
Solvency & Financial Condition Report Centrewrite Limited

For the year ended 31 December 2021

Prepared in accordance with Article 51 of the Solvency II Directive (2009/138/EC), Articles 290 to 298 of the Commission Delegated Regulation (EU) 2015/35, and Section 3 of the PRA Rulebook Solvency II Firms: Reporting Instrument 2015

April 2022

Directors' Statement in respect of the Solvency & Financial Condition Report (SFCR) – Centrewrite Limited

We, the Board, acknowledge our responsibility for preparing the SFCR in all material respects in accordance with the PRA Rules and the Solvency II Regulations.

We are satisfied that:

- a) throughout the financial year in question, the insurer has complied in all material respects with the requirements of the PRA Rules and the Solvency II Regulations as applicable to the insurer; and
- b) it is reasonable to believe that the insurer has continued so to comply subsequently and will continue so to comply in future.

Managing Director, for and on behalf of the Board

07 April 2022

Appendix – Quantitative Reporting Templates

Introduction & Summary

Business

The company was established to provide reinsurance products to The Society of Lloyd's Members. With the decline in the number of run-off syndicates operating in the Lloyd's market, the demand for Exeat policies and Reinsurance to Close ("RITC contracts") has declined.

The nature of the company's operations and its principal activities are set out below.

The primary objective of the company is to assist resigned Members of The Society of Lloyd's with participations on run-off syndicates to end their affairs at Lloyd's. The Company has no employees, with day to day operations managed on the Company's behalf by staff employed by The Society of Lloyd's.

The company's ongoing principal activities are:

- i. to provide RITC and formerly Run-Off Reinsurance contracts to syndicates with no successor syndicate.
- ii. to reinsure individual Members of The Society of Lloyd's participations on syndicates for underwriting years of account which have not been closed ("Exeat Policies") on application from a Member's agent. Given the small number of syndicates in run-off, the Company is not expected to underwrite many policies going forward.

During the year, the company did not write any RITC contracts though the company has permission from the Prudential Regulation Authority (PRA) to enter into long-term reinsurance contracts. The last time the company underwrote the RITC was 2013.

Business (cont.)

There are no notified outstanding claims and no claims paid in either 2021 or 2020 in respect of this contract. At the year end, the company had no Exeat policies reinsuring a Member with a participation in a life run-off syndicate and has no technical provisions for run-off life syndicates.

The company did not underwrite any Exeat policies in 2021 or 2020. The Exeat Policy offered is wholly underwritten by the company and, while not a formal RITC, it allows Members of The Society of Lloyd's to end their affairs at Lloyd's and so release their remaining funds at Lloyd's. The closure of many run-off syndicates has led to a reduction in the number of resigned Members and in turn this has led to a reduction in the appetite for Exeat policies.

Material changes since the last report

There have been no material changes since the last report.

Performance

The following are financial key performance indicators under UK GAAP:

- Results on the technical account of £NIL for 2021 (2020: £NIL).
- Loss on the non-technical account before taxation was £27k for 2021 (2020: £22k).
- As at 31 December 2021 the Company had £5.7m in equity shareholders' funds (2020: £5.7m).

Introduction & Summary (cont.)

System of Governance (SOG)

The SOG is set out in the Company's Governance Map, approved by the Company's Board. The Company is governed by three directors: a chairman, managing director and a non-executive director, all of whom are employees of The Society of Lloyd's. The Company's Governance Map sets out the allocation of Senior Insurance Management Functions ("SIMF") responsibilities across the Board. The Company has no sub-committees. Day to day operations of the Company, including the investment and actuarial functions, are provided by employees of The Society of Lloyd's.

The Company complies with the policies and procedures established by its parent, The Society of Lloyd's, including its ORSA Policy, Remuneration Policy, Compliance Framework, HR Policies (including assessment of Fit & Proper persons), internal systems and controls, Risk Policy and Outsourcing Policy.

Risk Profile

The directors are responsible for setting the strategy and risk appetite of the company and assessing the long-term consequences of decisions made. The risks are monitored through a risk register which is reviewed by the directors, through reporting to the directors against the key risk indicators. No risk appetites were exceeded in 2021. The principal risks of the company are the insurance risks arising from reserving, market risk and operational risks.

Valuation for Solvency Purposes

On a Solvency II basis, the Company had:

- Total assets as at 31 December 2021 of £10.6m. This comprised £5.9m of financial investments and £4.7m reinsurance recoverables; and
- Net technical provisions as at 31 December 2021 of £0.3m.

Capital management

The Company's capital objective is to maintain an appropriate level of capital to meet its regulatory requirements. This has been assessed as £5m. As at 31 December 2021, the Company's own funds on a Solvency II basis were £5.4m. This is significantly in excess of the Company's Solvency Capital Requirement ("SCR") of £0.3m (as calculated using the Standard Formula) and the Minimum Capital Requirement ("MCR") of £3.2m (as calculated using the absolute floor for a pure reinsurer of €3.6m).

	As at December	
	2021	2020
	£'000	£'000
Total available own funds to meet SCR & MCR	5,373	5,403
SCR	317	280
MCR	3,247	3,247
Ratio of Eligible own funds to SCR	16.9	19.3
Ratio of Eligible own funds to MCR	1.7	1.7

The own funds which are tiered as unrestricted level 1 are fully eligible to meet both the SCR and MCR requirements.

A Business & Performance

A.1 Business

Centrewrite Limited is a private company limited by shares and is a wholly owned subsidiary of The Society of Lloyd's. Its registered office is Council Secretariat, Lloyd's of London, One Lime Street, London, EC3M 7HA.

Both the Company and The Society of Lloyd's are supervised by the UK's Prudential Regulatory Authority ("PRA") and the Financial Conduct Authority ("FCA") with the PRA acting as lead supervisor.

The Company is audited by PricewaterhouseCoopers LLP, 7 More London Riverside, London, SE1 2RT.

The Company is a pure composite reinsurer and authorised to underwrite all lines of life and non-life reinsurance. Whilst the Company did not write any new business in 2021, it continues to offer Exeat Policies and RITC policies to Members of the Society of Lloyd's. All business is carried out in the UK.

A.2 Underwriting Performance

	2021 £'000	2020 £'000
Insurance claims		
Gross claims:		
Claims paid	(12)	(1)
Change in provisions for claims	(2,996)	(295)
Loss on gross claims incurred	(3,008)	(296)
Claims recoverable from reinsurer:		
Reinsurer's share of claims paid	12	1
Change in reinsurer's share of technical provisions	2,996	295
Gain on reinsurer's share of claims incurred	3,008	296

The net movements in the technical account arise from the provision for Exeat/EPP of £NIL. Settlement of claims and changes in provision for claims ceded by Equitas Insurance Limited on the Run-off Reinsurance of Syndicate 553's 1985 and prior years of account are fully reinsured by Equitas Reinsurance Limited, and hence have net nil impact on the technical account.

A Business & Performance (cont.)

A.3 Investment Performance

The finance income of £4k (2020: £18k) is fully derived from the Company's portion of the income earned by the Society of Lloyd's commingled funds. The following table sets out the carrying amount, by maturity, of the investments made by the funds:

Commingled Funds:

	Within 1 year 2021 £'000	Within 1 year 2020 £'000
Floating rate		
Corporate bonds	3,192	1,891
Deposits with credit institutions	134	299
Cash and cash equivalents	2,592	3,724

The Company has no investments in equities and no investments in securitisation.

A.4 Performance of other activities

The Company is not party to any material operating or finance leases as either lessee or lessor. Operating expenses have decreased from prior year to £31k (2020: £40k).

A.5 Any other information

Overall the Company made a loss after tax of £27k (2020: £18k).

The volatility in financial markets arising from the COVID-19 pandemic has not materially impacted the valuation of the assets held by Centrewrite as these are invested in short term money-market instruments.

There is no further information in regards to business and performance.

B System of Governance (“SOG”)

B.1 General information on the SOG

The SOG is set out in the Company’s Governance Map, approved by the Company’s Board. The Company is governed by three directors: a chairman, managing director and a non-executive director, all of whom are employees of The Society of Lloyd’s. The Company’s Governance Map sets out the allocation of SIMF responsibilities across the Board.

The Company has no sub-committees. Day to day operations of the Company, including the investment and actuarial functions, are provided by employees of The Society of Lloyd’s. The Society of Lloyd’s sets the remuneration of all its employees, including any variable components of remuneration such as bonuses. The only material transactions with The Society of Lloyd’s during the year relate to payments for provision of services to the Company and reimbursements to The Society of Lloyd’s for payments made on behalf of the Company.

The members of the Board each have terms of reference which set out their respective responsibilities. Each performer of a function has a role profile which sets out the responsibilities for that function and they have each been approved by the managing director.

The Company considers its SOG to be proportionate to the nature, scale and complexity of the risks inherent in its business. The key functions of the Company have the necessary authority, resource and operational independence to carry out their tasks. Any communications and risks are discussed by the Board to ensure effective governance.

B.2 Fit and Proper Requirements

The Company follows the procedures set out by The Society of Lloyd’s for meeting Fit and Proper requirements. These procedures ensure that all those holding controlled functions:

- Meet the requirements of the Regulators’ “fit and proper” test and follow its principles. These are set out in the Governance Map;
- Comply with the Scope of Responsibilities; and
- Report anything that could affect their ongoing suitability.

The following factors are taken into account when deciding whether an individual is fit and proper:

- Their honesty, integrity and reputation;
- Their competence and capability;
- Their financial soundness; and
- Personal characteristics

Fitness and proper checks are made before an individual is appointed to carry out a controlled function and also periodically thereafter.

B System of Governance (cont.)

B.2 Fit and Proper Requirements (cont.)

The capability of individuals running the key functions is assessed annually as part of The Society of Lloyd's Performance Appraisal Process. This process ensures that individuals have an appropriate level of expertise and competence to carry out their role. Where specific technical skills are required, it is ensured that the individual is appropriately qualified. All development needs are addressed as part of the annual Professional Development Plan.

B.3 Risk management system including the own risk and solvency assessment ("ORSA")

The Company follows The Society of Lloyd's Risk Management Framework including its Risk Policy and ORSA Policy.

The Company's ORSA together with the Company Risk Register are revised and approved at least annually by the Board. The Company revises both the Risk Register and the ORSA when a new emerging risk to the Company is identified. The Company reviews the list of existing and emerging risks identified by the Society of Lloyd's in its ORSA to identify potential new risks. The impact of all risks is assessed against a matrix of frequency and severity.

The responsibility for monitoring and assessing risks in the Company's Risk Register is allocated either to Board members or performers of a function and the requirement to monitor those risks is included in their Terms of Reference or Role Profiles. The assessment of the risks is made taking into account the Company's risk appetites and risk metrics and from this the Board will decide whether to avoid, control, accept or transfer the risk for the benefit of the company.

The Company is assisted in complying with The Society of Lloyd's Risk Framework and Policies through the appointment of a Risk Advisor from The Society of Lloyd's Risk Management department.

The ORSA links to the business strategy for a run off insurance company and therefore ensures enough capital is available to meet the future requirements of the company, specifically for the future costs of regulatory requirements and audit.

No new significant emerging risks have been identified during 2021.

B System of Governance (“SOG”) (cont.)

B.3 Risk management system including the own risk and solvency assessment (“ORSA”) (cont.)

The Company's Solvency Capital Requirement (SCR) as calculated using the Standard Formula does not exceed the Minimum Capital Requirement (MCR) for pure composite reinsurers of €3.6m. The Company makes its own assessment of the capital required for the Company based on the Risk Register and Risk Appetites to confirm that this does not exceed €3.6m. This assessment is included in the Company's ORSA.

B.4 Internal Control System

As the day to day operations of the Company are managed by employees of The Society of Lloyd's, the Company is subject to the internal control system of the Society of Lloyd's. The Board approves annually the Company's Financial Framework which sets the authority limits for each type of transaction as well as the Company's Investment Parameters. The allocation of authority limits takes into account the requirement for segregation of duties and the Company's Investment Parameters provides limits on asset classes and the Company's risk appetite in respect of the market and interest rate risk of its investments.

The Company has a Compliance Officer who is an employee of the Society of Lloyd's. The Compliance Officer reports to the Managing Director but has authority to escalate to or report on any concerns directly to the Chairman and Lloyd's Head of Compliance.

B.5 Internal Audit Function

The scope of The Society of Lloyd's internal audit function includes the internal audit of subsidiaries on a cycle approved by The Society of Lloyd's Audit Committee. The Society of Lloyd's employs a Head of Internal Audit, who coordinates the execution of the internal audit plan, including outsourcing the work within this plan where appropriate. The internal audit function reports to the Audit Committee of The Society of Lloyd's on any significant findings and follows up on any agreed actions to remediate control weaknesses. The Head of Internal Audit has no responsibility for any other function across the business and reports into the Chair of the Society of Lloyd's Audit Committee, which is a non-executive Director role. This reporting structure delivers the independence of the internal audit function. By outsourcing part of the execution of the internal audit plan to a third party where appropriate, this ensures that the people who carry out the reviews and report the findings are independent from the people that work in the areas under review.

B System of Governance (“SOG”) (cont.)

B.6 Actuarial Function

The Society of Lloyd's assists the Company in the appointment of the Chief Actuary from one of its senior actuaries.

The Chief Actuary is supported by an appropriately qualified actuary and is subject to the internal controls and procedures of The Society's Market Reserving and Capital Department, including the requirement to comply with the Rules of the Institute and Faculty of Actuaries.

The Chief Actuary prepares annually an Actuarial Function Report for the Board and this includes a description of the governance as well as the assessment of both GAAP and Solvency II technical provisions and the calculation of the SCR and MCR.

The Chief Actuary reports to the Managing Director but has the authority to escalate to or report directly on any concerns to the Chairman and the Lloyd's Actuary (where the Lloyd's Actuary is not acting as the Chief Actuary).

B.7 Outsourcing

The Company complies with The Society of Lloyd's Outsourcing Policy. The Company has no employees and outsources to The Society of Lloyd's the provision of services to the Company. The Society of Lloyd's is registered in the UK and subject to UK legislation. It is regulated by both the PRA and the FCA. Outsourcing risk is recognised in the Risk Register and the Board reviews and approves annually the Company's operational plans, its financial performance, its compliance with the risk appetites of the Company and its investment performance.

B.8 Any other information

There is no other information to report on the SOG.

C Risk Profile

C.1 Insurance Risk

The underwriting risk to the Company is the risk that claims relating to the business written in the proposed underwriting year may turn out to be larger than expected. The Company has a structured approach to pricing over the long term which is approved by the Board and takes into account the Company's risk appetite. The reserving risk is the risk that the amount set aside for estimated claims on previous business is insufficient.

Reserves are set on a policy by policy basis in line with the risk appetite and subject to actuarial review. The Chief Actuary reports directly to the Board. The effect of the novation of the RITC contracts for Syndicates 553 and 1204 from 1 January 2012 was to remove substantially all the reserving risk in respect of the RITC portfolio. There are no outstanding claims for Syndicate 1171 and the possibility of reporting claims in respect of this syndicate reduces over time. There are no outstanding claims in respect of Exeat policies.

In assessing the provisions of Syndicate 553, the Company has incorporated judgement on any uncertainty surrounding the opening of the statute of limitations on abuse claims in the US.

The majority of the Company's insurance risk is mitigated by reinsuring the Run-off Reinsurance Policy of Syndicate 553 portion of provisions and claims paid. On a Solvency II basis, the provision outstanding at the reporting date was £5,001k (2020:£1,574k). As the provision solely relates to Syndicate 553's liabilities, the outstanding claims and IBNR were fully covered through the reinsurance arrangement in place. The increase in the gross reserves is due to an increase in sexual abuse reserves as a result of a temporary removal of statute of limitations in New York state.

C.1 Insurance Risk (cont.)

Claims provisions (comprising provisions for claims reported by policyholders and claims incurred but not reported) for insurance contracts are established to cover the ultimate cost of settling the liabilities in respect of claims that have occurred and are estimated based on known facts at the reporting date.

C.2 Market Risk

Market risk represents the risk that movements in financial markets will affect the financial position of the Company resulting from fluctuations in the level and volatility of market prices of assets, liabilities and financial instruments or from fluctuations in the credit standing of investment counterparties (including spread and risk concentrations). Market risks arising from the disposition of the Company's investments are monitored against defined parameters using an Investment Risk Assessment standard formula. The position is reviewed regularly by the Society's Investment Committee and approved by the directors annually. Investments are actively monitored on a fair value basis for the Society and amortised cost basis in particular for the company's assets as they relate to short-term and security deposits and are held at amortise costs.

C Risk Profile (cont.)

C.3 Credit Risk

Credit risk represents the risk of loss to the Company owing to fluctuations in the credit standing or default of insurance counterparties. The security of the reinsurance asset recognised in respect of the Run-Off Reinsurance Policy of Syndicate 553 is derived from the reinsurance provided to Equitas Holdings Limited and its fellow subsidiaries through the National Indemnity Company Agreement by National Indemnity Company (NICO), a company with an AA+ rating (Fitch).

C.4 Liquidity Risk

Liquidity risk represents the risk that sufficient funds aren't available to meet liabilities as they fall due. The value and term of short-term assets are carefully monitored against those of the Company's liabilities. The Company aims to maintain sufficient liquid assets to meet liabilities as they fall due. The primary liquidity risk of the Company is the obligation to pay run-off expenses as they fall due. The claims outstanding liabilities in respect of the Run-Off Reinsurance Policy of Syndicate 553 are met from the funds of Equitas Policyholders Trust Limited.

The Company benefits from a non-discretionary bond from the Society. In accordance with an agreement between the Society and the Company dated 4 June 1991, the Society will, at the request of the Company, pay to the Company the amount by which the liabilities of the Company exceed its assets. In addition, the Society has confirmed that it will make available an asset to meet any shortfalls in the solvency requirements as set out in the Solvency II Directive. The Company regularly reviews the adequacy of its cash position.

C.5 Operational Risk

This is the risk of loss to the Company arising from inadequate or failed internal processes, people and systems or from external events. The operations of the Company are subject to the systems and controls of the Society including capital assessment, risk management and internal audit reviews.

C.6 Other material risks

Financial Investments and Counterparty Risk

A list of permissible bank counterparties, for the purpose of money-markets investment, is maintained by the Society and restricted to banks having strong balance sheet and credit ratings. Investment parameters exist for all investment assets, controlling overall credit quality and ensuring appropriate risk diversification. Permitted counterparties to capital market transactions are also carefully controlled. All applicable parameters are reviewed regularly by the Society's Investment Committee.

Interest Rate Risk

Interest risk represents the risk to the company's performance and financial position as a result to exposure in changes in interest rates. Short term assets held by the Company are invested in money market instruments of up to 12 months' duration with the objective of minimising capital loss and meeting liquidity requirements.

C Risk Profile (cont.)

Foreign currency risk

Foreign currency risk represents the risk to the company's performance and financial position as a result to exposure in changes in exchange rates of foreign currencies. The sterling value of foreign currency assets fluctuates in line with exchange rate movements. The net impact of these fluctuations in sterling values on the Company's financial position is minimal because the Company matches foreign currency assets and liabilities.

Regulatory risk management

Regulatory risk represents the risk to the company's reputation or the company's performance and financial position as a result of not being compliant with the appropriate regulations. The Company has a compliance officer who monitors regulatory developments and advises the Board of the impact on the Company.

C.7 Any other information

The volatility in financial markets arising from the COVID-19 pandemic has not materially impacted the valuation of the assets held by Centrewrite as these are invested in short term money-market instruments.

D Valuation for Solvency Purposes

D.1 Assets

	31-Dec-2021		31-Dec-2020	
	Assets		Assets	
	GAAP £'000	SII £'000	GAAP £'000	SII £'000
Corporate Bonds	3,192	3,192	1,891	1,891
C've Investment Undertakings	-	2,205	-	3,609
Deposits other than cash	134	408	299	301
Reinsurance Recoverables	4,070	4,697	1,068	1,274
Cash and cash equivalents	2,592	115	3,724	115
Other assets	-	1	-	-
Total assets	9,988	10,618	6,982	7,190

The difference between the valuation of investments recorded at amortised cost basis for GAAP purposes, and at fair value basis for Solvency II reporting purposes, is an expected loss within Deposits other than cash.

D.1 Assets (cont.)

Cash and cash equivalents

On a GAAP basis, cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less at the date of placement, free of any encumbrances. On a Solvency II basis, the cash and cash equivalents includes only cash at bank and in hand, including a small amount of cash in the investment portfolio.

D Valuation for Solvency Purposes (cont.)

D.2 Technical Provisions

	31-Dec-2021		31-Dec-2020	
	Tech Provisions		Tech Provisions	
	GAAP	SII	GAAP	SII
	£'000	£'000	£'000	£'000
Technical Provision	4,070	4,935	1,068	1,511
Risk Margin	-	66	-	63
Gross Technical Provision	4,070	5,001	1,068	1,574
Reinsurance Share	(4,070)	(4,697)	(1,068)	(1,274)
Net Technical Provision	-	304	-	300

For the purposes of Solvency II valuation, the provision for risks and charges to cover future expenses of the Company in respect of past obligating events is reassessed to include all expenses to extinction of the final claim and reclassified as a technical provision.

The Solvency II technical provisions comprise the best estimate of liabilities and risk margin calculated in accordance with Articles 75 to 86 of the Solvency II Directive. The gross reserves have increased by £3m in the year, following a suspension of the statute of limitation which impacted US sexual abuse claims reserves in New York State.

D.2 Technical Provisions (cont.)

Gross technical provisions

The gross Solvency II technical provisions comprise the best estimate of the gross liabilities (outstanding claims, IBNR and run-off provision) and the risk margin, discounted using the relevant risk-free yield curves. GAAP provisions are undiscounted on the grounds of materiality and exclude a specific risk margin.

	2021	2020
	£'000	£'000
GAAP gross technical provisions	4,070	1,068
Risk margin	66	63
Run-off provision	242	237
ENIDs	785	214
Discounting	(162)	(8)
SII gross technical provisions	5,001	1,574

Best estimate of liabilities

GAAP technical provisions have been reviewed and are considered to be an appropriate basis for the best estimate of liabilities under SII. The best estimate of outstanding claims is assessed on an individual case basis and is based on the estimated ultimate cost of all claims notified but not settled by the balance sheet date. The best estimate of the IBNR (incurred but not reported claims) is based on projections from past experience of the development of claims over time to form a view of the likely ultimate claims to be experienced, having regard to the variation in the business accepted and the underlying terms and conditions.

D Valuation for Solvency Purposes (cont.)

D.2 Technical Provisions (cont.)

Best estimate of liabilities (cont.)

The estimation of claims IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the Company, where more information about the claim event is generally available. Claims IBNR may often not be apparent to the insured until many years after the event has happened giving rise to the claims. The only material line of business is the Run-off Reinsurance of Syndicate 553's 1985 and prior years of account ceded by Equitas Insurance Limited and fully reinsured by Equitas Reinsurance Limited, comprising 99% of the gross technical provisions excluding the provision for other risks and charges.

Risk margin

The Risk Margin is calculated using the SCR from the standard formula calculation excluding interest rate risk but including unavoidable market risk and operational risk in line with legislation.

ENIDs

An ENID load of 20% is included in respect of gross reserves on Syndicate 553 (Warrilow), to allow for the possibility of events occurring that will not be in the history of the data. The impact on the net TPs is minimal as Warrilow reserves are fully reinsured.

D.2 Technical Provisions (cont.)

Run-off provision

The provision for other risks and charges is required under Solvency II only, and not under GAAP, and is the best estimate of the costs of running off the remaining liabilities,

Discounting

Lloyd's uses the risk free yield curves provided by the PRA to discount the liabilities.

Reinsurers' share of technical provisions

	2021	2020
	£'000	£'000
GAAP RI share of technical provisions	4,070	1,068
Discounting	(158)	(6)
ENIDs	785	212
SII RI technical provisions	4,697	1,274

For the purposes of the Solvency II accounts, the reinsurers' share of provisions for claims is based on calculated amounts of outstanding claims and projections of IBNR, net of estimated irrecoverable amounts, having regard to the reinsurance programme in place for the class of business, the claims experience for the year and the current security rating of the insurance companies involved. Statistical techniques are used to assist in making these estimates. The expected recovery includes an adjustment to reflect the risk of counterparty default.

D Valuation for Solvency Purposes (cont.)

D.2 Technical Provisions (cont.)

Reinsurers' share of technical provisions (cont.)

Irrecoverable amounts are taken as the expected loss-given-default in each future year assuming a 50% recovery rate in the event of reinsurer default and probability of default as given by Standard & Poor's analysis of AA rated corporate defaults during 2021.

D.3 Other liabilities

	31-Dec-2021		31-Dec-2020	
	Other Liabilities		Other Liabilities	
	GAAP £'000	SII £'000	GAAP £'000	SII £'000
Amounts due to group undertakings	244	-	213	-
Accruals and deferred income	1	-	1	-
Payables	-	245	-	214
Total other liabilities	245	245	214	214

Amounts owed to group companies is in respect of day to day expenses of the Company settled on its behalf by the Society of Lloyd's.

D.3 Other liabilities (cont.)

Accruals and deferred income are amounts accrued for expenses incurred but not yet settled by the Society on the Company's behalf. In the Solvency II balance sheet, the amounts owed to group companies, tax payable and the accruals and deferred income are aggregated and disclosed as payables.

D.4 Alternative methods of valuation

The Company does not use any alternative methods of valuation.

D.5 Any other information

The Company does not have any other material information to disclose.

E Capital Management

E.1 Own Funds

The Company maintains a capital structure from equity shareholders' funds consistent with the Company's risk profile and the regulatory requirements of its business. The Company's objective in managing its capital is to satisfy the requirements of its policyholders and regulators, whilst matching its assets and liabilities taking into account the risks inherent in the business. The Company's prime source of capital is its equity shareholders' funds. In addition, the Company benefits from a non-discretionary bond from The Society of Lloyd's to meet any shortfall in either liquidity or solvency. The Company aims to maintain £5m of equity capital. As at 31 December 2021, on a Solvency II basis the Company had £5.4m in own funds (2019: £5.4m) comprising £1,000 of issued share capital and the balance in reserves of £5.3m (2019: £5.3m). All own funds are classified as unrestricted Tier 1 capital and are eligible to cover the MCR and SCR.

The Company reviews its solvency position annually and has designed its risk metrics to detect any issues that may affect the level of solvency in the Company. There is minimal volatility in the reconciliation reserve because future cash flows have been prudently assessed and included in the technical provisions, reducing the likelihood of future liabilities. The impact of sensitivities to these liabilities, and the assets held by the Company are considered to be immaterial.

E.1 Own Funds (cont.)

The Company is required to meet a SCR which is calibrated to seek to ensure a 99.5% confidence of the ability to meet obligations over a 12 month horizon. The Company calculates its SCR in accordance with the standard formula prescribed in the Solvency II regulations and its SCR is lower than both the MCR and the Company's equity objective.

The difference between the equity shown in the Company's financial statements and the excess of assets over liabilities calculated for solvency purposes is shown below. This is mainly due to the difference in treatment of the run-off provision, risk margin and the impact of the discounting and reinsurer default allowances discussed in section D.2.

	£'000
Shareholder's equity under GAAP	5,673
Run-off provision (SII only)	(242)
Risk margin	(66)
Valuation differences	<u>8</u>
Excess of assets over liabilities (S.02.01.01)	5,373

E Capital Management (cont.)

E.2 MCR and SCR

The calculation of the MCR and SCR is set out in the table below. The MCR is €3.6m or £3.2m. The SCR is split out into the risk modules and calculated using the Standard Formula set out in the table below. The final amount of the SCR is still subject to supervisory assessment.

The Company has not used simplified calculations and does not use undertaking specific parameters. The Company has not made use of the options provided for in the third paragraph of Article 51(2) of Directive 2009/138/EC. The regulator has not imposed any capital add-ons to the SCR.

	As at 31 December	
	2021	2020
	£'000	£'000
Market Risk	134	59
Counterparty Default Risk	116	161
Non-Life Underwriting Risk	79	78
Diversification	(85)	(63)
Operational Risk	73	45
SCR	317	280
MCR	3,247	3,241

E.3 Use of duration-based equity risk sub-module in the calculation of the SCR

None.

E.4 Differences between the standard formula and any internal model used

Not applicable.

E.5 Non-compliance with the MCR and non-compliance with the SCR

None.

E.6 Any other information

There is no other material information regarding capital management to disclose.
