A valuation for the last working day of each month is available from September 2010 with daily valuations available from 2 November 2020. Transactions are available to view from 1st January 2014.

How are values displayed?

Values displayed within the portal are to 2 decimal places. In instances where a holding has more than 2 decimal places the value displayed may not equal holding x price but is the correct value for the holding.

If reconciling transactions, please ensure that the data is extracted to Excel. The Excel workbook will display 2 decimal places by default; however, you can click into each cell to see the true number of decimal places or reformat the column to extend the decimals shown.

How are transactions filtered by date?

The transactions included in the “From and To” dates parameters are filtered by column ‘Transaction Date’. Please be aware when completing your downloads that any transactions which have been backdated will not appear in your selection. To view these transactions, you will need to use a longer date parameter and use the “Post Date” column to ensure all transactions are included.

What happens if I select a future valuation or transaction date?

If a future valuation or transaction date is requested no data will be displayed.

How are Interavailable holdings displayed?

A donor member will see the interavailable holdings and values along with details of the recipient member in the ‘IA funds’ section of the valuation. They will see the interavailable funds again in the ‘own funds’ section of the valuation, and to avoid a double valuation count, these holding have a zero value.

A recipient member will see the interavailable holdings and values in the ‘IA fund’ section of their valuation along with details of the donor member.

My accrued dividends are not showing in my valuation, how do I see these?

Accrued dividends can be found on the transaction screen. If your dividends are swept to FAL, they will appear in your balance once the sweep has completed every quarter.
