### **APPENDIX 4**

COMPANY SIGNING MESSAGE

**COYTAP CONVERSION TABLES**

These are no longer used.

**APPENDIX 5- SEGMENT USAGE GUIDELINES**

**CTA CONTACT DETAILS**

## COMPANY SIGNING MESSAGE

Each CTA Segment contains details of one contact concerning the transaction.

The purpose of the contact is defined in CONTACT FUNCTION CODE.

CTA segments only appear in location 05 in the message, where it is used to provide the Broker's contact name and telephone number.

## **APPENDIX 5- SEGMENT USAGE GUIDELINES**

### **CUX CURRENCY DETAILS**

Each set of currency details occupies one CUX segment.

CUX segments appear in 2 places in the message:

1. **In location 10** they are used to provide the original and settlement currencies for the transaction, together with the rate of exchange used for conversion.

Both currencies, and a rate of exchange will always be provided here, even when the currencies are the same or there is parity between them.

For rate of Exchange Listing Scheme transactions, the Rate of Exchange is the Revised rate rather than the actual conversion rate. Both the reference and target currency will be shown as GBP.

2. **In location 17** they are used to provide other currency codes and rates of exchange concerning the transaction.

This only applies to Excess of Loss Premium and Excess of Loss Adjustment transactions, where currency for conversion and Rate of Exchange for conversion are provided. The target currency here will be the currency of the TOTAL PREMIUM.

The Reference currency will be the original currency for the transaction.

## COMPANY SIGNING MESSAGE

**APPENDIX 5- SEGMENT USAGE GUIDELINES**

**DTM DATE/TIME DETAILS**

Each date occupies one DTM segment. The purpose of the date is defined by DATE/TIME QUALIFIER .

All dates will be presented in the format CCYYMMDD.

DTM segments appear in 3 places in the message:

1. **In location 12** they are used to provide the actual payment dates for settlement of accounts. Details of up to 36 instalments may be provided here.

Note: 1. Where the due date for a deferred instalment is beyond the range of the ILU settlement calendar the DTM segment provided here will contain a date of 99999999.

2. Since the ILU does not automatically release the reserve instalments for settlement, the DTM segment supplied with these will not contain a date.

2. **In location 20** they are used to provide general date information concerning the transaction (e.g. LOSS DATE FROM).

3. **In location 26** they are used to provide instalment due dates.

This only applies to: Premium/AP/RP  
Excess of Loss Premium  
Excess of Loss Adjustments  
Proportional Treaty Statement

The date here will appear as either INSTALMENT DUE DATE or EXPECTED RELEASE OF RESERVE DATE, depending upon the type of instalment.

**APPENDIX 5- SEGMENT USAGE GUIDELINES**

**FTX FREE TEXT DETAILS**

Each FTX segment contains up to 5 lines of 70 characters. The purpose of the text is defined by TEXT SUBJECT CODE.

FTX segments appear in 2 places in the message:

1. **In location 23** they are used to provide general free form information.

Where it is noted in section 5 that a text element can consist of more than one line this may result in repeating FTX segments being sent for that element.

For example, TRANSACTION DETAILS may consist of up to 16 lines of text. The first 5 lines would be contained in one FTX segment. Any further lines would require a second FTX segment to be sent.

2. **In location 28** they are used to provide TREATY LOSS DETAILS. This only applies to Proportional Treaty Statement, for which up to 8 individual losses may be reported.

Here the segment contains structured data:

LINE 1 contains the Date of Loss, formatted as CCYYMMDD, in the first 8 characters.

LINE 2 contains the Date of Loss Narrative, if any.

LINE 3 contains the Name of Loss.

LINE 4 contains the Nature of Claim.

LINE 5 contains the Loss Details

**APPENDIX 5- SEGMENT USAGE GUIDELINES**

## COMPANY SIGNING MESSAGE

### **FTX FREE TEXT DETAILS**

### **CLAIM/REFUND – TRANSACTIONS NOT PROCESSED THROUGH CLAMS**

The design of the new signing message anticipates that all claims and refunds will in due time be processed through CLAMS.

No attempt has been made to accommodate LCCF fields which will become redundant when ILU data capture of these forms' ceases.

In the meantime, for LCCF claims (i.e., those which do not have a UCR), the COYTAP items below should be mapped into ILUCSM as follows:

COYTAP ITEM 516	will appear in LOSS DETAILS
COYTAP ITEM 521	will appear in TRANSACTION DETAILS (LINE 1)
COYTAP ITEM 523	will appear in TRANSACTION DETAILS (LINE 2)
COYTAP ITEM 524	will appear in TRANSACTION DETAILS (LINE 3)
COYTAP ITEM 525	will appear in TRANSACTION DETAILS (LINE 4)
COYTAP ITEM 543	will appear in TRANSACTION DETAILS (LINE 5)
COYTAP ITEM 544	will appear in TRANSACTION DETAILS (LINE 6)
COYTAP ITEM 545	will appear in TRANSACTION DETAILS (LINE 7)

## **APPENDIX 5- SEGMENT USAGE GUIDELINES**

### **GID GENERAL INDICATORS**

Each GID segment contains one code or indicator. The purpose of the code/indicator is defined by CODE/INDICATOR QUALIFIER.

Where it is noted in section 5 that a code/indicator may appear more than once (e.g. Treaty type), repeating GID segments will be sent.

GID segments appear in 2 places in the message:

1. **in location 02** they are used to identify the ILU application area from which the output for the transaction has been created.

This defines the particular elements which can be provided for that transaction.

2. **In location 14** they are used to provide general coded information concerning the transaction. For example, an Excess of Loss Premium will contain formatted core record details which do not apply to an ordinary premium record.

Note: 1. Indicators are defined here as single character elements which only have the values 'Y' or 'N'.

No defaults will be assumed for indicators – they will always be supplied.

2. Codes are defined here as elements of up to three characters, having a finite list of values are either held on the ILU code tables, or are described in Section 5 of this specification.

Codal elements can only be sent if provided by the broker.

3. Some elements which would be considered codes are provided in FTX segments, as their field length exceeds the EDIFACT element length defined for the GID segment (e.g. RETENTION BASIS).

**APPENDIX 5- SEGMENT USAGE GUIDELINES**

**LOC**            **LOCATION DETAILS**

Each LOC segment contains one location, which may be coded or in plain English.

The purpose of the location is defined by LOCATION QUALIFIER.

LOC segments only appear in location 22 in the message, where they are used to provide general geographical information concerning the transaction (e.g., COUNTRY OF ORIGIN).

**APPENDIX 5- SEGMENT USAGE GUIDELINES**

**MOA**            **MONETARY AMOUNT DETAILS**

Each amount will occupy one MOA segment. The purpose of the amount is defined by MONETARY AMOUNT QUALIFIER.

All amounts will be presented in the format –9(13).99.

A leading sign will only be sent if the amount is negative. Negative amounts will only occur where a flow of money is to be indicated, and that flow is from the company to the broker.

An explicit decimal point will be provided if the amount contains any significant decimal places.

Where it is noted in section 5 that an amount may occur more than once (e.g. CURRENT ESTIMATE), repeating MOA segments will be sent.

Each MOA segment will contain the currency of the amount value provided in that segment.

Where it is necessary to send details of an amount, but an actual value cannot be given, the STATUS CODED will be used to convey the reason.

MOA segments appear in 4 places in the message:

1. **In location 13** they are used to provide the company's nett amounts for settlement. Details of up to 36 instalments for settlement may be provided here.

The company share amounts will always be given here in both the original and Settlement currency, even when these are the same.

Note

1. The type of instalment will be defined in STATUS CODED as one of:

CSH Cash  
DFD Deferred  
RSV Reserve

2. Reserve instalments for Premium /AP/RP and for Excess of Loss Premium Transactions will be included here, to complete the total premium. However, the ILU will not automatically release these for settlement.

3. Deferred instalments for a Proportional Treaty Statement will not be included here, as these transactions are settled on the basis of the account balance.

4. For Rate of Exchange Listing Scheme transactions, the original amounts are given in the settlement currency.

**APPENDIX 5- SEGMENT USAGE GUIDELINES**

**MOA MONETARY AMOUNT DETAILS** (Cont)

2. **In location 24** they are used to provide general financial information.

Amounts to support the accounting details above may be given as:

- the 100% figure in original currency
- the 100% figure in settlement currency
- the company share in original currency
- the company share in settlement currency

Both the original and settlement currency amounts will be given, even when they are the same.

Other amounts will only be given in one form, as described in Section 5 (e.g. TOTAL CLAIM AMOUNT)

3. **In location 27** they are used to provide a breakdown of each instalment payment

Amounts may be given as:

- the 100% figure in original currency
- the 100% figure in settlement currency
- the company share in original currency
- the company share in settlement currency

The company share of DEFERRED INSTALMENT NETT PREMIUM will be the same as the instalment amount given for settlement (see location 13).

This applies to:           Premium/AP/RP  
                                  Excess of Loss Premium  
                                  Excess of Loss Adjustment  
                                  Proportional Treaty Statement

Both the original and settlement currency amounts will be given, even when they are the same.

4. **In location 29** they are used to provide a breakdown of individual losses.

Amounts here will be given as a 100% figure in original currency.

This only applies to Proportional Treaty Statement, for which up to 8 individual losses may be reported.

**APPENDIX 5- SEGMENT USAGE GUIDELINES**

**PCD PERCENTAGE DETAILS**

The purpose of the percentage is defined by PERCENTAGE QUALIFIER.

PCD segments appear in 2 places in the message:

1. **In location 06** they are used to provide the share of the risk for the company and for the ILU (i.e. the sum of all ILU companies on risk)
2. **In location 21** they are used to provide details of any other percentages relating to the transaction (e.g. ADJUSTMENT RATE).

Note: 1. The use of some percentages is qualified by a ‘basis’ field which will be included in the same segment as PERCENTAGE BASIS CODED.

**APPENDIX 5- SEGMENT USAGE GUIDELINES**

**QTY QUANTITY DETAILS**

Each QTY segment contains one quantity value.

The purpose of the quantity is defined by QUANTITY QUALIFIER.

QTY segments appear in 2 places in the message.

1. **In location 11** they are used to describe the number of instalments by which the transaction is to be settled.

There will always be a minimum of one instalment, and a maximum of 36.

For Treaty Statements this will always be '1', as this type of transaction is always settled on a balance basis. However, there may be deferred instalment details to be reported in section 3, location 27.

2. **In location 16** they are used to provide details of any other counts etc. relating to the transaction (e.g. NUMBER OF REINSTATEMENTS).

**APPENDIX 5- SEGMENT USAGE GUIDELINES**

**RFF REFERENCE DETAILS**

Each RFF segment contains one reference. The purpose of the reference is defined by REFERENCE QUALIFIER.

RFF segments appear in 3 places in the message:

1. **In location 04** they are used to supply the primary references given to the transaction. by the company, by the broker, and by the ILU.

The format of the ILU reference is CCTYYSSSSSSDDMM where:

- |   |                        |                     |  |
|---|------------------------|---------------------|--|
| - | CC = Class of Business | Values:             | PM Premium<br>AP Additional Premium<br>RP Return Premium<br>CL Claim<br>CR Refund<br>CP CPA Claim<br>CA CPA Refund<br>TF Treaty FDO<br>TS Treaty Statement |
| - | T = Type of Business   | Values:             | A Aviation<br>C Cargo<br>H Hull  |
| - | YY                     | = Year of Signing   |  |
| - | SSSSSS                 | = ILU Serial Number |  |
| - | DD                     | = Day of Signing    |  |
| - | MM                     | = Month of Signing  |  |

For ILU ORIGINAL REFERENCE the class of Business Codes are limited to 'PM' and 'TF'.

**APPENDIX 5- SEGMENT USAGE GUIDELINES**

**RFF**      **REFERENCE DETAILS** (cont)

2.      **In location 08** they are used to supply the newly defined market references which are to be given to each transaction by its originator.

The use of these references has not yet been fully implemented in the London Market, and so their presence in the message cannot be guaranteed at this time.

The format of the market references is as follows:

IDENTIFIER -    A single character to define the type of organisation which initiated the transaction.

Values:	B	Broker
	X	ILU or Salvage Association
	C	ILU Company

ORIGINATOR -    A 4 character code to uniquely identify the originating organisation.

Values:	For 'B'	the Broker Code
	For 'X'	IOLU (ILU Computer)
		ICPA (ILU CPA Dept)
		SALV (Salvage Assn)
	For 'C'	the ILU Company Code

REFERENCE -    A 12 character reference allocated by the originator.

3.      **In location 19** they are used to supply any other references given to a transaction (e.g. the CPA Certificate Number).
