syndicate also benefits from an internal quota share with Arch Reinsurance Ltd., the level of which is set at 15%.
<i>Operational risk</i> The risks of direct or indirect losses resulting from inadequate or failed internal processes, fraudulent claims or from systems and people, or from external events including changes in the competitor, regulatory or legislative environments.	Adverse events with potential financial, reputational, legal and customer impacts.	Syndicate recognises that certain operational risks are unavoidable and seeks to limit exposure to operational risks through ensuring that an effective infrastructure, robust systems and controls and appropriately experienced and qualified individuals are in place throughout the organisation. <ul style="list-style-type: none"> • We have enhanced many of our operational processes. This includes enhancing our Risk Management framework to integrate risk, business and capital strategies; • We maintain a robust internal control environment; • We maintain a robust risk capture, management and reporting system; and • We recognise the value of our human resources and have appropriate Human Resources ("HR") policies to develop and retain our staff.
<i>Investment risk</i> <i>Market risk</i> – the risk of adverse financial impact due to changes in fair values of future cash flows of instruments held in the investment portfolio as a result of changes in interest rates, credit spread and foreign exchange rates. <i>Credit risk</i> – the risk of exposure if another party fails to perform its financial obligations, including failing to perform them in a timely manner. <i>Liquidity risk</i> – the risk of maintaining insufficient financial resources to meet business obligations as and when they fall due.	Adverse movements due to asset value reduction, mismatch in assets and liabilities, and default of third parties. Inability to meet cash flows under stress.	Syndicate's investment strategy is to protect the value of capital, focusing on assets that we consider are capable of producing a consistent and recurring flow of income over time. Syndicate's liquidity management ensures that a minimum percentage of consolidated investments are held in liquid, short-term money market securities, to ensure that there are sufficient liquid funds available to meet obligations to policyholders and other creditors as they fall due. Our investment portfolio is managed and controlled through: <ul style="list-style-type: none"> • The Investment Committee receives advice from Arch Investment Managers as well as external Investment Advisers; • Investment strategy and guidelines are proposed to the Board by the Investment Committee and monitored by the Investment Committee; • Diverse holding of types of assets including geographies, sectors and credit ratings; and • Stress testing and scenario analysis.

Report of the Managing Agent (continued)**Principal risks and uncertainties (continued)**

Principal risks	Impact	Strategy, management and mitigation
Counterparty credit risk We partner with many suppliers and the failure of any of these to perform their financial obligations or perform them in a timely manner could result in a financial loss. The principal area of counterparty risk is our use of inter-company quota share reinsurance as a capital management tool.	Loss due to default of banks, reinsurers, brokers or other third parties.	Syndicate's strategy is to avoid risk of large losses from counterparty failures through prudent counterparty selection and review of credit exposures; <ul style="list-style-type: none"> • Credit limits are set for counterparties, particularly reinsurers; • Requirement for minimum credit ratings for reinsurers; • Broker credit exposures are monitored by the business; and • The credit risk arising out of the inter-company quota share is managed through use of a trust fund arrangement.
Regulatory risk Changes in law and regulations are not identified, understood, or are inappropriately and incorrectly interpreted, or adopted, or business practices are not efficiently modified. Further, there is a risk that current legal or regulatory requirements are not complied with.	Customer impact, financial loss and regulatory censure. Regulatory sanction, legal action or revenue loss.	Syndicate's regulatory risk strategy is to comply with all laws and regulations. <ul style="list-style-type: none"> • Continued focus on key regulatory issues, including pricing and reserving adequacy during both soft and hard market conditions; • We have a constructive and open relationship with our regulators; and • We continue to monitor all regulatory changes as and when they are required by our regulators.
Conduct risk The risk of failing to deliver the appropriate treatment for our customers throughout all stages of the customer journey and that our people fail to behave with integrity.	Potential customer detriment, financial loss and regulatory censure and sanction.	Syndicate's conduct risk strategy is to ensure good customer outcomes: <ul style="list-style-type: none"> • Our organisational culture prioritises a consistent approach towards customers and the interests of customers are at the heart of how we operate; and • We have developed a robust customer conduct risk management framework to minimise our exposure to conduct risk.
Group and reputational risk We are dependent on the strength of ACGL Group, our reputation with customers and distributors in the sale of products and services. We have entered into various strategic partnerships that are important to the marketing, sale and distribution of our products.	Loss of ACGL Group value negatively impacts our ability to retain and write new business.	Syndicate derives benefits from being part of the ACGL Group. Group risk is primarily managed at the executive level, through building strong relationships with all parties. Syndicate's reputational risk strategy is to protect our brand and reputation. We do this through: <ul style="list-style-type: none"> • Our brand and reputation risk are regularly reviewed by various governance committees; and • We seek to offer a superior service to customers and to treat customers fairly in line with Financial Conduct Authority ("FCA") principles.
Risks arising out of the COVID-19 Pandemic On 11 March 2020, the World Health Organisation declared a pandemic in relation to the outbreak of the COVID-19 virus. In particular, the following areas are exposed to increased risk as a result of the pandemic: <ul style="list-style-type: none"> • Loss exposure and reserve adequacy; • Valuation of the investment portfolio; • Recoverability of debtor balances; and • Operational Risk. 	The Syndicate's capital may be negatively impacted.	The Syndicate has evaluated / addressed these risks as follows: <ul style="list-style-type: none"> • Continuous review of COVID loss development and subsequent relevant developments; • Performance and valuation review of the investment portfolio; • Consideration of any impact on recoverability of debt; and • Successful implementation of work from home environment and ability to bind business during the pandemic.

Report of the Managing Agent (*continued*)

Outlook and Future Developments

The Syndicate has had a successful financial year, with total profits of £23.6m (2020: profit £13.0m). The Syndicate grew in existing lines of business in 2021 due to increased rates and new business initiatives.

Looking to 2022, we look to capitalise on the increase in rates observed across the market with the aim of improving the combined ratio to achieve a greater return on capital to the Member of Syndicate 2012.

The Syndicate business forecast includes “Contingency”, a new line of business which has been approved by Lloyd’s during the 2022 underwriting year. This new line of business, together with continued growth in existing lines of business are expected to contribute to the Syndicate’s targeted growth in 2022. Whilst growth continues to be a focus, the Syndicate’s governance and underwriting controls continue to place strong emphasis on risk selection and price adequacy, contributing to overall underwriting discipline with the aim of placing profitable business.

Climate Change

Throughout the year, there has been continued focus on the impact of the Syndicate’s operations on the community and the environment. Environmental, Social and Governance (ESG) has entered the mainstream in recent years as stakeholders evaluate organisations not only to gauge their money-making ability, but also their commitment to making positive change in the world and their ability to manage risks arising out of environmental and social changes.

The Syndicate, as part of the wider ACGL group, is governed by the ESG Steering Committee, which is chaired by the Group’s Chief ESG Officer, who has responsibility for coordinating and managing the oversight of ACGL’s growing ESG programme. The Directors of the Managing Agency review the output of the ESG Steering Committee, and where deemed appropriate incorporate its recommendations in their management of the Syndicate.

In addition, the directors have made an assessment of the specific risk of climate change to the Syndicate and have identified potential risks relating to underwriting and investment risks, each of which has been set out in further detail below. The Syndicate has embedded management of climate change risks into its standard approach for risk management. This is a fast-changing area and both the Syndicate and the wider insurance market will continue to develop approaches to better understand and manage potential risks from climate change.

Underwriting risks

The Syndicate has a well-established exposure management framework, used to measure and manage catastrophe loss probability. The exposed policies are modelled by country and peril to estimate loss probabilities from natural catastrophe events, such as cyclones, windstorms, earthquakes, floods, bushfires and other hazards.

The whole portfolio is reassessed on a quarterly basis and the assessment includes modelling of historic events and probabilistic extremes of events across relevant geographic regions. Climate change signals, such as warming of sea surface temperatures are incorporated into the parameterisation of the model used.

The Syndicate’s models are tested for sensitivity and stress tested against the Syndicate’s historic claims experience. The key metric used is the 1 in 250 year stress test performed on a gross and net basis, which are tracked quarterly.

A number of scenarios have been considered based on the Prudential Regulation Authority’s (“PRA”) 2021 General Insurance Stress Test climate change specifications, which show that there could be a long-term impact to modelled losses relating to US Windstorm exposures, although it is anticipated that we would remain within current risk appetites.

The Managing Agency, on behalf of the Syndicate, is looking at all aspects of the potential new underwriting environment that may emerge with the advent of various aspects of climate change. Both first

Report of the Managing Agent (continued)**Outlook and Future Developments (continued)**Underwriting risks (continued)

and third party underwriters are working to continually assess the impact of various climate change scenarios on the existing and future portfolio, including but not limited to changing weather pattern and changing sea levels and their impact on risk selection and aggregation; to novel litigation against various companies or their directors and officers for their alleged fault in enabling such change, which may impact risk selection and policy structure; to the opportunities generated by a changing economy. Arch is a writer of renewable energy business, of companies developing and manufacturing electric vehicles and insurers of various projects and research which both enable and profit from a new economy; this develops as the opportunity itself develops and has in itself challenges around pricing and policy form, in which we invest our own intellectual property.

Investment risk

The Syndicate has an investment portfolio worth £201.2 million consisting mainly of shares, debt securities, fixed-income securities and other variable-yield securities. Investments are managed by Arch Investment Management Limited, a member of the wider ACGL Group.

The investment committee, which has been delegated oversight of the Syndicate's investment portfolio by the Board of Directors is aware of the importance of stewardship and sustainability alongside integrating ESG into the overall governance structure, which involves the inclusion of Environmental, Social and Governance factors into wider investment analysis. At the ACGL level, ESG scores are incorporated into the overall portfolio analysis on a regular basis, the outcome of which is made available to the local investment committee.

Arch is fully cognisant of the emerging importance of climate change as a fundamental societal issue and is actively investigating opportunities in underwriting, investments and its operational organisation and supply chains to act responsibly and to support the trend towards a sustainable transition to the post-Carbon society.

In line with the PRA's expectations in SS3/19 and PS11/19, an initial plan has been put in place considering governance, risk management, scenario analysis and disclosure.

Donations

The Syndicate made no political or charitable contributions during the year (2020: £nil).

Financial Risk Management

The Syndicate's mission is to generate positive contribution to the growth in the Tangible Book Value of our ultimate parent company. We do this by maximising our return on equity within a defined 'risk appetite'. It is essential that we understand the risks the Syndicate is exposed to, namely strategic risk, insurance risk, operational risk, market risk, credit risk, liquidity risk, counterparty risk, regulatory risk, conduct risk, reputation risk and capital risk. Note 4 expands on these risks, including the Syndicate's management of these risks.

Independent Auditors

The independent auditors, PricewaterhouseCoopers LLP, have indicated their willingness to continue in office and they will be re-appointed by the Directors of the Managing Agent for the forthcoming year.

Approved by the Board and signed on behalf of the Board by:

Pasquale Leoni

Director

Arch Managing Agency Limited

3 March 2022

Statement of Managing Agent's Responsibilities

The Directors are responsible for preparing the Syndicate annual report and annual accounts in accordance with applicable law and regulations, including Financial Reporting Standard 102 "*The Financial Reporting Standard Applicable in the UK and Republic of Ireland*" ("FRS 102"), and Financial Reporting Standard 103 "*Insurance Contracts*" ("FRS 103").

In accordance with *The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008*, managing agents are required to prepare Syndicate annual accounts for each financial year which give a true and fair view of the state of affairs of the Syndicate and of its profit or loss for that year.

In preparing the Syndicate annual accounts, the Managing Agent is required to:

- Select suitable accounting policies and then apply them consistently;
- Make judgements and estimates that are reasonable and prudent;
- State whether applicable UK accounting standards, including FRSs 102 and 103 have been followed, subject to any material departures disclosed and explained in the annual accounts; and
- Prepare the annual accounts on the basis that the Syndicate will continue to write future business, unless it is inappropriate to presume that the Syndicate will do so.

The Managing Agent confirms it has complied with the above requirements in preparing the annual accounts.

The Managing Agent is responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Syndicate and enable it to ensure that the Syndicate annual accounts comply with the 2008 Regulations. It is also responsible for safeguarding the assets of the Syndicate and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Disclosure of Information to Auditors

Each of the persons who are Directors of the Managing Agent at the date of approval of this report confirms that:

- So far as the Director is aware, there is no information relevant to the audit of the Syndicate's annual accounts for the year ended 31 December 2021 of which the auditors are unaware; and
- Each Director has taken all the steps that they ought to have taken in their duty as a Director of the Managing Agent in order to make themselves aware of any relevant audit information and to establish that the Syndicate's auditors are aware of that information.

Independent Auditors' Report to the Member of Syndicate 2012

Report on the syndicate annual accounts

Opinion

In our opinion, Syndicate 2012's syndicate annual accounts:

- give a true and fair view of the state of the syndicate's affairs as at 31 December 2021 and of its profit and cash flows for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law); and
- have been prepared in accordance with the requirements of The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008.

We have audited the syndicate annual accounts included within the Annual Report and Accounts (the "Annual Report"), which comprise: the Balance Sheet as at 31 December 2021; the Profit and Loss Account: Technical Account – General Business, the Profit and Loss Account: Non-Technical Account, the Statement of Cash Flows, and the Statement of Changes in Member's Balances for the year then ended; and the notes to the syndicate annual accounts, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)"), and The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 and other applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the syndicate annual accounts section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the syndicate in accordance with the ethical requirements that are relevant to our audit of the syndicate annual accounts in the UK, which includes the FRC's Ethical Standard, as applicable to other entities of public interest, and we have fulfilled our other ethical responsibilities in accordance with these requirements. To the best of our knowledge and belief, we declare that non-audit services prohibited by the FRC's Ethical Standard were not provided.

Other than those disclosed in note 7, we have provided no non-audit services to the syndicate in the period under audit.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the syndicate's ability to continue as a going concern for a period of at least twelve months from when the syndicate annual accounts are authorised for issue.

In auditing the syndicate annual accounts, we have concluded that the Managing Agent's use of the going concern basis of accounting in the preparation of the syndicate annual accounts is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the syndicate's ability to continue as a going concern.

Independent Auditors' Report to the Member of Syndicate 2012 (continued)

Our responsibilities and the responsibilities of the Managing Agent with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the syndicate annual accounts and our auditors' report thereon. The Managing Agent is responsible for the other information. Our opinion on the syndicate annual accounts does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the syndicate annual accounts, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the syndicate annual accounts or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the syndicate annual accounts or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Report of the Managing Agent (the 'Managing Agent's Report'), we also considered whether the disclosures required by The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 have been included.

Based on our work undertaken in the course of the audit, The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 requires us also to report certain opinions and matters as described below.

Managing Agent's Report

In our opinion, based on the work undertaken in the course of the audit, the information given in the Managing Agent's Report for the year ended 31 December 2021 is consistent with the syndicate annual accounts and has been prepared in accordance with applicable legal requirements.

In light of the knowledge and understanding of the syndicate and its environment obtained in the course of the audit, we did not identify any material misstatements in the Managing Agent's Report.

Responsibilities for the syndicate annual accounts and the audit**Responsibilities of the Managing Agent for the syndicate annual accounts**

As explained more fully in the Statement of Managing Agent's Responsibilities, the Managing Agent is responsible for the preparation of the syndicate annual accounts in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Managing Agent is also responsible for such internal control as they determine is necessary to enable the preparation of syndicate annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the syndicate annual accounts, the Managing Agent is responsible for assessing the syndicate's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless it is intended for the syndicate to cease operations, or it has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the syndicate annual accounts

Our objectives are to obtain reasonable assurance about whether the syndicate annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate,

Independent Auditors' Report to the Member of Syndicate 2012 (continued)

they could reasonably be expected to influence the economic decisions of users taken on the basis of these syndicate annual accounts.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the syndicate and industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of UK and European regulatory principles, such as those governed by the Prudential Regulation Authority and the Financial Conduct Authority, and those regulations set by the Council of Lloyd's, and we considered the extent to which non-compliance might have a material effect on the syndicate annual accounts. We also considered those laws and regulations that have a direct impact on the syndicate annual accounts such as The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008. We evaluated management's incentives and opportunities for fraudulent manipulation of the syndicate annual accounts (including the risk of override of controls), and determined that the principal risks were related to posting of inappropriate journals and management bias in accounting estimates. Audit procedures performed included:

- discussions with the Audit Committee, management and internal audit, including consideration of known or suspected instances of non-compliance with laws and regulation and fraud;
- evaluation and testing of the operating effectiveness of management's controls designed to prevent and detect irregularities;
- reviewing, and challenging where appropriate, the assumptions and judgements made by management in their significant accounting estimates, in particular in relation to the estimation of claims outstanding, with a focus on the IBNR claims, and the estimation of gross premiums written;
- identifying and testing journal entries based on selected fraud risk criteria, in particular journal entries with unusual account combinations or posted by unexpected users;
- evaluating the business rationale for any significant transactions identified outside the normal course of business; and
- designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the syndicate annual accounts. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the syndicate annual accounts is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the syndicate's member in accordance with part 2 of The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Independent Auditors' Report to the Member of Syndicate 2012 *(continued)*

Other required reporting

Under The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 we are required to report to you if, in our opinion:

- we have not obtained all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the Managing Agent in respect of the syndicate; or
- certain disclosures of Managing Agent remuneration specified by law are not made; or
- the syndicate annual accounts are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.

Profit and Loss Account: Technical Account – General Business
For the year ended 31 December 2021

	Notes	2021 £000	2020 £000
Earned premium, net of reinsurance			
Gross premiums written	6	317,105	293,918
Outward reinsurance premiums		(78,495)	(82,996)
Net premiums written		238,610	210,922
Change in the gross provision for unearned premiums		(23,527)	(40,326)
Change in the provision for unearned premiums, reinsurers' share		1,112	12,343
Earned premiums, net of reinsurance		216,195	182,939
Allocated investment return transferred from the non-technical account		2,332	3,113
Total technical income		218,527	186,052
Claims incurred, net of reinsurance			
Claims paid			
-gross amount		(100,638)	(95,549)
-reinsurers' share		30,357	20,115
	14	(70,281)	(75,434)
Change in the provision for claims			
-gross amount		(50,750)	(45,205)
-reinsurers' share		14,164	22,832
		(36,586)	(22,373)
Claims incurred, net of reinsurance	14	(106,867)	(97,807)
Net operating expenses	7	(87,439)	(72,362)
Total technical charges		(194,306)	(170,169)
Balance on the technical account for general business		24,221	15,883

All Operations are continuing.

The notes on pages 21 to 48 form part of these financial statements.

Profit and Loss Account: Non-Technical Account

For the year ended 31 December 2021

	Notes	2021 £000	2020 £000
Balance on the general business technical account		24,221	15,883
Investment income		2,178	2,429
Unrealised gains on investments		27	789
Gains on the realisation of investments		20	1,549
Investment expenses and charges		(206)	(240)
Losses on the realisation of investments		(1,352)	(12)
Unrealised losses on investments		(1,972)	-
	8	(1,305)	4,515
Allocated investment return transferred to the general business technical account		(2,332)	(2,326)
Non-technical profit / (loss) on exchange		3,026	(4,997)
Total profit for the year		23,610	13,075

All results are attributable to continuing operations.

There are no other comprehensive income or expense other than those reported in the Income Statement, thus no Statement of Comprehensive Income has been prepared.

There is no material difference between the profit for the financial year as stated above and the historical cost equivalents.

The notes on pages 21 to 48 form part of these financial statements.

Purchase of equity and debt instruments	(190,943)	(292,619)
Sale of equity and debt instruments	262,042	247,645
Investment (loss) / income received	(1,260)	3,966
Net cash Inflow / (Outflow) from investing activities	69,839	(41,008)
FIS release to member	(105,383)	-
Cash flows from financing activities	(105,383)	-
Foreign exchange on cash and cash equivalents	(625)	320
Net increase / (decrease) in cash and cash equivalents	3,877	(2,973)
Cash at bank and in hand at beginning of year	13,269	15,922
Cash at bank and in hand at end of year	16,521	13,269

The notes on pages 21 to 48 form part of these financial statements.

Notes to the Financial Statements

1 General Information

The Syndicate transacts in the underwriting of general insurance business at Lloyd's with underwriting capacity being provided by Arch Syndicate Investments Ltd. The address of the Managing Agent's registered office is 60 Great Tower Street, London, EC3R 5AZ.

2 Statement of compliance

The financial statements of the Syndicate have been prepared in compliance with United Kingdom Accounting Standards, including Financial Reporting Standard 102, "*The Financial Reporting Standard applicable in the UK and Republic of Ireland*" ("FRS 102"), Financial Reporting Standard 103, "*Insurance Contracts*" (FRS 103), *The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008* and the Companies Act 2006.

The Syndicate financial statements have been prepared in compliance with the provisions of *The Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations* relating to insurance groups.

3 Significant Accounting Policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) Basis of preparation

These financial statements are prepared on a going concern basis, under the historical cost convention, as modified by the revaluation of certain financial assets and liabilities measured at fair value through profit and loss.

The preparation of financial statements in conformity with FRS 102 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Syndicate's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 5.

(b) Going Concern

The Directors of the Managing Agent have assessed the Syndicate's ability to continue as a going concern by considering, amongst other things, the Syndicate's reserve strength, available capital, future business plan and any expected material changes to its operations. Based on the assessment, they continue to adopt the going concern basis in preparing the financial statements.

(c) Foreign Currency

(i) Functional and presentation currency

The Syndicate's functional and reporting currency is pounds sterling.

These financial statements are presented in pounds sterling ("pounds" or "GBP"), which is the functional currency of the Syndicate, and are rounded to the nearest thousand unless otherwise stated.

(ii) Foreign currency

The results and financial positions of the non-functional currencies are retranslated into the functional currency as follows:

- monetary assets and liabilities are retranslated at the closing rate at the balance sheet date;
- income and expenses are retranslated at the average rate of exchange during the year; and
- all resulting exchange differences are recognised through the non-technical account.

Notes to the Financial Statements *(continued)***3 Significant Accounting Policies** *(continued)***(d) Insurance Contracts***(i) Classification*

Contracts under which the Syndicate accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder are classified as insurance contracts.

*(ii) Recognition and measurement**Revenue*

Premiums written relate to business inception during the year, together with any differences between booked premiums for prior years and those previously accrued, and include estimates of premiums inception but not yet received or notified to the Syndicate. Premiums written are shown gross of commission payable to intermediaries, and exclude taxes and duties levied on premiums.

The earned proportion of premiums is recognised as revenue. Premiums are earned from the date of inception of risk mostly on a time apportionment basis. In the opinion of the Directors of the managing agent the resulting earned portion is not materially different from one based on the pattern of incidence of risk. For lines of business where the earned proportion would be materially different a pattern based on incidence of risk is applied.

Outwards Reinsurance

Outward reinsurance premiums are accounted for in the same accounting year as the premiums for the related direct insurance or inwards reinsurance business. Reinsurance contracts that operate on a 'losses occurring' basis are accounted for in full over the year of coverage, whilst 'risk attaching' policies are expensed using the same earnings year as the underlying premiums on a daily pro rata basis.

Reinsurance commission income

Commissions on reinsurance premiums are earned in a manner consistent with the recognition of the costs of the reinsurance, generally on a pro-rata basis over the terms of the policies reinsured.

Unearned premium provision

Unearned premiums represent the proportion of premiums written in the year that relate to unexpired terms of policies in force at the balance sheet date calculated on a time apportionment basis. In the opinion of the Directors of the managing agent the resulting provision is not materially different from one based on the pattern of incidence of risk. For lines of business where the earned proportion would be materially different a pattern based on incidence of risk is applied.

Claims

Claims incurred comprise notified claims and related expenses in the year together with changes in the estimates of what we ultimately expect to pay on claims based on facts and circumstances known at the balance sheet date. The insurance reserves include the Syndicate's total cost of claims incurred but not reported ("IBNR").

Claims outstanding comprise provisions for the Syndicate's best estimate of the ultimate cost of settling all claims incurred but unpaid at the reporting date whether reported or not, and related internal and external claims handling expenses. Claims outstanding are assessed by reviewing individual reported claims and making allowance for claims incurred but not yet reported, the effect of both internal and external foreseeable events, such as changes in claims handling procedures, inflation, judicial trends, legislative changes and past experience and trends. Provisions for claims outstanding are not discounted. Adjustments to claims provisions established in prior periods are reflected in the financial statements of the period in which the adjustments are made and are disclosed separately if material. The methods used, and the estimates made, are reviewed regularly.

Notes to the Financial Statements (*continued*)

3 Significant Accounting Policies (*continued*)

(d) Insurance Contracts (*continued*)

Claims (continued)

The Syndicate's reserving policy is to use recognised actuarial techniques appropriate to the loss experience that exists. Where there is limited loss experience our choice of method has primarily been the expected loss method.

We select the initial expected loss and loss adjustment expense ratios based on information derived from our underwriters and actuaries during the initial pricing of the business, supplemented by industry data where appropriate. These ratios consider, amongst other things, rate changes and changes in terms and conditions that have been observed in the market.

For a given underwriting year, additional weight is given to the historic paid and incurred loss development methods in the reserving process, assuming that case reserving practices are consistently applied over time. This reserving process makes some key assumptions that historical paid and reported development patterns are stable.

For catastrophe-exposed business, our reserving process also includes the use of catastrophe models for known events, a heavy reliance on analysis of individual catastrophic events and management judgement. The development of property losses can be unstable, especially for policies characterised by high severity, low frequency losses.

Reinsurance recoveries in respect of estimated claims incurred but not reported are booked in line with the underlying programme, adjusted to reflect changes in the nature and extent of the Syndicate's reinsurance programme over time. An assessment is also made of the recoverability of reinsurance recoveries having regard to market data on the financial strength of each of the reinsurance companies. Reinsurance liabilities are primarily premiums payable for reinsurance.

Unexpired risk provision

Provision is made for unexpired risks arising from contracts where the expected value of claims and expenses attributable to the unexpired periods of policies in force at the balance sheet date exceeds the unearned premiums provision in relation to such policies (after the deduction of any deferred acquisition costs). The provision for unexpired risks is calculated by reference to classes of business which are managed together, after taking into account the future investment return on investments held to back the unearned premiums and unexpired claims provisions.

(iii) Reinsurance assets and liabilities

The Syndicate cedes reinsurance in the normal course of business for the purpose of limiting its net loss potential through the diversification of its risks. Assets, liabilities and income and expense arising from ceded reinsurance contracts are presented separately from the assets, liabilities, income and expense from the related insurance contracts because the reinsurance arrangements do not relieve the Syndicate of its direct obligations to its policyholders.

Amounts due to and from reinsurers are accounted for in a manner consistent with the insured policies and in accordance with the relevant reinsurance contract. For general insurance business, reinsurance premiums are expensed over the period that the reinsurance cover is provided based on the expected pattern of the reinsured risks. The unexpensed portion of ceded reinsurance premiums is included in reinsurance assets.

Reinsurance assets are assessed for impairment at each balance sheet date. A reinsurance asset is deemed impaired if there is objective evidence, as a result of an event that occurred after its initial recognition, that the Syndicate may not recover all amounts due, and that the event has a reliably measurable impact on the amounts that the Syndicate will receive from the reinsurer. Impairment losses on reinsurance assets are recognised in the comprehensive income for the period.

Notes to the Financial Statements *(continued)***3 Significant Accounting Policies** *(continued)***(d) Insurance Contracts** *(continued)**(iv) Deferred acquisition costs*

Acquisition costs which represent commission and other related underwriting expenses are deferred over the year in which the related premiums are earned. The deferred expenses relate to underwriter salaries, office costs, and marketing which are deferred based on a ratio between bound and quoted policies by line of business. To the extent that acquisition costs are deferred and considered irrecoverable against the related unearned premiums, they are written off to net operating expenses as incurred.

The deferred acquisition cost represents the proportion of acquisition costs which corresponds to the proportion of gross premiums written that is unearned at the balance sheet date. The acquisition costs are expensed from the date of inception of risk on mostly a time apportionment basis. For lines of business where using a time apportionment basis would lead to a materially different result to applying a pattern based on incident of risk, the risk-based earning pattern is applied.

(e) Financial Instruments

The Syndicate has accounted for financial instruments using Sections 11 and 12 of FRS 102.

(i) Financial assets

Basic financial assets, including loans, trade receivables and cash and cash equivalents, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at market rate of interest.

Loans and receivables and cash and cash equivalents are initially recognised on the date that they are originated. All other basic financial assets are recognised initially on the trade date at which the Syndicate becomes a party to the contractual provisions of the instrument.

Basic financial assets are recognised initially at cost and subsequently measured at amortised cost.

At the end of each reporting period the Syndicate's basic financial assets are assessed for objective evidence of impairment. If an asset is impaired the impairment loss is the difference between the carrying amount and the present value of the estimated cash flows discounted at the assets' original effective interest rate. The impairment loss is recognised in profit or loss.

If there is a decrease in the impairment loss arising from an event occurring after the impairment was recognised, the impairment is reversed and the reversal recognised in the profit or loss.

The Syndicate's investments in debt securities are classified as fair value through profit and loss financial assets. These are initially recognised at fair value, which is normally the transaction price. Subsequent to initial recognition, they are measured at fair value and changes therein are recognised in the profit and loss account.

The fair value is determined based on the fair value hierarchy, which defined by the standard are as follows:

- Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.
- Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

Notes to the Financial Statements *(continued)***3 Significant Accounting Policies** *(continued)***(e) Financial Instruments** *(continued)*

The Syndicate derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred.

Any interest in transferred financial assets that is created or retained by the Syndicate is recognised as a separate asset or liability.

(ii) Financial Liabilities

Financial liabilities, including trade and other payables, bank loans, and loans from fellow group companies are recognised initially at transaction price on the trade date at which the Syndicate becomes a party to the contractual provisions of the instrument.

Subsequent measurement is at amortised cost, using the effective interest rate method.

The Syndicate derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

(iii) Offsetting

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Syndicate has a legal right to offset the amounts and intends to either settle on a net basis or to realise the asset and settle the liability simultaneously.

(f) Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits with original maturities of three months or less. Bank overdrafts that are repayable on demand and form an integral part of the Syndicate's cash management are included as a component of cash and cash equivalents.

(g) Taxation

Under Schedule 19 of the Finance Act 1993, managing agents at Lloyd's are not required to deduct basic-rate income tax from trading income. In addition, all UK basic-rate income tax deducted from syndicate investment income is recoverable by managing agents and consequently the distribution made to member or its member's agents is gross of tax. Capital appreciation falls within trading income and is also distributed gross of tax.

No provision has been made for any United States Federal Income Tax payable on underwriting results or investment earnings. Any payments on account made by the Syndicate during the year are included in the balance sheet under the heading "Other Debtors".

No provision has been made for any other overseas tax payable by the Corporate Member on underwriting results.

(h) Deposits with Ceding Undertakings

Deposits with Ceding Undertakings are measured at cost.

Notes to the Financial Statements *(continued)*

4 Management of Risk

The Syndicate's core business is to take risk and our mission is to generate a positive contribution to the growth in the Tangible Book Value (TBV) of our ultimate parent company, ACGL. We do this through our objective of maximising return on equity within a defined 'risk appetite'. It is therefore essential that we understand the significant exposures we face to manage the business well. It is also important that our knowledge of those risks underpins every important decision we make across the Syndicate. The risks from our core business of insurance represent our most significant exposures.

(a) Strategic Risk

This is the risk that the Syndicate's strategy is inappropriate or that the Syndicate is unable to implement its strategy. Where events supersede the Syndicate's strategic plan this is escalated at the earliest opportunity through the Syndicate's monitoring tools and governance structure.

On a day-to-day basis, the Syndicate's management structure encourages organisational flexibility and adaptability, while ensuring that activities are appropriately coordinated and controlled. Staff, management and outsourced service providers are expected to excel in service and quality. Individuals and teams are also expected to transact their activities in an open and transparent way. These behavioural expectations reaffirm our low risk tolerance by aligning interests of all stakeholders.

(b) Insurance Risk

(i) Underwriting Risk

The process of selecting and pricing insurance risks is addressed through a framework of policies, procedures and internal controls. Risk selection is our business and our procedures are designed to ensure that the evaluation of risk is transparent and logical. We have a clearly defined appetite for underwriting risk, which dictates our business plan.

To ensure that our risk appetite is not exceeded, we maintain disciplined underwriting, which is reviewed through quarterly underwriting meetings, regularly monitor closely our exposures to and aggregations of risk in particular places, and buy reinsurance to limit our losses from disasters. We adapt our business plan, target products and reinsurance programme to ensure our book of business is well diversified. The Syndicate's long-term underwriting strategy is to seek a diverse and balanced portfolio of risks in order to limit volatility. This is achieved by accepting a spread of business over time, segmented between different classes of business and geography.

The quality of our underwriting models and our capability to accurately measure our aggregate exposure are key to managing this risk. Our underwriters are given incentives to make sound decisions that are aligned with the Syndicate's overall strategic objectives and risk appetite. Clear limits are also placed on their authority. We regularly review our policy wordings in the light of legal developments to ensure the Syndicate's exposure is restricted, as far as possible, to those risks identified in the policy at the time it was issued.

The Syndicate has large aggregate exposures to natural and man-made catastrophic events. These risks are inherently uncertain as it is difficult to predict the timing of such events with statistical certainty or estimate the amount of loss which any given occurrence will generate. The Syndicate regularly monitors its exposure to catastrophic events, including earthquake, wind and terrorism, using a catastrophe modelling tool, ("AIR") (Property, Terrorism and Onshore Energy), both locally and at Arch Group level. Additionally, the Syndicate regularly monitors its exposure to man-made realistic disaster scenarios.

The Syndicate seeks to limit its loss exposure by purchasing reinsurance to limit exposure to certain extreme events. The Syndicate monitors concentration risk through limiting its loss exposure by geographical and line of business diversification.

Notes to the Financial Statements (continued)**4 Management of Risk (continued)****(b) Insurance Risk (continued)****(i) Underwriting Risk (continued)**

The Syndicate's largest exposures to natural catastrophe 1 in 250 year stress events, gross and net basis at 31 December 2021 are:

Territory	Peril	Gross £m	Net £m
Caribbean	Tropical Cyclone	92.9	58.7
USA	Tropical Cyclone	27.4	15.9
Caribbean	Earthquake	14.0	11.9
Australia	Earthquake	14.2	11.9
Australia	Severe Thunderstorm	11.0	9.4
Japan	Earthquake	7.9	6.7
USA	Earthquake	19.3	5.6
Europe	Earthquake	8.4	4.8
Central Europe	Flood	8.4	4.2
Canada	Earthquake	4.9	3.8

In common with all insurers, the Syndicate is exposed to price volatility. However, the Syndicate is firm in its resolve to exit business that is unlikely to generate underwriting profit. Additionally, the Syndicate alters its appetite for the lines of business and the layers it writes within them in response to market conditions.

The Syndicate writes a significant amount of premium income through coverholder arrangements to whom binding authority is given to accept risks on behalf of the Syndicate. This delegation is strictly controlled through tight underwriting guidelines and limits, and extensive monitoring, review and audits.

(ii) Reserving and Claims Risk

The Syndicate's claims teams are focused upon delivering quality, reliability and speed of service to both internal and external clients. Their aim is to adjust and process claims in a fair, efficient and timely manner, in accordance with the policy's terms and conditions, the regulatory environment, and the Syndicate's broader interests. Our objective is to set prompt and accurate estimated amounts for claims reported ("case reserves") for all known claims liabilities, including provisions for expenses.

The Syndicate operates to a prudent best estimate reserving philosophy. Reserve estimates are derived by the internal actuary after consultation with individual underwriters, claims team, actuarial analysis of the loss reserve development and comparison with market benchmarks. The objective is to produce reliable and appropriate estimates that are consistent over time and across classes of business. The internal actuary's loss assessments are peer reviewed by internal and external actuaries. Where legal disputes are reflected in the book's history, reserves are established taking these into account. Larger disputes are reviewed individually in conjunction with the claims team and legal advice received. Reserves are not discounted for the time value of money.

The following table shows the impact of an increase or reduction in claims handling expense and number of IBNR claims, on the profit or loss account.

Notes to the Financial Statements (continued)**4 Management of Risk (continued)****(b) Insurance Risk (continued)**

	Claims inflation assumption £000		Claims handling expenses £000		Number of IBNR claims £000	
	+5% increase	-5% reduction	+10% increase	-10% reduction	+5% increase	-5% reduction
2021 Impact on profit after tax and equity						
Gross of Reinsurance	(20,705)	20,705	(363)	363	(13,104)	13,104
Net of Reinsurance	(14,572)	14,572	(363)	363	(9,348)	9,348
2020 Impact on profit after tax and equity						
Gross of Reinsurance	(18,805)	18,805	(427)	427	(11,148)	11,148
Net of Reinsurance	(13,282)	13,282	(427)	427	(7,887)	7,887

(iii) Ceded Reinsurance Risk

Reinsurance risk to the Syndicate arises where reinsurance contracts put in place to reduce gross insurance risk do not perform as anticipated, resulting in coverage disputes or prove inadequate in terms of the vertical or horizontal limits purchased. The Syndicate's reinsurance programmes are determined from the underwriting team business plans and seek to protect Syndicate capital from an adverse volume or volatility of claims on both a per risk and per event basis. In 2021, the Syndicate bought a combination of proportional and non-proportional reinsurance treaties and facultative reinsurance to reduce the maximum net exposure. The Syndicate aims to establish appropriate retention levels and limits of protection that are consistent with keeping within the Board's risk tolerance and achieving the target rates of return. The efficacy of protection sought is assessed against the cost of reinsurance, taking into consideration current and expected market conditions.

The Syndicate's reinsurance philosophy is to:

- Provide stable, sustainable core capacity for each product line with non-core reinsurance purchased when market conditions allow;
- Reduce volatility;
- Achieve a broad spread of well rated security;
- Purchase reinsurance to limit exposure from maximum line sizes and accumulations with Catastrophe limits purchased up to our risk appetite;
- Utilise AIR as the standard model throughout ACGL;
- Comply with the guidance from the ACGL Security Committees;
- Apply common standards throughout ACGL;
- Consider hard and soft factors such as ability to pay and willingness to pay;
- Set cession limits by reinsurer and by lines of business; and
- Strive for 100% of security rated A- or higher.

The Syndicate also benefits from an internal quota share with Arch Reinsurance Ltd., the level of which is set at 15.0% of premiums and claims.

Notes to the Financial Statements (continued)**4 Management of Risk (continued)****(c) Operational Risk**

Management continually review potential operational risk factors and has enacted controls to meet these. They have been classified as follows:

Operational Risk Classification	Description
People	Loss of staff (underwriting and key non-underwriting) or inability to recruit; issues concerning integrity and competence of staff, including training; succession; manual inputting error; lack of management supervision; inadequate performance and or failure of escalation to management; and data protection breach or loss.
Processes	Inappropriate underwriting; inappropriate claims and reserve handling; inappropriate reinsurance purchasing; inadequate performance or failure of a third-party supplier; inadequate segregation of duties; inadequate management information; weak processing controls; and failure of corporate governance.
Systems (including Cyber Attack)	Hardware/software failure; network telecommunications software; IT third-party provider inadequate performance or failure; inadequate virus protection; inadequate system or security information; insufficient or untested business continuity processes; insufficient processing capacity; system breach defects; and systems error.
External events, including physical security and business continuity	Natural or man-made disasters leading to business continuity threat; external financial crime, including theft or fraud; changes to the regulatory environment; external security breach; and power outage.
Outsourcing, including delegated underwriting	Inadequate performance or failure of an outsourced service provider, including breach of agreement.
Financial crime, including Anti-Money Laundering	Internal or external fraud; electronic crime; money laundering; terrorist financing; bribery and corruption; market abuse; and insider dealing.
Legal	Risk of loss resulting from failure to comply with laws as well as prudent ethical standards and contractual obligations. It also includes the exposure to litigation from all aspects of the Syndicate's activities.

The operational risk profile is reviewed by the Risk Committee and the controls to mitigate the risks are included in the Risk Register. Risk owners are required to report to the Risk Committee and review the relevant risks and are responsible for identifying new, emerging or changing risks and any subsequent control changes required to realign the risks with the risk appetite. When measuring operational risk, both quantitative factors, in the form of the probable loss, and qualitative factors, in the form of an assessment of the likely reputational impact or the ability of the Syndicate to deliver its service, are taken into account and contribute to determining the risk tolerance.

In respect of one of our largest operational risks, failure of an outsourced service provider, we have formal Service Level Agreements and monitoring processes in place for all key outsourced providers including IT service providers and coverholders. We also have a formal disaster recovery plan in place that deals with both workspace recovery and the retrieval of communications, IT systems and data if a major problem occurred. These procedures would enable us to move the affected operations to alternative facilities very quickly. The disaster recovery plan is tested regularly.

Identifying, planning for and controlling emerging risks is an important part of our risk management activity across all aspects of our business, including underwriting, operations and strategy. We make a significant effort to try to identify material emerging threats to the Syndicate. It is a core responsibility of each of our committees and we believe we take all reasonable steps to minimise the likelihood and impact of emerging risks and to prepare for them in case they occur.

Notes to the Financial Statements *(continued)***4 Management of Risk** *(continued)***(d) Market Risks**

Our investment results are subject to a variety of risks, including changes in the business, financial condition or results of operations of the entities in which we invest, as well as changes in general economic conditions and overall market conditions. Valuations of investments are also exposed to potential loss from various market risks, including changes in equity prices, interest rates, and exchange rates.

The Syndicate's primary investment objective is to preserve capital and to ensure adequate liquidity for settling policyholder claims, while also providing a return that meets or exceeds the total return of the assigned benchmark for each portfolio. Technical funds, those funds held for reserves, are invested primarily in high quality bonds and cash. The high quality and short duration of these funds allows the Syndicate to meet its aim of paying valid claims quickly. These funds, as far as possible, are maintained in the currency of the original premiums for which they are set aside to reduce foreign exchange risk.

Market risk also encompasses the risk of default of counterparties, which is primarily with issuers of bonds in which we invest. Our third-party investment managers are issued guidelines as to the type and nature of bonds in which to invest.

The value of the Syndicate's fixed-income securities is inversely correlated to movements in market interest rates. If market interest rates fall, the fair value of the fixed-income investments would tend to rise and vice versa, assuming that credit spreads remain constant.

The sensitivity of the price of a bond is also closely correlated to its duration. The longer the duration of a security, the greater its price volatility.

(i) Interest Rate shift in basis Points

Interest rate risk	2021	2020
	£000	£000
Impact of 50 basis point increase on result	(1,325)	(2,984)
Impact of 50 basis point decrease on result	950	486
Impact of 50 basis point increase on net assets	(1,325)	(2,984)
Impact of 50 basis point decrease on net assets	950	486

(e) Currency Risk

The Syndicate is exposed to currency risk in respect of liabilities under insurance policies and reinsurance recoverable debtors under reinsurance policies, denominated in currencies other than sterling. The most significant currencies to which the Syndicate is exposed are the USD, the AUD and the EUR.

The Syndicate seeks to mitigate the risk by matching the estimated foreign currency denominated liabilities with assets denominated in the same currency. Assets and liabilities are appropriately matched and as such, the impact to the net result of the Syndicate through movements in the exchange rates between GBP, USD, AUD and EUR are mitigated. (See note 4 (g) for asset liability matching table).

(f) Credit Risk

Exposure to credit risk arises from financial transactions with counterparties including debtors, borrowers, brokers, policyholders, reinsurers and guarantors. The Syndicate uses the credit ratings assigned to particular counterparties to measure credit risk.

To lessen the risk of the Syndicate's exposure to any particular reinsurer, exposure limits are approved. On behalf of the Syndicate, ACGL has developed processes to formally examine all reinsurers before entering into new business arrangements.

Notes to the Financial Statements (continued)**4 Management of Risk (continued)****(f) Credit Risk (continued)**

The Syndicate has established guidelines for its investment managers regarding the type, duration and quality of investments within the Syndicate guidelines. The performance of investment managers is regularly reviewed to confirm adherence to these guidelines.

(i) Credit distribution of invested assets and cash

	2021	2021	2020	2020

(g) Liquidity Risk

The Syndicate's whole account quota share reinsurance contract is denominated in the underlying settlement currencies of the Syndicate: Pounds Sterling ("GBP"), Euros ("EUR"), U.S. Dollars ("USD"), and Australian Dollars ("AUD"). The reinsured liabilities are matched by the currency assets held in a reinsurance trust fund and this provides currency risk mitigation. The reinsurance trust fund is also available to cash calls by the Syndicate and thereby supports its liquidity risk exposure.

The Syndicate is exposed to daily calls on its available cash resources, principally from claims arising from its insurance business. Liquidity risk arises where cash may not be available to pay obligations when due and maintain a liquidity position. The Syndicate's approach is to manage its cash flows so that it can reasonably survive a significant loss event. This means that the Syndicate maintains sufficient liquid assets, or assets that can be translated into liquid assets at short notice and without capital loss, to meet expected cash flow requirements. These liquid funds are regularly monitored using cash flow forecasting to ensure that surplus funds are invested to achieve a higher rate of return. Regular cash flow monitoring ensures that maturing deposits are sufficient to meet cash calls. Additionally, intra-group reinsurance obligations are secured by funds deposited into a trust account to fund an amount equal to at least 100% of the obligations to the Syndicate.

We run stress tests to estimate the impact of a major catastrophe on our cash position in order to identify any potential issues. We also run scenario analyses that consider the impact on our liquidity should a number of adverse events occur simultaneously, such as an economic downturn and declining investment returns combined with unusually high insurance losses.

Our investment policy recognises the demands created by our underwriting strategy, so that some investments may need to be realised before maturity or at short notice. Hence a high proportion of our investments are in liquid assets, which reduces our risk of making losses because we may have to sell assets quickly.

Notes to the Financial Statements (continued)**4 Management of Risk (continued)****(g) Liquidity Risk (continued)**

The Syndicate has maintained and continues to maintain excellent liquidity. Liquidity projections are performed on a weekly basis, taking into account any large-loss notifications received. Where a large loss would lead to a strain on the Syndicate's liquidity, the Syndicate has the ability to cash call on the Intercompany Quota Share with Arch Reinsurance Limited ("ARL") ahead of settlement of the claim, supporting the liquidity needs of the Syndicate.

Asset Liability Matching

The Syndicate reviews currency asset and liability positions on a regular basis. The currency net assets / (liabilities) positions denote the Syndicate's foreign exchange risk as a result of the translation of subordinated currency positions that are different to the reporting currency of the Syndicate. The main subordinate trading currencies are EUR, USD and AUD. The following table describes the net assets / (liabilities) positions at the year end.

	GBP	USD	EUR	CAD	AUD	JPY	OTH	Total
	£000	£000	£000	£000	£000	£000	£000	£000

Notes to the Financial Statements (continued)**4 Management of Risk (continued)****(g) Liquidity Risk (continued)**

The Syndicate manages the impact of currency fluctuations by attempting to ensure currency matching is maintained where feasible. In addition, as part of this process, currency trades may be made to maintain the desired currency net asset allocations. The Syndicate has established foreign exchange facilities with a number of banks to cater for these transactions.

Exchange Sensitivity Analysis

The following table describes the sensitivity to currency change on net assets.

	EUR Net Assets in GBP			USD Net Assets in GBP			AUD Net Assets in GBP		
	£000	+10% increase	-10% increase	£000	+10% increase	-10% increase	£000	+10% increase	-10% increase
Net assets/(liabilities) at 31 December 2021	(24,312)	(2,431)	2,431	(4,504)	(450)	450	(1,796)	(180)	180
Net assets/(liabilities) at 31 December 2020	(5,021)	(502)	502	8,681	868	(868)	975	98	(98)

The above sensitivity analysis is based on the way the Syndicate manages the currencies exposure. The increase shown in the table above reflects the weakening of the currency shown against sterling and a decrease reflects the strengthening of the currency against sterling.

(h) Counterparty Credit Risk

With regard to premium debtor risk, the Syndicate ensures that all brokers are subject to a due diligence protocol and that they have terms of business agreements in place. An approval system also exists for new brokers, and broker performance is regularly reviewed. System exception reports highlight trading with non-approved brokers, and the Syndicate's credit control team regularly monitors the ageing and collectability of debtor balances. Bank credit ratings and concentrations are also monitored at the Investment Committee.

The largest single reinsurer counterparty is Arch Reinsurance Ltd. in respect of the internal quota share reinsurance. The internal reinsured claims outstanding in the Credit distribution of reinsurance receivables table above (Page 31) are included within the balance that has a credit rating of 'A+'. The balances due from Arch Reinsurance Ltd. have further security in the form of a segregated trust to secure the liabilities. The value of the trust fund is required at all times to be greater than the reinsured liabilities, and the assets in trust are required to be invested to meet PRA admissibility rules. Bank credit ratings are monitored by the Investment Committee.

In addition, the Company monitors all key counterparties, including exposures to banking counterparties, on an ongoing basis.

Notes to the Financial Statements *(continued)*

4 Management of Risk *(continued)*

(i) Regulatory Risk

This risk is affected by changes in law and regulations which are not identified, understood, or are inappropriately and incorrectly interpreted, or adopted, or business practices are not efficiently modified. Further, there is a risk that current legal or regulatory requirements are not complied with. Arch runs a robust Compliance function to ensure that the Syndicate has appropriate systems and controls in place to comply with all applicable regulations. The Syndicate has a constructive and open relationship with its regulators.

(j) Conduct Risk

Conduct risk describes the Syndicate's behaviour that aims to provide appropriate products to the right group of consumers that achieve fair outcomes. The Syndicate's approach starts with our strong culture which means we consider and understand the needs of our customers and form an important cultural base to getting this right. From a risk management perspective, we facilitated the development of the conduct objective, the conduct risk appetite and the standards required to remain within this risk appetite. We are able to extract conduct-related controls from the risk register to provide the Board with assurance that the expected behaviours towards customers are being demonstrated.

(k) Reputational Risk

Reputational risk is the risk of negative publicity as a result of the Syndicate's contractual arrangements, customers, products, services and other activities. Key sources of reputational risk include operation of a Lloyd's franchise and reliance upon the Arch brand in the United States, Europe and Australia. The Syndicate's preference is to minimise reputational risks, but where it is not possible or beneficial to avoid them, we seek to minimise their frequency and severity by management through public relations and communication channels.

(l) Capital Risk

The Syndicate uses an Internal Capital Model for setting economic capital along with a number of other uses. The Syndicate follows a risk-based approach to determine the amount of capital required to support its activities. Recognised stochastic modelling techniques are used to measure risk exposures, and capital to support business activities is allocated according to risk profile. Stress and scenario analysis is regularly performed, and the results are documented and reconciled to the Board's risk appetite where necessary.

Capital framework at Lloyd's

Lloyd's is a regulated undertaking and subject to supervision by the PRA under the Financial Services and Markets Act 2000 and in accordance with the Solvency II Directive.

Within this supervisory framework, Lloyd's applies capital requirements at member level and centrally to ensure that Lloyd's complies with Solvency II, and beyond that to meet its own financial strength, licence and ratings objectives.

Although, as described below, Lloyd's capital setting processes use a capital requirement set at syndicate level as a starting point, the requirement to meet Solvency II and Lloyd's capital requirements apply at overall and member level, not at syndicate level. Accordingly, the capital requirement in respect of Syndicate 2012 is not disclosed in these annual accounts.

Lloyd's capital setting process

In order to meet Lloyd's requirements, each syndicate is required to calculate its Solvency Capital Requirement ("SCR") for the prospective underwriting year. This amount must be sufficient to cover a 1 in 200 year loss, reflecting uncertainty in the ultimate run-off of underwriting liabilities (SCR 'to ultimate').

The Syndicate must also calculate its SCR at the same confidence level but reflecting uncertainty over a one-year time horizon (one-year SCR) for Lloyd's to use in meeting Solvency II requirements. The SCRs of each syndicate

Notes to the Financial Statements (continued)**4 Management of Risk (continued)****(l) Capital Risk (continued)***Lloyd's capital setting process (continued)*

are subject to review by Lloyd's and approval by the Lloyd's Capital and Planning Group. Over and above this, Lloyd's applies a capital uplift to the Member's capital requirement, to derive the Economic Capital Assessment ("ECA"). The purpose of this uplift, which is a Lloyd's not a Solvency II requirement, is to meet Lloyd's financial strength, licence and ratings objectives.

Provision of capital by the member

The member may provide capital to meet its ECA through any mixture of (i) assets held in trust by Lloyd's specifically for that member (FAL), (ii) assets held in and managed within a syndicate (FIS), or (iii) undistributed member's balances.

Historically, Arch Syndicate Investments Limited ("ASIL") was the sole member of Syndicate 2012 and previously deposited capital at circa 50% FIS and 50% FAL. Following Arch Group's acquisition of the Barbican Group, ASIL became the go forward capital provider for both Syndicate 2012 and Syndicate 1955 for the 2021 underwriting year. The fact that ASIL is now participating across two Syndicates necessitated the need to move from FIS to FAL. This transfer has been completed during Q2 2021, and this is the main reason why net assets reduced from £116.5m as at 31 December 2020 to £34.7m as at 31 December 2021.

Capital Management

The Board of AMAL has in place policies and procedures for managing compliance with regulatory capital requirements and its own capital management objective. This objective is to balance risk and return while maintaining economic and regulatory capital in accordance with risk appetite. The Board of AMAL has no appetite for the Syndicate failing to maintain sufficient capital. To this end, AMAL recalculates its ECA routinely at different points during the annual business cycle, and may also recalculate the ECA on an ad hoc basis if the risk management framework identifies significant changes to the risk profile, or as required by the Board.

(m) Risk Arising out of the COVID-19 Pandemic

Throughout 2021 the COVID-19 pandemic has continued to develop although changes to policy wordings and underwriting standards have removed most direct exposure to further losses. Whilst reducing over time as claims are settled, the Syndicate's exposure to COVID-19 losses remains material and continues to be monitored closely through the quarterly reserving cycle.

In addition to the reserve risk arising out of the COVID-19 pandemic, there is also potential indirect risks. These risks include second order impacts on the economy (e.g., as Governments withdraw financial support), the insurance industry and individual classes of business, such as economic disruption, interest rate and currency volatility, increased risk of security defaults and potential operational disruption to businesses. The Syndicate continues to monitor these potential risks as the political and economic landscape evolves.

Notes to the Financial Statements (*continued*)

5 Critical accounting judgements and estimation uncertainty

The preparation of the financial statements in conformity with the Generally Accepted Accounting Practice in the UK ("UK GAAP"), requires management to make judgements, estimates and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates and judgements.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected. These disclosures supplement the commentary on insurance and financial risk management in the Strategic Report.

(i) *Key sources of estimation uncertainty*

The areas of the Syndicate's business containing key sources of estimation uncertainty include the measurement of insurance and reinsurance assets and liabilities at the balance sheet date. The most significant of these involves the valuation of outstanding claims and, in particular, the provision for claims incurred but not reported.

The processes used to determine the assumptions on which the measurement of insurance contract provisions is based, actual assumptions used, the effects of changes in assumptions, and an analysis of sensitivity to changes in assumptions are described below.

(ii) *Process used to determine the assumptions for measuring insurance contracts*

Claims Outstanding, i.e. loss reserves for the Syndicate are comprised of (1) case reserves and (2) IBNR losses. Claims personnel determine whether to establish a case reserve for the estimated amount of the ultimate settlement of individual claims. The estimate reflects the judgement of claims personnel based on general corporate reserving practices, the experience and knowledge of such personnel regarding the nature and value of the specific type of claim and, where appropriate, advice of counsel. The Syndicate also contracts with a number of outside third-party administrators in the claims process who, in certain cases, have limited authority to establish case reserves. The work of such administrators is reviewed and monitored by internal claims personnel.

Loss Reserves are also established to provide for loss adjustment expenses and represent the estimated expense of settling claims, including legal and other fees and the general expenses of administering the claims adjustment process. Periodically, adjustments to the reported or case reserves may be made as additional information regarding the claims is reported or payments are made. IBNR reserves are established to provide for incurred claims which have not yet been reported to an insurer or reinsurer at the balance sheet date, as well as to adjust for any projected variance in case reserving. IBNR reserves are derived by subtracting paid losses and loss adjustment expenses and case reserves from estimates of ultimate losses and loss adjustment expenses. Actuaries estimate ultimate losses and loss adjustment expenses using various generally accepted actuarial methods applied to known losses and other relevant information. Like case reserves, IBNR reserves are adjusted as additional information becomes known or payments are made. The process of estimating reserves involves a considerable degree of judgement by management and, as of any given date, is inherently uncertain.

Ultimate losses and loss adjustment expenses are generally determined by extrapolation of claim emergence and settlement patterns observed in the past that can reasonably be expected to persist into the future. The Syndicate uses several methods for determining its reserves. These methods generally fall into one of the following categories or are hybrids of one or more of the following categories:

Notes to the Financial Statements (continued)

5 Critical accounting judgements and estimation uncertainty (continued)

(ii) Process used to determine the assumptions for measuring insurance contracts (continued)

Expected loss methods – these methods are based on the assumption that ultimate losses vary proportionately with premiums. Expected loss and loss adjustment expense ratios are typically developed based upon the information derived by underwriters and actuaries during the initial pricing of the business, supplemented by industry data available from organisations, such as statistical bureau and consulting firms, where appropriate. These ratios consider, among other things, rate increases and changes in terms and conditions that have been observed in the market. Expected loss methods are useful for estimating ultimate losses and loss adjustment expenses in the early years of long-tailed lines of business, when little or no paid or incurred loss information is available, and is commonly applied when limited loss experience exists for a syndicate.

Historical incurred loss development methods – these methods assume that the ratio of losses in one period to losses in an earlier period will remain constant in the future. These methods use incurred losses (i.e. the sum of cumulative historical loss payments plus outstanding case reserves) over discrete periods of time to estimate future losses. Historical incurred loss development methods may be preferable to historical paid loss development methods because they explicitly take into account open cases and the claims adjusters' evaluations of the cost to settle all known claims. However, historical incurred loss development methods necessarily assume that case reserving practices are consistently applied over time. Therefore, when there have been significant changes in how case reserves are established, using incurred loss data to project ultimate losses may be less reliable than other methods.

Bornhuetter-Ferguson ("B-F") paid and incurred loss methods – these methods utilise actual paid and incurred losses and expected patterns of paid and incurred losses, taking the initial expected ultimate losses into account to determine an estimate of expected ultimate losses. The B-F paid and incurred loss methods are useful when there are few reported claims and a relatively less stable pattern of reported losses.

Additional analyses – other methodologies are often used in the reserving process for specific types of claims or events, such as catastrophic or other specific major events, including COVID-19. These include vendor catastrophe models, which are typically used in the estimation of Loss Reserves at the early stage of known catastrophic events before information has been reported to an insurer or reinsurer, and analyses of specific industry events, such as large lawsuits or claims.

The selection of a method to determine the Syndicate's reserves is driven by not only the characteristics of the lines of business, but also by the development stage of the years of account and the availability, credibility and relevance (for future projection) of in-house or benchmark data. For short-tail lines of business, such as Property and Offshore Operating, reserves will mostly be calculated using the expected loss ratio method for the most recent year of account, unless early loss experience necessitates an upward deviation, before moving to the more data-driven methods for more mature years. For long-tail lines of business, typically the Casualty and D&O classes, reflecting slower loss emergence and settlement, the expected loss ratio method is usually applied for longer than 1 year, unless early loss experience necessitates an upward deviation, before allowing for benign claims experience using more data-driven methods.

(iii) Premium Accruals

Where bordereaux for binders are not received on a timely basis, premium accruals are created by the underwriting teams on a quarterly basis. The accruals are based on a combination of assessment of previous premium bookings and consultation with the delegated underwriting authorities. Accruals are monitored on an ongoing basis by the underwriting teams and finance.

Unrealised (loss) / gain on investments	(1,946)	789
Total Investment (loss) / income	(1,305)	4,515

Notes to the Financial Statements (continued)**9 Directors' Remuneration and Employee Costs***(a) Directors' remuneration*

The Directors of AMAL and the Active Underwriter received the following aggregate remuneration charged to the Syndicate during the year:

	2021	2020
	£000	£000
Directors of the Managing Agent	2,168	991
Active Underwriter	107	105

Further information in respect of the Directors of AMAL is provided in that Managing Agent's financial statements.

(b) Employee Costs

The average number of staff employed by Arch Europe Insurance Services Ltd ("AEIS"), but working for the Syndicate during the year, analysed by category is as follows:

	2021	2020
Underwriting	42	40
Administration and finance	76	51
Claims	16	15
	134	106

The Managing Agent has a service and secondment agreement with AEIS, whereby staff employed by AEIS are provided to the Managing Agent.

	2021	2020
	£000	£000
Salaries	12,433	9,151
Social security costs	1,825	1,238
Other pension costs	1,022	792
	15,280	11,181

10 Other Debtors and Creditors

	2021	2020
	£000	£000
Amounts due from associated undertakings	8,189	7,522
Amounts due to associated undertakings	(13,589)	(4,883)
	(5,400)	2,639

11 Other Assets

	2021	2020
	£000	£000
Claims Funds	11,434	11,408
	11,434	11,408

Notes to the Financial Statements (continued)**12 Accruals and Deferred Income**

	2021	2020
	£000	£000
Deferred ceding commissions	10,656	9,872
	10,656	9,872

13 Financial Investments

	Fair Value	Cost	Fair Value	Cost
	2021	2021	2020	2020
	£000	£000	£000	£000
Shares and other variable-yield securities

15 Funds at Lloyd's (FAL)

FAL are intended primarily to cover circumstances where syndicate assets prove insufficient to meet participating member's underwriting liabilities. The level of FAL that Lloyd's requires a member to maintain is determined by Lloyd's based on PRA requirements and resource criteria. FAL has regard to a number of factors including the nature and amount of risk to be underwritten by the member and the assessment of the reserving risk in respect of business that has been underwritten. Since FAL is not under the management of the Managing Agent, no amount has been shown in these financial statements by way of such capital resources. However, the Managing Agent is able to make a call on the member's FAL to meet liquidity requirements or to settle losses through a formal process controlled by Lloyd's.

Arch Syndicate Investments Ltd is the sole Member of Syndicate 2012 and for the 2021 Year of Account is also providing capital on behalf of Syndicate 1955. The FAL for both Syndicates as set by Lloyd's, has been funded through a combination of collateralised letters of credit, investments and cash.

As already mentioned in note 4, a FIS to FAL transfer took place during Q2 2021 and both Syndicates are now supported by FAL only.

Collateralised letters of credit totalling £169.8m (2020: £147.9m) are provided by Arch Reinsurance Ltd. on behalf of Arch Syndicate Investments Ltd, supporting the capital requirement of Syndicate 2012 and the 2021 underwriting year of Syndicate 1955, and hence do not form part of these financial statements.

Notes to the Financial Statements *(continued)***16 Related Parties**

Syndicate 2012 is managed by AMAL. The Directors of AMAL regard ACGL, a company incorporated in Bermuda, as the ultimate holding company and controlling party. This is the largest company into which the Syndicate's results are consolidated. Copies of the consolidated financial statements of ACGL can be obtained from The Secretary, Arch Capital Group Ltd, Waterloo House, Ground Floor, 100 Pitts Bay Road, Pembroke HM 08, Bermuda. Arch Reinsurance Ltd. Is the smallest company into which the Syndicate's results are consolidated.

Arch Reinsurance Ltd.

Syndicate 2012 has a whole account quota share reinsurance contract of 15.0% (2020: 15.0%) with Arch Reinsurance Ltd. The Syndicate ceded £43.0m (2020: £37.2m) of net written premiums during the 2021 financial year. The effect of the quota share contract reduced net losses incurred by £4.7m (2020 reduced by £1.6m) in the 2021 financial year.

Arch Managing Agency Limited ("AMAL")

AMAL is the Managing Agent of Syndicate 2012 as of 31 August 2020. During 2021 the Syndicate paid the Managing Agent £415,000 (2020: £103,750) as a managing agency fee. The Managing Agent entered into a service and secondment agreement with Arch Europe Insurance Services Ltd ("AEIS"), whereby AEIS provides services in the form of staff and facilities to the Managing Agent.

Arch Underwriting at Lloyd's (Australia) Pty Ltd ("AUALA")

This service company is wholly owned by the Managing Agent and is authorised to bind business on behalf of Syndicate 2012. During 2021 AUALA has bound £48.9m (2020: £38.5m) of gross written premiums on behalf of Syndicate 2012. The Syndicate has incurred a net profit of £3.1m (2020: profit £1.6m) on the business bound by the service company for the year ended 31 December 2021.

Arch Syndicate Investments Ltd

The Syndicate is supported by Arch Syndicate Investments Ltd, which provides 100% of its underwriting capacity, see note 15 Funds at Lloyd's.

Arch Underwriting Agency (Australia) Pty. Ltd ("AUAAPL")

This service company is wholly owned by the AMAL, the Managing Agent, and is authorised to bind business on behalf of Syndicate 2012. During 2021 AUAAPL has bound £nil (2020: £nil) of gross written premiums on behalf of Syndicate 2012. The gross written premiums in 2021 are aggregated within the AUALA bound premiums and therefore form part of the £48.9m total. (2020: £38.5m).

Castel Underwriting Agencies Limited ("Castel")

Castel is a Managing General Agent ("MGA") that has been granted underwriting authority to underwrite business on behalf of Syndicate 2012. During 2021, the MGA wrote £7.7m gross written premium (2020: £6.2m).

Ventus Risk Management Inc. ("Ventus")

Ventus is a Managing General Underwriter ("MGU") that has been granted underwriting authority to underwrite business on behalf of Syndicate 2012. During 2021, the MGU wrote £6.1m gross written premium (2020: £6.4m).

Notes to the Financial Statements *(continued)***17 Post Balance Sheet Event**

The developing conflict with Ukraine continues to be closely monitored. The Syndicate has exposure, in particular from policies covering political violence and war. This exposure is protected by reinsurance where gross losses are expected to be covered by the reinsurance in place. The current estimate of potential losses are not expected to be significant. Premiums written on a number of classes of business could be impacted in 2022 following the introduction of sanctions but will not impact on the overall operations of the Syndicate.
